PATENT PRESS BRICK MACHINE

The subscribers have obtained a patent, May 16 1845, for their Machine for making Brick, and have been fully tested in ability, are now prepared to sell rights and contract to deliver machines to any part of the United States. This machine will make 30,000 Brick from crude clay, and will make 50,000 good sunnet firm brick per day, sufficiently hard to stack up in the kiln without burning, saving the time and labor of preparing the clay, drying and handling the brick after being moulded. It is simple, strong, not liable to get out of order, and requires but little power to work it. Those who have seen it in operation, pronounce it the best machine in use. We will refer to a machine now in successful operation on a Mill creek bottom, near the Western end of Eighth street, where any person in want of a machine can be connected with it to all who may call.
