Bald Headed.

It was not long ago that a French writer announced and proved the dominion of the "bald-headed men" in France, and showed them to be really the ruling spirits in every department of life—in politics, finance, poetry, art, science, and even in gallantry! In all of these there was a bald-headed man at the head of the head, and the young fellows with flowing locks and "Hyperion curls" were quite thrown in the shade by the middle-aged gentleman, whose noble mien was as bare and smooth as billiard balls. Galip, who, by the bye, is getting a little bald himself, says the same thing is true in all civilized countries; whatever the fact may be among savages; and the reason lies, not certainly in the superior beauty of the bare poll—though a bald head may still be a very handsome one—but in the fact that a man rarely comes into the perfection of his manhood before the period at which baldness ordinarily begins. Accordingly, as a general rule, the less hair the more brains—and vice-versa. "Kit North," a competent judge of the case, wrote in Blackwood, that "No strong-bodied, strong-minded, strong-hearted man reaches his true prime until he is turned of forty; and he keeps on till he is sixty; being probably at seventy threatened with a small family by a second or a third wife."

A GOOD STORY about Mr. Seward.—The Philadelphia "North American" of this morning tells this story of Secretary Seward:

"Hon. William H. Seward, Secretary of State, passed through the city yesterday morning, at 11 o'clock, on his way from New York to Washington. Mr. Seward has a weakness whenever possible for traveling incog. He is an inveterate smoker. When he enters a passenger train he seeks out the smoking car, and finds gratification in puffing La Normas until the end of his ride. Between New York and this city he occupied a seat with a pleasant looking genius, who talked about that d—d fool Seward during the whole trip. The stranger supposed his fellow traveller to be a sutler's bookkeeper. Mr. Seward plotted into himself in a most scandalous manner, seconding every objurgation of the stranger with hearty emphasis. When the latter observed Mr. Seward identified and saluted by gentlemen upon the boat, his feelings can be better imagined than described. The last seen of him by our informant he was hiding behind the steamer's smoke-stack."

FARMERS should give attention to the production of flax and wool, both of which will be in great requisition, and those who first go into producing them will make the most money. Wool is in great demand; and farmers will find sheep the most profitable stock they can keep. Agricultural pursuits are destined to command more attention in this country for the next several years than they have ever done. Almost all other kinds of business have suffered so that men naturally turn to the more safe and less annoying occupation of farming. If the thousands of young men who go to war, will settle down on Western lands, when the war is over, it will be an offset to evils which war begets. The tillers of soil, if they cultivate intelligence, patriotism and public spirit along their soil, occupy the position of real independence, and are a nation's bulwark and glory. It would be well for farmers not to sell sheep or lambs for slaughter, but to raise them for the wool crop. There is no doubt that a good market can be had for all the wool that can be raised for years hence.

PERUVIAN PEBRIFUGE—For the prevention or cure of Fever and Ague. In all miasmatic and miasmal districts where bilious and intermittent fevers prevail, this startling remedy will be found invaluable. It effectually stops the chills and subdues the fever, invigorates the appetite, always revitalizes, gives elasticity to the muscles and firmness and vigor to vitality, which none but those who have used it can realize. In no case has it failed to cure, and it can truly be called a specific for all diseases of the stomach. Others have been cured by it after taking nauseating quinine and vile, poisonous mercurials.
Prepared and sold by J. S. D. MANCE, Newcastle, Lawrence county, Pa.
Sold also by Druggists generally. oct11:lawly

SEALED PROPOSALS.

SEALED PROPOSALS will be received by the undersigned, until 12 o'clock, noon of THURSDAY, the 21st day of November, inst., at their rooms, in MARKET HOUSE, CITY HALL, WHICH SCALES, &c., in accordance with plans approved by Councils, which may be examined at the office of Messrs. Bass & Moore, Architects, No. 47 Diamond, Allegheny City.
Specifications will be ready for the use of bidders on MONDAY, 18th inst., and can be had from the Committee or from the Architects.
All bids must specify the lowest price if paid in cash as the work progresses, and also the price if paid by the revenue certificates of the treasurer of the city from the stalls in Market House—said revenue to be satisfactorily secured to the contractor.
Councils reserve the right of choosing the manner of payment. All bids to be subject to the approval of Councils.
Bidders will address their Proposals to the Chairman of the "Special Committee on Diamond Improvement," marked "*Proposals for Allegheny City Market House.*"
Councils will require all bidders to furnish a year after their responsibility, before considering bids.
SAM'L RIDDLE, Chairman.

nov8 LITTLE & TRIMBLE.

Miscellaneous.

