THURSDAY MORNING, APRIL 17. Je Muca interesting matter will be found on our first and fourth pages this morning.

Palaski. Blow-after blow. How-rapid, too, is the delightful succession. No sooner have we made out the cheering inventory of our gning at Island No. 10, than the telegraph ome the avail-courier of that grand and terrible, but all too costly and perilous, victory, or retrieval of victory, at Pittsburgh anding. Then the same winged herald, President, we know not, and now it matters within a few hours, flashes over the land a third message of victory, but contrasting action of the President when the bill would USTESTATE SENATE OF D. GAZZAM strongly with the last, for no drop of blood stained the earth, and yet the dominion of lieve that his firmness would not be able to many a mile of her surface was decided by that bloodless triumph of General MITCH-BLL's untiring energy and true strategy, in pressing forward on the lines of the enemy,

and occupying Huntsville and a hundred miles of the Memphis and Charleston Railroad, with connexions at Decatur and Stevens' Junction commanding other important lines of communication. But hardly have approves. we had time to realize the magnitude of this splendid achievement of genius and enrnestness, when, by way of the east, we are apprised that the rebel State of Georgia

threatened by the approaches of General MITCUELL on the north-west, along the railroad which he has seized in that quarter, has actually seen her strongest fort, the key of her principal scaport delivered up, after an unavailing defense, into the strong hands of those entrusted by the nation with the task of bringing her back to her allegiance.

A contempory thus forcibly speaks of the fall of Fort Pulaski-its antecedents and

Its inmates, after an experience which must have brought to their minds forcibly the condition of our bravesoldiers one year ago in Sunter, have given up everything. Their surrender was unconditional. The ons have agreed to report a new slave-

fire of our batteries, which is described as terrific, breached their walls, dismounted their guns, and rendered it impossible for a man to stand upon the parapets. It was what the Rursians called at Sebastopol s what the Kursains caned at Secondary perfect feu d'enfer. A day before the sur-render signals of distress were sent to Sa-vannah. That palpitating city was warn-ed of its coming fale, and we can imagina that its people are now in auything but a leasant frame of mind. Pulaski is about 18 miles from Savannah

the loss of it exposes that city to the in roads of our gunboals, and whatever its de Renses, it is quite impossible that they should long resist an attacking force by land and river. Perhaps there is but one more im-portant city in the South; which is New Orleans. It commands an extensive sys-tem of railroads, no less than thirteen in number, which ramify in all directions to the porth anoth and west. As a centre of the north, south and west. As a control the cotton commerce of the Gulf States it orktown. no less important. A half millio are annually shipped from that port. Th river Savannab, it should be remembered

lso, is navigable to our smaller gunbo also, is having to our smaller, and the same two hundred miles into the interior. From Savannah there is an easy approach to Charleston, to which attention is soon likely to be paid by xamination General Hunter's command
