

English Opinion Against French--  
The Revolution in St. Domingo--  
The Teachings of History--  
In the circular note of the French Government to the governments of England and Russia, the "irreparable disaster" of servile insurrection, consequent upon the President's proclamation, is the most striking feature of the great power's attitude in regard to the French colony.

The Imperial Secretary had probably in his mind, when he penned this sentence of blame ought to be meted, and if possible stop a step to this war. The London Star, in commenting upon that point in the French note, very justly remarks:

The Imperial Secretary had probably in his mind, when he penned this sentence of blame ought to be meted, and if possible stop a step to this war. The London Star, in commenting upon that point in the French note, very justly remarks:

The Imperial Secretary had probably in his mind, when he penned this sentence of blame ought to be meted, and if possible stop a step to this war. The London Star, in commenting upon that point in the French note, very justly remarks:

Part of the island was invaded by the Spaniards and by the English, and the insurgent blacks and mulattoes, under the leadership of Toussaint, held strong positions in the mountains and defied all efforts to subdue them.

The French Commissioners, involved in difficulties on every hand, at length decided to conciliate the blacks, and in August 1793 proclaimed universal freedom, in apprehension of an English invasion, which would place in the following month. In February, 1793, the National Convention at Paris confirmed the compromise arrangement, and formally guaranteed the freedom of all the inhabitants of the French colony.

Meanwhile, the English conquered the whole western coast of the island, took the capital, Port au Prince, and besieged Governor Gen. Leveaux, in the city of Saint-Domingue, the last stronghold of the French, who were reduced to extremities by famine and disease.

At this juncture, the blacks, led by Toussaint L'Ouverture, relying on the proclamation of emancipation, came to the aid of the French Government. The siege of Port au Prince was raised, the Spaniards driven back, and after a long contest, during which Toussaint was appointed Governor-General of the colony, the English were expelled from the island. In 1797, the treaty with Spain concluded at Basle, July 23, 1795, now belonged to France.

Under the energetic administration of Toussaint L'Ouverture, who was now virtually Governor of the whole island, peace was restored, commerce and agriculture revived, the colonies were protected and their interests restored to them, and a constitution was framed for the colony, which was adopted in 1801. An expedition, consisting of 60 ships and 20,000 veteran soldiers under the command of General Leclerc, was sent to enforce this decree. The army landed at Samana in February, 1802. The campaign was successful, and the French flag was raised over the island. Toussaint, however, refused to surrender, and he was confined to the fortress of Arcahaie. He died there on February 7, 1803.

During this period of his confinement, Toussaint was himself taken to France, where he died in April, 1804. Indignant at this, the British government immediately commenced negotiations with Toussaint, and he was released. He returned to the island, and he was proclaimed Governor-General. He died on October 7, 1804.

There is the history of our country and its sympathies. History is just now a very suggestive teaching by example, and by philosophy. History is just now a very suggestive teaching by example, and by philosophy.
