# LOCAL INTELLIGENCE.

## From Yesterday's Evening Gazette.

### Letter from the Army of the Potomac.

We are permitted to make the following extracts from a private letter, written by a brave officer in the 12th corps, Army of the Potomac—one as apt with his pen as he has proved himself to be ready with his sword—the hero of "many a well-fought field," our quondam correspondent "Derby," of the first three months' campaign:

"While the sun shines as though its rays were intended to go through it fully, and while we walk, as we have done for more than a week, for the approach of the rains, I thought to occupy a few moments by pencilling an epistle.

"Our present position, (Kelly's Ford,) is, perhaps, one of the most sweeping on the whole line of the Rappahannock. The advantageous position, for artillery, which the one bordering river, are all on this side; the river is narrow, and the roads converging are abundant and good. Fairfax and this, it is like every other portion of Virginia—half waste by contending armies, no forces to be found, and the few houses remaining, dismantled and in ruins.

"Previous to the breaking out of the rebellion, this had been a point of considerable importance, if one may judge from the ruins of various mill sites, which are visible within a scope of half a mile from my quarters. The immense race which confines the water to some half a dozen manufacturing establishments, has been constructed with a great deal of care, and a very considerable expense. It resembles quite a large canal. One portion of the work had been excavated through solid limestone, which must have cost immense labor, and may be considered a work of some magnitude. But war's desolating hand has rendered useless the labor of years, and many months would be required to render any part of the ruins available for manufacturing purposes. The water privilege alone cannot be destroyed; nature has made it so permanent that, should our generation, through folly or crime, neglect to guard and use it, the next may step in and grow useful and rich through its agency.

"The whole course of the Rappahannock abounds in magnificent water power, sufficient in every mile to put in motion the most powerful machinery. The country bordering the river has been excellent for grain growing, or grazing, and nothing but the curse of slavery, and the indolence which naturally arises from that condition of society, has prevented this from becoming one of the wealthiest and most prosperous portions of our country. Were the same natural advantages presented in the middle or New England States, cotton, woolen and flouring mills would be found from its source to the Potomac. Has nothing late received attention but raising negroes for a Southern market, and barely enough grain and stock to keep body and soul together. Should this war close now, and the few remaining slaves continue in bondage, the Virginia negro-growers would find it difficult to procure meal for the first crop.

"Contrabands are beginning to arrive in small bodies, so slowly, however, that it will be a long time before the ranks are full. * * * I begin to think that patriotism at home is all "humbug," and that the loudest-mouthed are in nothing out the way of duty, are by far the most careful of their self-skins. Well, a fellow is a fool who will carry a musket and make a target of himself, if he can get off for three hundred dollars. I hope every drafted man will be able to get off; then the war will come to a dead halt, which it ought to, if all the able-bodied at home do not consider their country more valuable than their cowardly lives. We can do nothing without men; we cannot get men; therefore, we will do nothing. Then the newspapers and people will curse the administration, the generals, and the army, for the very state of affairs brought about by themselves. It is an exceedingly comfortable way of storying on the war—sitting in a parlor, counting-room, or cartshop, blowing about what ought to be done, or what has been accomplished by our army."

### Trade on the Mississippi.

A correspondent, writing from Vicksburg, on the 8th inst., says:

