This battle (Antistam) has been the most sangu nary of the war, and the only one fought with visible osign and upon military principles. The arrangeommanding General—the sending into settles th right and the left divisions—the closing up of the centre, and final success—excites bewildering admi ration, and carries the mind to the great fields of Austerlitz and Wagram, fought by Napoleon. Of all this have I spoken. The heart history of such a conflict, purchased by the life and blood of twenty thou sand men, must be found in the hospitals. It is well known the effect of burnt guspend and excitement is thirst, which added to the loss of blood in the wounded, creates the necessity of a oviving stimulant. In this particular hospital, the physicians were allowing their patients to drink Plantation Bitters, otherwise called S. The article acts upon the stemach and nerves in a most incomprehensible manner, superior to brandy, and without subsequent inpetying reaction. It originated in the West Inles, composed of the celebrated Calizaya Bark, Boot Herbs, &c., all preserved in St. Croix Bum-the S. Y. -1860-X being a secret ingredient, not yet revealed to the public. It is principally recommended for want of appetite, disordered liver, intermitte vers, stomachio difficulties, &c. I understand i
