denied, and not only denied, but the con-verse of the proposition is strennously in-sisted upon. Hence the Emancipation Pro-chamation is declared, by those who claim to be leaders of the Democratic party, to be unconstitutional. The fallacy of this is things, we remark, are worthy of very se-

easily seen. Certain States have, by their own act, of projectiles is directly as their weight, secoded from the Union and are now. in while it is as the square of their velocity. seceded from the Union and are now. in open revolt against the Government. By this act they have cut themselves of from the Union and renounced the Constitution: Dound 15-inch ball at 800 feet. It is a question of velocity. And velocity means ion to the Government, that of open enc-mics. Now relations are, and must of ne-cessity be, reciprocal. If they are enemies of the Government, the Government must, built the section of velocity is the section of velocity. They have put themselves into a new rela-tion to the Government, that of open enc-mics. Now relations are, and must of ne-cessity be, reciprocal. If they are enemies of the Government, the Government must, built the section continues he these of the section with us is, how to obtain the best results with small charges, being the section continues he these of the section section of the days ones. of the Government, the Government must, while that relation continues, be their enemy. To be anything else-to throw over them the shield of its protection, to recog-nise their former rights under the Consti-tution-would be treason against itself, and be, in fact, nothing less than national sui-oide. These rebels have put themselves outside of the constitution, and to meet them on equal ground, the government must go out-side of the constitution too. But, in so

equal ground, the government must go out side of the constitution too. But, in so doing, the President does no violence to yield. Besides great indentations and exthe constitution. Maryland and Kentucky, both slave States, have not gone outside of the constitution, and in them the Procla-mation can have no effect. Moreover the door stands open, and if any State that has gone out shall, in the hundred days that the President has given them, come in again, the Proclamation is purely a war meas-ure. Slavery is the source of power to the This is not the work of large bores and low rebollion. It feeds its army, it builds its the fright furnishes its teamsters and the formation is purely a war meas-ure. The American people, in electing the constitution. Maryland and Kentucky,

Transfer-in-Chief of all the national forces, and imposed upon him the duity of con-ducting their wars; and had he failed to to take from that enemy his main source of strongth, when he had it in his power to do so, he would have been derelict in duty, and unfaithful to his great trust. To say that the *President* has no consti-tutional right to decree the emancipation of alavees in the States of the Union, is sim-black of the states of the Union, is sim-the states of the states of the Union, is sim-the states of the states of the Union, is sim-the states of the states of the Union, is sim-the states of the states of the Union, is sim-the states of the states of the Union, is sim-the states of the Union which the states of the Union the states and unfaithful to his great trust.