"The pressure to get the trade restrictions on the Mississippi river taken off, or greatly modified, does not seem to have been very effective as yet. Nearly every steamboat arriving here brings goods that the people would gladly pay enormous prices for, but which are remorselessly confiscated by the authorities and turned over in mass to the Medical Purveyor. Sutlers are our only merchants in the good city of Vicksburg. They charge all who deal with them at a furious rate, but have a hard time of it nevertheless. A bottle of bourbon, nicely stowed away in packing goods, or a little informality about permits, and away goes the entire stock in trade, sparkling, while looking around among the steamers at the wharf, I came upon a fresh importation of Israelites, people, I guess, of twenty in number, who were conversing in a style so animated as to attract my attention. They had with them enough goods here with high hopes of getting "much marketing," that their invoices were all regular and straight; their appointments as sutlers to various regiments were recent but genuine; their goods were very nicely packed, and everything seemed regular enough. But a Government detective with his eye to business, had followed the party from St. Louis and just sprung a mine upon them. One bid shabby bottle peeked in plain sight; another had quietus and morphine concoctions by gay up in something which looked very like patent medicine had opium imprinted in the cut; chewing tobacco, and it required a keen eye to detect the fraud. Still another had several bolts of "Confederate gray," and twisted to a boy with lemons. And then it was with every bottle, package, and bolt of goods in the store. These goods that the owner had his complaint about taking the money of any man who would buy, irrespective of political opinions, and that he was enterprising enough to at least attempt the procurement of such articles as his customers would desire. The detective kept over a particularly good one. At the bottom and top of a barrel they put genuine potatoes. In the centre was the best imitation possible, with here and there a severed piece of tree to make up the difference in weight. Imagine the consternation of the proprietors of these transparent little friends when they learned that a detective had been confident of all their proceedings, and that the greater portion of the stock must retire from trade for awhile, to surrender to a jail built by some of their Confederate friends and sustainers.

"Gen. Grant's policy in reference to trade seems to be to confine it exclusively to citizens. He refuses permits to general and general trade. Citizens down this way must get their supplies of every kind from the army—either from the Quartermaster's Department, or from those who are permitted to trade with the soldiers in camp."

### The Ninth Army Corps.

We have already announced the re-transfer of the veteran Ninth Army Corps, from the Department of Gen. Grant to that of General Burnside, to whom it originally belonged. An army correspondent thus alludes to the return home of the corps at Vicksburg: "Upon the arrival of the corps, it was ordered to camp about Sayd's or Kirk's mill on the Big Black. In conjunction with a portion of the Army Corps, under Gen. Washburne, and with Gen. Osterhaus' Division, it kept Johnston in check for a long time; and observed particularly the fords, ferries and crossings, with a view to prevent his army from Jackson. While it was thus the corps, to Gayle Hawes' as an encouragement and, the opportunity to exhibit its military evolutions to the people who were very much astonished at them, and very much pleased, many ladies, and even children, who witnessed the sham fight, the manœuvres, and the marching and counter-marching, and expressed it as their opinion that they had never seen the like before. Many of the officers formed part of the funeral procession of Secretary Chase, and the injection of many Philadelphia beaux of Western men.

Running on a Railway.—On Friday Mr. P. Keagle, residing in the western part of Pennsylvania, was killed, at one of the tracks of the Pittsburgh, Fort Wayne and Chicago Railroad, by attempting one of the feats of agility in which he delighted. He undertook to run on the railway cars, and the passengers were much amused at the exhibition of his skill, but when he attempted to jump from the rear car to the platform of the depot, he fell, and the wheels passed over his body, killing him instantly.

Home from the Front.—Mr. John Gormley, son of James M. Gormley, of Allegheny, arrived here on Monday from Florida. He was in Beckham's 3d Pennsylvania Cavalry, and during the last year of the war, was a prisoner in the hands of the rebels. Mr. Gormley's return to his old home in the North

### Rescue of a Steamboat Captain.

A correspondent, who has lately had some experience on the Mississippi river, thus "compliments" the steamboat captains on that important stream:

"The longer one has to do with the Mississippi River and its inhabitants, the more fully he learns one cardinal truth—which is, that if he is in a hurry to get either down or up the river, he had better take the first boat that comes, no matter if one twice as fast is advertised to leave an hour after, or no matter, neither, if captain, clerk, agent and everybody he meets encourages that she is twice as fast, and is going to leave at the time specified, for these steamboat men are most consummate and finished liars. They will solemnly protest that they are going to leave at six in the evening when they know they cannot possibly leave before eight the next morning. They will put you off with the most frivolous excuses, and, though you may catch them in the lie, they will bear it out with great effrontery and indifference. In fact the only sentiment they seem to feel is—what a fool you were to be caught by such stuff." Sense of honor they have none, and to sense of duty except that which arises from a fear of pecuniary loss. I have known a steamer tie up within fourteen miles of Cairo, and lie there six hours, in order to arrive after the Illinois Central train had left, though the cowards had expressly agreed to connect with that train. Of course the passengers for St. Louis, rather than wait twelve hours in Cairo, would continue on the boat to St. Louis, while those for Chicago and Cincinnati might rush their thumbs. It is not a wonder that so many river men are Secessionists—they are thoroughly imbued with the fundamental principles of the Confederacy."

