Congress has the power to regulate commerce between the several States. If you send a cargo of wheat from Chicago to Buffalo, a distance of 1000 miles, crossing lake after lake, stretching away in their magnificent length, would not one milorally think that this might be called Commerce? But no, that is a mistake, we are told—What is it then my brother! Why that is Trade (a laugh). But if you send the same cargo from New York to New Orlean, what is it then '—Well, then it is Commerce! Why is it not in the first instance as well as the last! Oh it is not one salt water (a laugh). The besed contlerence would notice this nice on salt water, (a leugh.)

He begged gentlemen would notice this nice distinction between Commerce and Trade. If we are engaged in business upon salt water, it is Commerce.
