

Our country calls: tway: away: To where the bloodernam block the groan. Stitks to defined the protect way where That Time in all he course has seen. The frins a thousand or state area. Fording the arms of down, and we track; They run to smith a T down, and we has the banded trailors back.

Hol stardy as the oaks ye cleave, — And moved as soon to fear and fight, — Man of the glade and fortest i lave hour wooscraft for its field of fight. The arms that wield thear must pour an iron ismpest on the for; His seried take shall real heltre iths arm that isys the popular low.

And 3 s who breat the monitain storm (By gramy steep or bightand late, Opens, for tassiand ys love to form A baiwark that no ise cus breat, Shand, Illes your own gray ellifs that meck The whirtwind, din i in her dolense; The blast as soon thall in more the rock As rembing equatrons lear ye thence.

And ye, whate homes are by her grand Hwift rivers, rising far away. Occess from the dopth of her green land as wighty in your march as they ; As territies as when the risks Have swells them over bank and bounds. Whith suddes floods to forwas the plains of dat sweep clong the woods uptorn.

And yo who throng, beside the deep, Her ports and banlets of the strand, In ambor like the avance that leap 'on hislong matrixet that leap (deen the that deep, where, of the brim, He rises, all his floods to purt. And flogs the product backs that swim, A helplace wrech against his shore.

Few, few were they whose swords of bid, Woo the fair land in which we dwell; Wog the Lif isk in which we used: Bat we are many, we who hold The grim receive to guard it well. https:/fit.ik.grim.com/ Elow arker blow, till near shall see That Hightsad Might move hand in hand, . And govings must their timph be. -[N. 7. Leager.

French Millitary Improvement. The Paris correspondent of the Morning Herald makes the following rather wonderful statements :

ful statements: The military preparations of the French government are going on with great activity. Experiments are just now going on at, Vin-connect with a view to use common rifled howitzers as mortars, by fixing them at a very sharp angle, which enabled small shells to be thrown some 6000 metres. But these experiments are cite fout little altention in comparison with a new invention which has been tried with perfect encress, and by which are filled with air a little below the walst, and heavy weighted at the feet. With these troosers on a de-piece, which are filled with air a little below the walst, and heavy weighted at the filts. Army weighted at the filts. The present and constraines of the strown aware barent of the straines at the strokers which are filled with air a little below the walst, and heavy weighted at the filts. Army weighted at the filts. Army these troosers on a de-straining of the straines and troosers of the straines are been are filting of constraines. All of one piece, which are filled with air a little below the walst, and heavy weighted at the filts. Army weighted at the filts. Army these troosers on a de-straining of the straines and troosers, fill of or address aware of three to fire and troosers, fill of or address are stroosers on a de-below the walst, and heavy weighted at the filts for the strong allog of the strong allog of the strong allog of the strong allog of these to fire and troosers on a de-strong where the water is about filteen feet deep, fitting their maskets and two feet, the water barely reaching the top loadiling as they weat. The men sink about filteen feet deep, fitting their maskets and two feet, the water barely reaching the top loadiling as they weat. The men sink about filteen feet deep, fitting their maskets and two fiett, the water barely reaching the top loadiling as they water. The men sink about filteen feet deep, fitting their maskets and twa figure a sthey water. The men sink about fitting as they water

the feet. With these troosers on a de-tackment, has frequently crossed the lake of Vincences, where the water is about filteen feet deep, fining their muskets and loading asthey went. The men sink about two feet, the water barely reaching the to of their thighs, and appear not to have any difficulty in keeping their balance and moving along. The experiment is to be repeated in the presence of the Emperor, and there is not the singutest doubt of the Emperor.