### Unprovoked Assault.

This morning a cripple, named Peter Jules, made information before Alderman Donaldson, against Felix Conway, proprietor of the Old Oak, Chester, drinking saloon, charging him with an unprovoked and painful battery. The prosecutor had gone in to get a drink, and asked Conway to drink with him. Conway remarked that Jules had not been there for some time. Jules replied that he had been there on Sunday. This Conway denied, and offered to bet five dollars to one that Jules had not been in the house on Sunday. The bet was taken, and both parties laid the money on a table. The six dollars were then taken by a girl in the back room, to hold until a decision was made. Jules then went out and got a witness, who had seen him in the house on Sunday. On seeing the proof, Conway got angry, called Jules hard names, and struck him first with his fist and then with a club, inflicting a very severe scalp wound upon the top of the head. A warrant was issued, and Conway was arrested, but he had not yet had a hearing.

Stealing Frocks.—Hannah Duffy has been committed to jail by Justice Stevenson, of Birmingham, charged with trespass on oath of Mary Herbert. The allegation is that she entered the premises of the prosecutrix for the purpose of stealing peaches. She and her husband, Anthony Duffy, are also charged with surety of the peace, on oath of John S. Nevin. Being unable to give bail, they were both committed for trial.

Western University.—This well-known and deservedly popular institution, affording thorough instruction in all the preparatory and collegiate studies, under a full corps of able professors, will commence its Fall term on September 1st. Those who intend to enter it are earnestly requested to be present at the commencement of the term, that they may be well classed.

Decision of the Provost Marshal General.—The following is an important decision of the Provost Marshal General, in reference to the enlistment of drafted men: "If a drafted man has enlisted and been mustered in to any regiment previous to being drafted, he is not to be considered a substitute—if subsequent to his being drafted he enlists and is mustered into any regiment, he is a "substitute."

Removal of Teachers for the Fourth Ward School.—The board of Directors have made the following transfer of teachers for the ensuing year: Principal, Mr. J. B. Tetmall; Grammar Department, Mrs. Oliver and Miss J. E. Moore; Intermediate Department, Miss Lizzie Martin and Miss Mary Stewart; Primary Department, Miss Lizzie McKnight, Miss Mary Ward and Miss Rachel Crooks.

Bodies to be Exhumed.—We learn that an arrangement has been effected between the Trustees of Hillside Cemetery and the congregation of Disciples of Christ, worshiping services Lodile street, near Jackson, in the Second ward, Allegheny, to have the bodies buried therein exhumed, and removed to Hillside Cemetery, for re-interment. The work will be commenced on the first of September.

Alleged Larceny.—Lawrence Gorman, residing in North alley, Allegheny, lodged complaint against Mrs. Richardson, who occupies a part of the same house, charging her with the larceny of $45. Gorman alleges that he had $55 altogether, and that Mrs. Richardson, while pretending to count it over for him, managed to make way with $45 of the pile. She has not yet had a hearing.

Capt. Shanley not Drowned.—Capt. Shanley, who was reported to have been drowned off the steamer Allegheny Belle, while on the way from Wheeling to Marietta, has turned up at Parkersburg, alive and kicking. He did fall overboard, but succeeded in swimming ashore. He is in the habit of walking in his sleep, and was asleep when he fell overboard.

Affairs of his Wife.—Michael McGill, of Allegheny, entered suit before Mayor Alexander, charging his wife Mary with surety of the peace—threatening to "hurt his feelings," etc. On hearing both sides, the Mayor decided that Michael was in the fault—that he had no cause for alarm—and he was consequently sentenced to pay the costs.

