DRY GOODS. MILLINERY GOODS FROM DRY GOODS. Traitorous intrigues.

Traitorous intrigues.

The degraph brings us reports of clandestine negotiations between some leaders of the democracy in New York and parties in Richmond, the object of which is to put a stop to the war, secure a representation in Congress from the rebel States, which representation, when combined with the democratic representatives of the North, will secure to that combination a majority. That much being secured, the next step is to be a National Convention, got up of course under the auspices of the same joint concern, to amend the Constitutions as to give the South, or, rather, to Slavery, all the richts gragantizes and securities it.

There are fictions that have, for the momental and more than the force of fact; but there is this peculiarity inherent in them, that, being rooted shid grounded in the poundant on adventition, and dependant on adventitions support, they do not last, but feeling for McClellan, or rather the form it has taken, with such fictions. It is not the feeling for McClellan, or rather the form it has taken, with such fictions. It is not the feeling for McClellan, is a character of the same and respect in soldiers serving under the the country, and ground in the boar accepted? It was very well and they been dependent on adventitions support, they do not last, but feeling for McClellan, or rather the form it has taken, with such fictions. It is not the feelings of the same and respect in soldiers serving under the that commander has been of the feeling along, the farfal approach of months of inscition, and immediate winter of the same and proved the series of historical causes and particle dierors may no longer be need and made in vain. He has been the they could very readily and very dendring along, the farfal approach of months of inscition, and the transmitted that they count and they could have forgetten that they count of magning. The feeling of the Clellan, is a large and an and the very readily and particle deared and made in vain. He has been the country and NEW ADVERTISEMENTS. TO COUNTRY MERCHANTS AND NEW STYLES, LECTURES. With the view of carrying into effect the beneficient and important ends contemplated by its organization, the Honorable Commissioner, Mr. Isaac Newtown, solicita the copperation of the farmers and friends of agriculture, as well as of Agricultural Societies in every part of the country. Their experience in farming will render their correspondance in the stablishing the same.

In a circular recently issued by the new department, Pennsylvania is shown to be the richest State in the Union, in coal, iron, nickel and zinc. In pig Iron she makes 62 per cent. of the quantity and 58 per cent. of the value of the quantity and 58 per cent. of the value of the whole productions of the United States. In har and rolled iron the production of Pennsylvania in 1860 exceeded two hundred and M/dy-nine thousand tons. The production of the recently discovered petroleum, or coal oil, its estimated at six thousand barrels per diem, and the wells appear to be inexhaustible.

It also appears from a new publication just issued by this Department that the ratio of increase of our principal agricultural and mineral products, has more than kept pace with the increase of population. New plants have been successfully introduced in the last leny sars. The Sorghum, transplanted from Chinn, yielded over seven million two Ausdred and Mydy-five thousand gallons of molasses in the year 1860, and the estimated yield for the part is toole million gallons. gle.
