Your Pills have had a long trial in my practice, and I hold them in esteem as one of the best apprients I have ever found. Their alterative effect upon the liver makes them an excellent remedy, when given in small doses for bilious dyscatery and diarrhose. Their sugar-coating makes them very acceptable and convenient for the use of women and children.

From Mrs. E. Stuart, Physician and Midselfe, Boston. I find one or two large doses of your Pills, taken at the proper time, are excellent promotives of the sarried searches when wholly or partially suppressed, and also very effectual to deems the stomach and expel secrees. They are so much the best physic we have that I recommend no other to my patients.

Too much cannot be said of your Pills for the curs of continenses. If others of our fastornity have found than as efficacious as I have, they should join me it proclaiming it for the benefit of the multitudes who suffer from that complaint, which, although bad enough in itself, is the progenitor of others that are worse. I believe continense to originate in the liver, but your Fills affect that organ and cure the disease.