Committments.—George Power, for assault and battery on John F. Snider, and Daniel Stewart, for surety of the peace, on information of Francis Dalpey, have been committed to jail to answer—the former by the Mayor, and the latter by Alderman Butler.

The Saturday Evening Post.—The Number of this well-known and long-popular Philadelphia weekly, for the 22d inst., may be obtained at J. P. Hunt's, Masonic Hall, Fifth street.

Finished.—The stone foundation for the new City Hall, Allegheny, is about finished, and the door frames are being put up preparatory to the laying of brick.

How the Mad.—John Jackson, mentioned as having been concerned in a fight, on Monday, is not John Jackson, of No. 19 Water street.

Frederick's Ladies' National Magazine.—The September number of this popular monthly is now out, and may be had at J. P. Hunt's, Masonic Hall, Fifth street.

The Times (Pict.)—The Boston True Flag for next week, will be found at J. P. Hunt's, Masonic Hall, Fifth street.

ESTABLISHED 1760.

PETER LORILLARD,

SNUFF AND TOBACCO MANUFACTURER,

16 & 18 CHAMBERS STREET,

(Formerly 69 Chatham street, New York.)

Would call the attention of dealers to the opinion of his customers, viz:

BROWN SNUFF:

Macaboy, Fine Maccaboy, Rappee, American Scotch, Demigros, Fine Virginia, Machine-dos, Dupee Rappee.

YELLOW SNUFF:

Scotch, High Toned Scotch, Irish High Toned or Lemon Scotch, Honey Dew Scotch, Fresh Honey Scotch, French Rappee.

The Subscriber is pulled by the large reduction in the cost of Plug and Twist, allowing that quality to be sold at the former low prices.

TOBACCO.

Cavendish, Long, No. 1, No. 2, No. 3 and 4 mixed, Shorts.

Fine Cut—Virginia—F. C. Jos, or plain Cavendish, or Scrap; Sweet Scented Cavendish; Mr. Fine Cut.

Smoking—A large assortment, Canaster, Turkish.

N. B.—A factor of price will be sent on application.

UNIVERSAL CLOTHES WRINGER.—The best that is made. Call and examine before purchasing elsewhere. Guaranteed to give satisfaction. For sale at the India Rubber Depot of J. & H. PHILLIPS,

Nos. 46 and 48 St. Clair street.

SUGAR CURED HAMS.

100 tubs No. 2 Mess Beef in Kegs for Cincinnati;
50 " " " do do do plate Beef;
100 " " " do do do Shoulders;
50 " " " do do do Clear Sides;
100 bbls. Extra Family Flour.

In store and for sale as

COOK, PETTIT & CO.'S,
No. 72 Second street.

# LATE TELEGRAPHIC NEWS.

(FROM OUR EVENING EDITION.)

## SITUATION IN EASTERN VIRGINIA.

## Rumored Advance of Lee's Army.

## PROPER DISPOSITION OF OUR FORCES.

## Heavy Firing Heard in the Direction of Fredericksburg.

## BATTLE EVIDENTLY IN PROGRESS.

## Demoralization in Lee's Army Confirmed.

## STUART'S CAVALRY ROUTED BY REVOLTED REBELS.

&c., &c., &c.

New York, Aug. 18.—A Tribune special says: Deserters report the movement of Lee's army in the direction of Dumfries, for the purpose of flanking Meade on the left. Scouts report, however, all quiet as to any movement. The rebels are engaged in throwing up earthworks. A part of Longstreet's Corps is at United States Ford.

The proper disposition of our forces has been made to prevent any advance of the enemy.

Everything continues quiet, the rumor that Lee had crossed a portion of his forces over the Rappahannock being proved untrue. Every attempt on the part of Lee to advance will be promptly met.

The *Herald* has the following:

*Headquarters Army of Potomac, Aug. 16.*—A contraband deserted from Lee's army yesterday forenoon and came within our lines. He reports that on Wednesday morning the whole of Lee's army, with the exception of A. P. Hill's corps, moved from Culpepper Court House, by Fredericksburg road. He also confirms the stories of the demoralization of the North Carolina, Tennessee and Alabama troops. Those from North Carolina, in Hill's corps, have openly cavalried, and swear they will fight no longer. The Mississippi troops are clamorous to be sent home.

