In regard to obtaining furloughs forsoldiers ick in the hospitals and camps, even when notlikely to be of service in the army for a con-siderable period of time, he stated it could not be done, for military reasons. With regard to obtaining discharges for those dirabled so to the regimental surgeons. Several lings of provost guárds, with squads patrolling the country, have orders to streat any officer or soldier found outside of their brigade camp without a pass, and send them to the front to work on the fortifications. This order has been issued in consequence of the great num-ber of troops straggling to the rear, either through fear or curosity. Many of these are men whose cowardly legs ran away with their bodies during the late engagement, and their stories of being "cut to picces," and about the terrible fighting powers of the robels, have a bad effoct on the new troops coming up to these times, and it has been thought proper to put an effectual stop to such proceedings. It is a strange fact, that among all the strag-rglers on the 31st, those who came whole-skinned and empty-handed back to the rear, were the most despondent, and complained the most hitterly about the total destruction of their prepetive regiments, while the poor fol-lows who bore on filer powers to encourage. On the list we visited the hospital at White House, under the care of Surgeon Watson. This hospital contains about 1,500 site and wounded, and is a depot from which patients are shipped, as opportunity affords, on the sanitary boat. This hospital is not what it should be, and the proper authorities should iremedy the existing orils promptly. To this report we subjoin a list of patients in the hospitals at Yorktown, Portsmonth and White House from Western Pennsylvania. These hospitals, together with these at Por-trees Mource, Alexandria, and Washington, with the exception of the hospital at White House, are all well conducted, the patients having every attention-necessary for their welfare.

There are various surmises in regard to the party, some thinking that it was a party sent from the rebel army for the purpose of desitoy-ing the trensle work of the milroad at the point where it crosses the Ceickahominy, and that, being a small party, they succeeded in eluding our vigilant sentirely, and coming around in our rear, advanced along the awamip to the bridge, but that finding the bridge too-well guarded, they relinquished their original design, and committed all the depredations the devil suggested to their minds. It is well that the bridge is secure, for it suchads over, the entire Chickahominy bottom, and is from a quarter to a half mile long. Wesks would have been required to put the road in working order hal it been destroyed; but as it was, the rogular morning train was delayed but a few hours.