DITHRIDGE'S XX FLINT GLASS OVAL CARBON OIL LAMP CHIMNEYS,
PATENTED SEPTEMBER 18TH, 1861.

THE BEST THAT HAVE EVER yet been offered to the public! They are the best for the following reasons:
1. Because, being of an oval shape, the glass is every where equally distant from the flame, so that the draft is stronger and more regular.
2. The oval shape is better adapted to resist the effect of sudden expansion, so that it is impossible to crack them.
3. The glass is made largely of Lead and Pearlash, giving a great degree of strength and elasticity. The chimneys which heretofore have found to be so brittle as to crack even when not in use, are invariably made of Lime Glass instead of the Flint Glass, of which ours are manufactured.
4. But the greatest advantage of these Chimneys is that when you have one in it will last forever, and if any accident should occur to the lamp as to prevent the ex pansion when heated.
Manufacturers and consumers of Carbon Oil, who have felt the magnitude of the obstacle, which has existed in the great expense of chimneys, in the way of the general use of the oil, have found a remedy in the Oval XX Flint Glass Chimneys, which they will certainly lessened the cost of Carbon Oil Lights to those of Lard Oil, and increased the consumption of oil consequent upon the lessened expense for chimneys.
For sale by J. D. Kirkpatrick, L. Thamm & Co., Rogers & Meeks, P. Hayden, Lycoco Oil Co., Weidel & Schenke, W. Ogden & Co., W. F. Wooldridge, W. H. Murray, or at the manufactory, Washington street near Pennsylvania avenue

To Farmers and Others.
FOR SALE,
GEOWEY'S SUPERIOR PATENT
GRAIN FAN AND SEPARATOR.
PATENTED JANUARY 10, 1860.

THE SUPERIORITY OF THIS FAN over all others in use consists in its cheapness, simplicity and durability. Second, in cleaning Grain faster, better and more thoroughly, with less labor than any other machine. Thirdly, the above Fan has been long engaged in manufacturing and selling Agricultural Implements, convinced of the great want of a machine by the farmers, for cleaning all kinds of grain and Seeds, presents this to the public with full confidence that it will meet their wants.
The undersigned having purchased the sole right to manufacture and sell the above Grain Fan and Separator in Western Pennsylvania, Western Virginia, and all Ohio, and the right to sell in Indiana and Illinois, is now prepared to fill all orders, wholesale or retail, at 82 Liberty street, Pittsburgh, Pa.

Hotels.

ST NICHOLAS HOTEL,
Broadway, New York.
Rates Reduced to $2 per Day.

ON the EUROPEAN PLAN. Since the OPENING of this celebrated New York Hotel, in 1854 it has been the object of the proprietors to make it the most complete establishment of the kind in the city. Its location is one of the most central and desirable in the city, being equally convenient to the business and pleasure seeker.
Any whatever has seemed lacking to a minister to the comfort of the guests they have endeavored to supply, without regard to cost, to provide, and to combine all the elements of unlimited and noble enjoyment which modern art has invented, and under taste approved, and the patronage which it has commanded during the past six years is a gratifying proof that their efforts have been appreciated.
In view of the subject of the times, it has been deemed expedient to reduce the price of board to the most rigid economy, the undersigned has

Reduced the Price of Board to Two Dollars per Day,

at the same time abating none of the luxuries with which their table has hitherto been supplied.

MESSRS. E. G. & J. H. HAWKES GENTS—The Lubricating Oil we are getting from you we find to be the best for our purposes we have ever used.
THE L. S. M. R. R. R. CO.,
By WM. REPP, Prest.

VALUABLE IMPROVEMENT
In Steam and Atmospheric Hammers.

LETTERS PATENT were granted on Sept. 4th, 1860, to Thomas Beach, for a very simple and efficient improvement in Steam and Atmospheric Hammers, whereby the full stroke of the hammer is obtained, no matter what be the thickness of the mass of iron to be hammered—thereby affecting a great increase of power where large pieces of metal are to be operated upon, and a corresponding saving of expense.
The subscribers are owners of said patent, and are desirous of selling rights to use said improvement, as well as territory under said patent. A model of said improvement is left at the office of Messrs Bakewell & Pershing, Attorneys at Law, corner of Grant and Diamond streets, where parties interested may call and see it, and learn also the terms of Horse sale, &c. P. S. WEAVER,
THOMAS BEACH,
Freeport, Armstrong co., Pa.

PROPOSALS.

