Calhoun. This was a mistake—her hashand's name is Alexander, a plowmaker by trade. In this connection we may state that the wound through the foot has been probed, and the physicians found that the nail had carried with it a portion of the sole of the shoe, which is still in the foot, and which will have to be ex-tracted by a surgical operation. It fewed spontaneously, and immense quar ities were wasted.

These tonders are made at a time when there is comparatively ho excito-ment, but should the news of a bloody conflict startle sur people, there would be no limit to the number of ladies who would volunteer to go to Washington, or even to the battle field. CONFLATTER OIL CONFAST.--This com-pany realized from oil and other sources, dur-ing the present year, \$67,964,43, and expended during the same period, \$30,227.60, being a net gain of \$37,736.83. This, added to the estimated value of oil still at the wells, would give a total profit for the year of \$51,222.22.

False.-The statement that a young man had been bitten by a mad dog, at Maadville, and had subsequently sufford ampatation of the hand to save his life, is pronounced false by the paper in which it originated. The story was started by the young man himself, without thinking that it would get into the papers and travel all over the country. Bank Note Quotations.
