

MISCELLANY.  
ON SEEING AN INFANT SLEEPING  
ON HIS MOTHER'S BOSOM:

"I lay upon its mother's breast, a thing  
Done as a favor, when it was demanded,  
To give the infant of his bosom a rest,  
Where every limb of health-keeping finds.  
Had not vital eyes, that, 'neath each lid  
Had closed upon them, like bright water,  
When its small dimpled hands were silly hid  
In the warm bough that nestled them."

There was a bairn in that young mother's eye,  
Lit by the feelings that she could not speak  
From her lips—so full, so full.

Straight the bright traces on her infant's cheek,  
While she and then with melting heart said,

Sot times over its red and swelling lip,  
Like the young murmuring bee the honey drew,

It was a fragrant eve; the sky was full  
Of burning stars, that tremulously clear  
Shone on those lovely ones, while the low lull  
Of falling water all upon the eves."

And the new moon, like a pure shell of pearl,  
Encircled by the blue waves of the deep,  
Lay 'mid the fleecy clouds that love to eart  
Around the stars when they their right keep.

My heart awoke, as I gazed upon  
That youthful model, she had seemed to me  
With her head bowed, as if she had shrinken'd on  
The look of grace on her gentle breast;

For a sight that angel ones above,  
May stop to gaze on from their bower of bies,  
When innocence upon the breast of Love,  
Is erasured, in a awful world like this.

From the American Messenger.  
Something More Wonderful than the Mag-  
netic Telegraph.

The wonderful invention of the Mag-  
netic Telegraph has been attended with  
such astonishing results, as to lead per-  
sons to say that nothing hereafter is to  
be doubted.

It is more wonderful than the fact  
that an important piece of intel-  
ligence can be communicated from the  
city of New York, at noon and the same  
instant, to the most remote parts of our  
country!

A number of people have visited the  
Telegraph stations in various cities and  
villages in our different States, and have  
gone away exclaiming, "When will won-  
ders cease?" Surely this is the crown-  
ing wonder of all wonders.

George and Anna Bates had often  
desired to visit the Telegraph office. They  
had heard of the strange doings of this  
wonderful machine, and had often stood  
and looked at the wire stretched along from  
one high post to another, seeming like cobwebs in the  
air.

One day, as they were thus occupied,  
George asked Thomas, "What could  
that on those wires unseen message  
be passing to and fro? 'I don't know  
how it is,' replied Tom, 'but it is some  
sort of language of electricity and  
lightning is electricity, and that is the  
reason news travels so quickly by the  
Magnetic Telegraph."

One day, after school, these boys went  
into their father's study, where they found  
the Telegraph office, and, instead  
of him, it was the boy's father who was  
asleep on a sofa, as kind as to take  
them to see this wonderful invention.

Their father was not so occupied as to  
prevent his granting their request, and  
he was always glad to gratify his chil-  
dren, and, as he took the stock of useful information, he took them by the  
hand, and the next moment they were by the  
side of the agent, looking at the performance of the little instrument  
that noted down intelligence like a living  
thing.

The boys entreated their father to  
send a message to their uncle in Wash-  
ington. "This he consented to do, but  
the little machine was so busy that the  
agent had no opportunity to receive any  
message from him."

The boy's father, on clicking his fingers,  
was sure it must be a great deal more  
difficult to remember than the alphabet  
of A B C.

The little boy, who they thought  
should be spared in the watching the  
magnetograph, but after they had been  
there had been a real alarm, as the  
father told them it was time to go home.

They went over to their father's store,  
and soon all walked home with their  
boy, who had been to see this wonderful  
invention.

In the evening the boys could talk  
nothing but the wonders of the Magnetic  
Telegraph. "It is the most wondrous  
thing you ever heard of, father!" said  
Thomas.

"No," replied his father, "I have  
heard of things more wonderful."

"Yes, father," said George, "you never  
heard of any message being sent so  
quickly as by this means, have you?"

"Yes, I have, my son."

"And you're in answer as quick  
as you added Grace."

"Are you earnest, father?" said  
Thomas, drawing his chair close to his  
father, and looking up at his face.

The boy's father had more trouble  
than he could possibly imagine in  
answering him, but he did his best.

"So that is improvement," said  
George, "for we had to wait a long time,  
you know."

"And in the next place," continued  
his father, "there is no need of wires,  
or machinery, or any machinery, to make  
a mode of communication of which I  
speak; and that is more wonderful than  
all the rest that you need, even  
to express the nature of your com-  
munication. And when we do you an  
answer, though it is quite  
surprised that you truly and sincerely ob-  
tained a favorable reception for your  
request."

"Besides all this, the plan of com-  
munication, of which I speak, is  
to all others, than the fact that you need  
no particular place to send  
your messages. As is the lonely desert,  
the ocean, the mountain top—by night  
or day—in sickness and health, and es-  
pecially in trouble, and affliction, the ap-  
plications can never be all  
the number that the simplest desire of  
the feeble child, properly presented, shall  
not meet with immediate attention."

"We there are a case published of  
this kind, of communicating your wishes?" inquired Thomas.

"Yes, there is, my son, and I hope  
your interest will not be diminished  
when I tell you it is to be found in  
the Bible, father!" exclaimed both  
boys.

"Certainly, my sons, and if you will  
both get your Bibles, I will tell you  
where to find the passage confirming  
what I said."

The children opened their Bibles, and  
from their father directed them to the  
twenty-fourth verse of the fifty-sixth  
chapter of Isaiah, which Thomas read  
as follows: "And it shall come to pass,  
that before they call, I will answer; and  
they that are speaking, I will hear."

ROBERT HORN, Philadelphia,  
March 12, 1847.

PHLADA. ADVERTISEMENTS  
PHILA. & BOSTON. NEW YORK AND ST. L.  
REAGAN, 1113 Chestnut Street, Phila.

**REAGAN'S** established but Scrubby, Knick-knack  
Cabinet, Cupboards, Old Silver, Utensil  
Case, Grypticons, Old Boxes, Utensil  
Case, and other articles, to which  
the public are extremely fond, and  
which are especially for Contractors.

The principal part of the handsome Railing  
at Laurel Hill, Monmouth, and other celebrated  
Caskets in the city, are highly esteemed by the  
public, and particularly for Contractors.

We the undersigned contractors, for the  
last year, have placed the largest stock  
of ready-made iron stoves, stoves and ornate  
furniture, states, with an extensive variety of  
furniture, wrought and cast Iron Ornament, suitable  
for Railings, and other purposes.

We have also a large quantity of  
furniture, of the most complete systematic  
style, for Contractors.

ROBERT HORN, Proprietor,  
Philadelphia, March 12, 1847.

HORN'S MANUFACTORY OF IRON  
AND BRASSWARES FOR CONTRACTORS.

THESE MANUFACTORIES ARE FOR  
CONTRACTORS AND TRADESMEN.

AS WE ARE LOCATED IN THE  
WILLIAMSBURG SECTION OF PHILADELPHIA,  
WE ARE IN POSITION TO EXCEDE  
FOR THE CONSTRUCTION OF  
THEIR HOUSES.

DR. DERN, & NICHOLS,  
Manufacturers of  
AWHRS, HANGING BOTTOM  
STOOLS, SWINGING CHAIRS,  
OF ALL DESCRIPTIONS.

WE HAVE IN STOCK  
SOFT AND HARD  
FURNITURE.
