MEDICAL.

CHILD BIRTH.

SIX SCIENTIFIC AND CELEBRATED REMEDY.

FROM relieving the pains and dangers incident to Pregnancy and Child Birth, which deserves the many and unprotracted process of the functions of woman which Nature, when reinforced by the leanness of civilized life, intended should be performed expeditiously, with little pain, and without subsequent indisposition.

Dr. Bordeloque during his travels in Asia, observed this remarkable fact. That the women of those countries are peculiarly different from all other nations as objects of no such anticipated suffering and risk. Curiosity and the zeal for Scientific discovery truly prompted him to investigate the cause of this extraordinary exception to the severe trials to which the married females are generally subjected, and the result was the discovery of the fact that the women of those countries were in the habit of using during the last stages of Pregnancy, certain gums which have the faculty of imparting that degree of tone and elasticity to the nerves and blood vessels of the uterus, or Womb which enables it to perform its functions in all their native simplicity of action and freedom from pain.

It is a singular fact, also, that the Indian women of North America are in a remarkable degree free from those pains and dangers of pregnancy and child birth to which the white women are subjected. Whether they use the same plants as do the women of Asia we cannot tell. Certain it is that the fact is no less remarkable than true.

This Remedy is now extensively used throughout France with the most marked success and many females who were once single through apprehensions of the dangers consequent to the state of marriage are now by the use of this medicine, performing the duties of wives and mothers with comfort and safety.

It is at this time now first presented to the world of America, by Dr Bordeloque, the discoverer of the same, Dr A C MORTIMER, and he feels confident that independent of its intrinsic merits it will recommend itself to the moral part of the community, as it is fully calculated to do away with the horrid crime of which some, through fear of pain of child birth, are guilty, (the production of premature delivery.)

This medicine is also remarkable for removing that hitherto incurable disease Barrenness, and its almost constant accompaniment Flour Albus, a fact that retired and ladies state of the Womb which accompanies this disease is never felt after the shortest use of this medicine.

This medicine is prepared in such a way as to be perfectly agreeable to the taste.

Dr A C MORTIMER, No 36 1-2 Lispenard st, New York, has been appointed sole agent for the United States, by Dr Bordeloque, and is the only person in this country who is authorized to vend this invaluable medicine, as the following letter will show:

(Translated from the French.)

PARIS, June 10th, 1847.

DR A C MORTIMER—Dear Sir—According to the agreement entered into between us, I wish by this letter to give you that written authority to sell throughout the United States, (my Remedy for relieving the pains and dangers incident to pregnancy and child birth,) which it is necessary for you to have to satisfy the public of its genuineness. I have no doubt as you are aware the exposure of the medicine to the influence of the air, or obliged me to send it to you in air tight vessels. I have the honor to remain, with a specimen of the manner in which it is put up in Paris. In the manner I should wish it to appear in the United States. Sir, with great respect I remain yours,

F E BORDELOQUE M D.

P S. I also send you a copy of a letter received by me from the Royal Academy of Science, in Paris.

(Translated from the French.)

Paris, Jan 29, 1846.

To M. BORDELOQUE—Sir—The commissioners of the Academy have appointed me to examine into the merits of the remedy had before us by you (for relieving the pains and dangers incident to pregnancy and child birth.) We have accordingly met and decided upon reporting to the Academy the results of their experience in the use of your remedy; we have now to say in relation to you, believing it to be the best way to express our opinion in the most concise manner, that the decision regarding its claims to distinction, and of its general use, rests entirely with the public. Your obedient servant,

M. DUMAS, Sec'y.

Commissioners—Messrs. Double, Magendie, Serres, Breschet, Pelouze, Dumas, Secretary.

Certificate of Physicians.

Dr Townsend:—To all whom this may concern—This is to certify that my wife used one bottle of your Remedy for relieving the pains and dangers incident to pregnancy and child birth, and that in less than one hour after taking it, she was delivered of a healthy child, and that without any pain or suffering whatever. Whatever influence this body may possess on the members of the profession will depend on the profession of this remedy into general use. Should this result not follow, we shall be disappointed in the hope we have long entertained, that the introduction of this remedy into general practice would be productive of much good to the community at large, and to the female sex in particular. Yours respectfully,

BENJ D MILLER, M D.

Geo E Stanton, Esq.

☞ Among the mass of worthless articles and Nostrums that are poured forth at the present day throughout the country, it is really refreshing to find upon the country, it is really refreshing to find something of real practical utility, something like life, speedy and effectual in its operation, and at the same time free from those injurious effects which generally attend powerful remedies, Hunt's Lung Balsam, prepared by Chas. E Stanton of Sing Sing, though it has been but a short time before the public, has already obtained the confidence, not only of our most wealthy and influential citizens, but of our most talented physicians. All acknowledge it to be a panacea in fact as well as in name, and that the disease should manifest itself, that cannot in the course by JAYNES' ALEXANDRIA WINE and Hunt's Balsam be entirely relieved, and in many instances almost instantaneously. Those afflicted with Coughs, Colds, Asthma, Consumption, Spitting of Blood, Pain in the Breast, Hoarseness, Croup, Whooping Cough, Influenza, Bronchitis, Sore Throat