PROPOSALS FOR ARMY BAGGAGE WAGONS.
QUARTERMASTER GENERAL'S OFFICE,
Washington, June 21, 1861.
Proposals are invited for the furnishing of Army Baggage Wagons.
Proposals should state the prices at which they can be furnished at the place of manufacture, or at New York, Philadelphia, Baltimore, Washington, or Cincinnati, as preferred by the bidders.
The number which can be made by any bidder within one month after receipt of the order, also the number which he can deliver within one week.
The Wagons must exactly conform to the following specifications, and to the established pattern:
Six mule (covered) wagons, of the size and description as follows, to wit:
The front wheels to be three inches thick, hubs ten inches long, to be of dogwood, and fourteen and a quarter inches high; hind wheels four feet ten inches high, hubs to be and a quarter inches in diameter, and fourteen and a quarter inches long; felloes two and a half inches wide and two and three quarter inches deep; best iron shoes two inches wide, and one quarter inch thick; to have the wagons all to track five feet four inches from centre to centre of the wheels. Axletrees to be made of the best quality refined American iron, two and a half inches square at the shoulder, tapering down to a neat and a half inch in the middle, with a seven-eighths inch spring-bolt hole in each axletree; washers and linchpins for each axletree; size of linchpins one inch wide, three-eighths of an inch thick, with a hole in each end, and a wooden block four and three-quarter inches in the axletree with caps on the ends secured substantially to the axletree with caps on the ends secured substantially to the bolsters, six inches from the middle, and fastened to the bolster with a strong iron clasp, (the bolster to be four feet five inches long five inches wide, and three and a half deep,) with four half-inch bolts.
The tongue to be ten feet eight inches long, four inches thick at the wide end, three inches thick in front end of the hounds, and two and a quarter inches wide by two and three-quarter inches deep at the front end, and so strung and so fit to go in the front end of it to hang while two feet of the tongue when the wagon is standing at rest on a level surface.
The front hounds to be eight feet two inches long, three inches thick, and four inches wide over axletree, and to retain that width to the back end of the tongue. The hind hounds one foot eight inches long and three inches square at the front end, with a plate of iron two and a half inches wide by five-eighths of an inch thick, fastened on the top of the hounds over the back end of the tongue with one half-inch screw bolt in each end, and a plate of iron of the same size on the under side at each end one and a half inches to clamp the front hounds together, and fastened on the under side, and at front end of bolster, with half inch screw bolt through each hound, a seven-eighth inch bolt through tongue and hounds in the centre of jaws, to secure the tongue to the hounds, a bolt of iron three inches wide, one-quarter inch thick, and one foot eight inches long, secured on the inside of jaws of hounds on each side of the tongue, and a plate of iron same dimensions on each side of the tongue, where the tongue is and bonnets run together, secured in like manner, a brace of seven-eighths of an inch round iron to extend from under the front axletrees, and take two bolts in front part of the hounds, same brace three-quarters of an inch round to continue to the back part of the hounds, and to be fastened with two bolts, one near the back end of the hounds, and one through the tongue and hounds; a brace over front bolster one and a half inch wide, one-quarter of an inch thick, with a bolt in each end to fasten it to the hounds, the opening between the jaws of the hounds, to receive the tongue, and four and three-quarter inches in front, and four and a half inches at the back part of the jaws.
The hind hounds four feet two inches long, two and three-quarter inches thick, and three inches wide, jaws one foot long where they clasp the coupling pole; the bolster four feet five inches long, and five inches wide, by three inches deep, with a steady iron two and a half inches wide, by one-half inch thick, turned up two and a half inches and fastened on each end with three screw bolts in the bolster stocks and hounds to be secured with four half inch screw bolts, and one half inch screw bolt through the coupling pole.
The coupling pole nine feet eight inches long, three inches deep, and four and a half inches wide at front end, and two and three-quarter inches wide at back end; distance from the centre of king bolt hole to the centre of the hole for the futchel plate nine feet one inch, and from the centre of king-bolt hole to the centre of the mortice in the hind end of the pole eight feet three inches; to have king bolt one and a quarter inches diameter, of best refined iron, drawn out to answer a head at each end, as such will be passed through the iron axletree from place of inside long, three inches wide, and one-eighth of an inch thick, to the centre hole in the axletree, where they rub together, and three inches wide, and one-eighth of an inch thick on the under side of the bed pieces, and one through each end to clinch it at both ends; two rings on each end of the body, to close and secure the ends of the cover; a staple in the lower rail, near the second stud from each end, to fasten the side cords. The outside of the body and end trough to have two good coats of white lead, colored to a blue tint, the inside of them to have two coats of vermilion red painted, the running gear and wheels to have two good coats of vermilion red dashened of a chocolate color, the hub and felloes to be well painted, instead of painted, if required.
A bar pot, six extra king bolts and two extra singletrees to