The contraband deserter's story of the movements of the rebel troops is fully confirmed by reports from our pickets.

On Saturday, a large force of rebel infantry and cavalry, with some artillery, made its appearance on the South bank of the Rappahannock, above Falmouth.

Another story is that they crossed at Fredericksburg on Friday night, but I consider the report of their crossing highly improbable.

The news from the front this morning is cheering, inasmuch as it points to the termination of our term of non-action. We are all momentarily expecting orders to put up our shutters.

Heavy firing was distinctly heard, about three o'clock this morning, in a south-easterly direction, namely: in the neighborhood of "Banks' or United States ford, or possibly at Kearny's, at Fredericksburg. The firing is rapid and constant. A battle evidently is going on. Large bodies of troops were moving yesterday, marching by rail—and that our advance has come up with the enemy, may safely be inferred from the noise this morning.

A Washington special to the *Herald* says that this morning the enemy made a demonstration on the left of our army, and a heavy cannonading ensued for some time. No intelligence concerning the results reached headquarters this day, but it is believed the movement was nothing more than a reconnoissance in force, for the purpose of feeling our position.

Lee's army is reported to be moving in a south-easterly course, and there can be no doubt but that the region about Culpepper and Gordonsville will soon be entirely evacuated by the enemy.

The *Times'* special says Markt, the deserter from Lee's army, came down the Valley by way of Staunton, Harrisonburg, and Strasburg. He saw but few troops on the way.

The fight at Snicksville was between detached portions of different regiments. The Georgians and North Carolinians deserted, bringing with them their arms. They stated that Stuart's cavalry and Fitz Lee were rapidly recruiting. The general Western produce market and all interests connected with it, are now unsettled, in a state of chaos. Unfortunately there are no means, no resource, to absorb the edibles or breadstuffs now offering or seeking a market. We do not know of a planter who is in a position to stand on the lowest price which may follow the present stock of breadstuffs and subsequent receipts, which will of course lead to 9 cents a consistency of all kinds.

FLOUR—The supply is very liberal, and with the probability of further receipts there is no demand for round lots, and sales cannot be effected even at a material decline on the late current prices. Dealers are supplying the retail demand, which is confined to a few packages new and then, at $7.25@7.50 and $8 for good and choice superfine, and $8.50@9.50 for extra.

There was no active demand for gold and silver. The former ranged from 125¾ to 127½; the latter at from 127¾ to 130, though there were reported transactions at less rates by 1 to 2 per cent., but not sufficient to warrant them as general quotations. The Exchange matters was feeble. The counter rates for checks on New York ranged from 1-32@¾ and 3 per cent. premium was generally the answer of paper dealers, whether city currency or green-backs. There were no changes at the banks which were drawing in what they could at the rates quoted, worthy of quoting. Sterling was steady. Small sums at 67@67.50 the pound, and larger, 142@145, up to 150. One bank was selling at 140 on London, and 4.50 on Paris for green-backs and its own notes, another bank, 138 and 4.75 for its own notes only.

### Pittsburgh Petroleum Market.

Aug. 18.—The market for Crude has been unexpectedly dull to day, and holders, to effect sales were compelled to make a concession of 3@5 ₱ gall. We note a sale of 400 bbls in bulk—measured in boats—at 25¾c, and 500 bbls at same figure, packages returned. Toward the close of the day, buyers did not feel disposed to offer more than 25c, while holders asked from 25½ to 26c. Refined has been unusually quiet during the past two days, without, however, any material change to notice in rates. Good standard brands of bonded may be quoted at from 48 to 49c on the spot, and 52@55c for September and October delivery. Refined, free, is held at 52@53. There is nothing whatever doing in Benzine.

We learn from a reliable gentleman just from Oil City, that the pond fresh on Friday was one of the most successful of the season. It was estimated that from 12,000 to 14,000 bbls of oil came out on the fresh, and, strange as it may appear, not a single boat was in the least damaged, nor a single barrel of oil lost.

