Large Hotel of Steel Goods—Signed—Last—Discoveries.

The Allegheny police yesterday visited the house of Daniel Buser, on Perry street, near Chestnut, and there discovered a lot of stolen goods, and other evidence of a robbery.

Buser (in company with a man named French) who was staying at his house, was arrested the previous night, while attempting to rob a store, and a full supply of burglar tools was found on them.

In Buser's house the officers found a lot of army traps, consisting of two traps, each trap being made of iron, a coat, four blankets, a lot of gloves, etc.

A chest of tools, with an endless variety of articles, was a human skull, and inside the skull a piece of dark colored glass, on one side of which was a piece of wire, and the other a piece of wire, and for what purpose it was used no one could conjecture.

The skull had been evidently opened by a surgeon, and a small portion of the brain had been removed.

Another curiosity was found—two pistols, made in the shape of walking canes!

The pistol barrels were of solid gold, and the hilt of the short hilt, and on the hilt were inserted long barrels, two feet in length, the whole presenting the appearance of an ordinary cane!

These weapons do not look very formidable, but they are certainly curious.

Among the other articles, were a galvanic battery, a splendid rifle, fine gold pens, lantern, and a variety of other articles, which burn a long time, and make a dull light, were among the novelties discovered.

The police also found a number of traps, the "profession" of these gent's. But to make assurance doubly sure, Buser is known to have a Repub. name, and he was identified as the son of that institution, as having been discharged last spring, and was now again appearing before the Mayor, having been hearing on Tuesday next. The stolen articles can be seen at the Mayor's office.

Statistics of the Draft.

We will publish from day to day the proceedings up of the Draft Commission, showing the total enrollment in each district, and the number of men enlisted, the number in service, and the number left subject to draft. The quota cannot be computed until all the districts are calculated:
