The mere reading of this resolution created a storm of opposition, and Wm. Linn, Esq., a champion among the "Cops," and a warm supporter of Valandigham, Hughes, Witte & Co., made a vigcrous speech in epposition to any such andorsament. He moved to strike out all after the word "Rasolved," and give the endorsement of the County Club to Hon. Wm. H. Witte, as the choice of the Democratic masses for Governor. wm. H. Witte, as the choice of the Democratic masses for Governor.

Cheers and hisses greeted this preposition—the cheers largely predominating, as it is said the Witte man numbered about five to one.

Mr. Hunter made three several attempts to speak in behalf of his motion, but each time he was cried down by the hissing "oops," and he fasally gave it up in deepair.

An effert was made to get the Witte resolution through, but that falled also upon Hr. Montgomery offering a very conciliatery resolution declaring that the county clint should heartily endorse and cordisily support the nominee of the State Convention. This resolution was adopted, and the club adjourned.

forced. The pistols, of course, were not shipped. In view of facts like these, (which, we are assured, can be fally sustained,) it would seem to be the duty of the War Department, through, their subordinate officers, to make some regulation in regard to the sale of fire-arms. Now that we are to have a new mili-tary department, we presume this matter will be among the first to receive the attention of the General in command. Bank Note Quotations. The "Phillips" Well. Private advices confirm the telegraphic report that the famous well of Phillips, Frew & Co, had resumed the recent affair at Franklin clearly proves.

Again, it is certain that in the recent attack upon the town, they could have learned most of the facts which were of importance to them concerning our fortifications.

Again, the spies appeared very anxious to get on to Nashville, declaring they must reach that point last night. They further said they were going to Canada and Europe, and were connected with the Inspector General's office, and this, mere than anything slee, excited suspicion against them. The obvious inference is that they were seeking some little information of a personal nature concerning our troops at Franklin, merely for eachling to Nashville and further North.

I incline to the opinion, which I find entertained here by others, that they were contested in the addition to the advantages to invalid, that they were contested to the point of the facts which were contested to the provise and the contested provided by law.