### New York Petroleum Market.

Special Dispatch to the Pittsburgh Gazette.

New York, Aug 18, 1863.

There is an active demand for Crude, with sales on the spot at 48@53c; 60@53c for September seller's and buyer's option; 60@61½c for October, and 60@65c for November, buyer's option.

Refined, in bond, is steady with sales on the spot at 62@63c; 60@53c for September seller's and buyer's option; 60@61½c for October, and 60@65c for November, buyer's option.

Refined, free, unchanged at 61@62c. Naptha is dull at 16c for Crude, and 19@21c for Refined. C.

### New Orleans Commercial Report.

Aug. 8.—COTTON—There is none on sale. Next Tuesday 400 bales will be offered at auction. The last sales were made a day or two since at 52½ ₱ lb for middling.

SUGAR & MOLASSES—We did not learn of sales of any moment to-day. Small lots from store may, however, be quoted at 9@9½c for good common, 10¾@10¾c for fair, and 11@11½c for fully fair to prime Sugar. By auction 23 bbls prime sold at 11¾@11¾c. The last sales of Molasses were at 57½c for good fermenting from first hands, and 60c for common from speculators.

The most important feature to-day is commercial circles, blended, of course, with monayed connections, was the arrival on the levee of a steamboat from St. Louis, or the Mound City, with a full and assorted cargo of breadstuffs and other Western products, but with very few meats or provisions, excepting live stock to be converted. Following the announcement of this arrival, there was a great commotion in the produce market, as well as in Western products. The receipts from New York and Philadelphia anterior to this arrival had overstocked the market, and prices were rapidly receding. The general Western produce market and all interests connected with it, are now unsettled, in a state of chaos. Unfortunately there are no means, no resource, to absorb the edibles or breadstuffs now offering or seeking a market. We do not know of a planter who is in a position to stand on the lowest price which may follow the present stock of breadstuffs and subsequent receipts, which will of course lead to 9 cents a consistency of all kinds.

FLOUR—The supply is very liberal, and with the probability of further receipts there is no demand for round lots, and sales cannot be effected even at a material decline on the late current prices. Dealers are supplying the retail demand, which is confined to a few packages new and then, at $7.25@7.50 and $8 for good and choice superfine, and $8.50@9.50 for extra.

There was no active demand for gold and silver. The former ranged from 125¾ to 127½; the latter at from 127¾ to 130, though there were reported transactions at less rates by 1 to 2 per cent., but not sufficient to warrant them as general quotations. The Exchange matters was feeble. The counter rates for checks on New York ranged from 1-32@¾ and 3 per cent. premium was generally the answer of paper dealers, whether city currency or green-backs. There were no changes at the banks which were drawing in what they could at the rates quoted, worthy of quoting. Sterling was steady. Small sums at 67@67.50 the pound, and larger, 142@145, up to 150. One bank was selling at 140 on London, and 4.50 on Paris for green-backs and its own notes, another bank, 138 and 4.75 for its own notes only.

### Baltimore Coffee Market.

Aug. 18.—Some 100 bags of Rio have been taken during the past week, chiefly for Western account, on private terms, but understood to be at 37@38c for fair to prime quality. Havana of either description is first hands.

### Boston Fish Market.

The market for Codfish is firm at 6½c; light receipts and small stock. Mackerel—Small sales at 25 @ 27 for No. 1 Bay of Shore; small sales at 20@22½ ₱ bbl. Sales have been made of Shore No. 1 at 20@22½; No. 2 at 17½@18; No. 3 large fish at 15@16; small fish at 12½@13; Shore No. 2 at 17@18; and Bay No. 2 at 15@16. Salmon is in good demand, with sales at $4.50@5 ₱ bbl. Good Pickled Herrings are in demand; sales at $4.50@5; 500 bbls at $5.50@6.

### Boston Cotton Goods Market.

Aug. 18.—There has been a fair demand for Cotton Goods the past week, but the steady advance in cotton has kept the market in an unsettled state, and prices still rule unsteady. Sales of Print Cloths have been made at 30c cash, and 31c for 60 days. Sheetings are in good demand, and prices are firmly maintained. Shirtings are in fair demand, and prices are steady. Corsets are in good demand, and prices are firmly maintained. Ticks are in fair demand, and prices are steady. Denims are in fair demand, and prices are steady. Stripes are in fair demand, and prices are steady. Plaids are in fair demand, and prices are steady. Checks are in fair demand, and prices are steady. Jeans are in fair demand, and prices are steady. Flannels are in fair demand, and prices are steady. Blankets are in fair demand, and prices are steady. Carpets are in fair demand, and prices are steady. Oil Cloths are in fair demand, and prices are steady. Rugs are in fair demand, and prices are steady. Mats are in fair demand, and prices are steady. Matting are in fair demand, and prices are steady. Curtains are in fair demand, and prices are steady. Shades are in fair demand, and prices are steady. Fixtures are in fair demand, and prices are steady. Hardware are in fair demand, and prices are steady. Tools are in fair demand, and prices are steady. Implements are in fair demand, and prices are steady. Machinery are in fair demand, and prices are steady. Engines are in fair demand, and prices are steady. Boilers are in fair demand, and prices are steady. Pumps are in fair demand, and prices are steady. Valves are in fair demand, and prices are steady. Pipes are in fair demand, and prices are steady. Fittings are in fair demand, and prices are steady. Gauges are in fair demand, and prices are steady. Meters are in fair demand, and prices are steady. Scales are in fair demand, and prices are steady. Weights are in fair demand, and prices are steady. Measures are in fair demand, and prices are steady. Containers are in fair demand, and prices are steady. Packages are in fair demand, and prices are steady. Boxes are in fair demand, and prices are steady. Barrels are in fair demand, and prices are steady. Kegs are in fair demand, and prices are steady. Bags are in fair demand, and prices are steady. Sacks are in fair demand, and prices are steady. Bales are in fair demand, and prices are steady. Cases are in fair demand, and prices are steady. Crates are in fair demand, and prices are steady. Baskets are in fair demand, and prices are steady. Hampers are in fair demand, and prices are steady. Trunks are in fair demand, and prices are steady. Valises are in fair demand, and prices are steady. Bags are in fair demand, and prices are steady. Satchels are in fair demand, and prices are steady. Portmanteaus are in fair demand, and prices are steady. Knapsacks are in fair demand, and prices are steady. Haversacks are in fair demand, and prices are steady. Canteens are in fair demand, and prices are steady. Mess Pans are in fair demand, and prices are steady. Kettles are in fair demand, and prices are steady. Frying Pans are in fair demand, and prices are steady. Coffee Pots are in fair demand, and prices are steady. Tea Pots are in fair demand, and prices are steady. Sugar Bowls are in fair demand, and prices are steady. Cream Pots are in fair demand, and prices are steady. Spoons are in fair demand, and prices are steady. Forks are in fair demand, and prices are steady. Knives are in fair demand, and prices are steady. Razors are in fair demand, and prices are steady. Scissors are in fair demand, and prices are steady. Shears are in fair demand, and prices are steady. Clippers are in fair demand, and prices are steady. Combs are in fair demand, and prices are steady. Brushes are in fair demand, and prices are steady. Mirrors are in fair demand, and prices are steady. Looking Glasses are in fair demand, and prices are steady. Picture Frames are in fair demand, and prices are steady. Engravings are in fair demand, and prices are steady. Lithographs are in fair demand, and prices are steady. Photographs are in fair demand, and prices are steady. Daguerreotypes are in fair demand, and prices are steady. Ambrotypes are in fair demand, and prices are steady. Tintypes are in fair demand, and prices are steady. Cartes de Visite are in fair demand, and prices are steady. Albums are in fair demand, and prices are steady. Stereoscopes are in fair demand, and prices are steady. Views are in fair demand, and prices are steady. Slides are in fair demand, and prices are steady. Lenses are in fair demand, and prices are steady. Cameras are in fair demand, and prices are steady.
