PATENT PRESS BRICK MACHINE

The subscribers having obtained a patent, May 16 1846, for a Machine for Pressing Brick, and having since shown sufficient its ability, are now prepared to sell and construct to deliver machines to any part of the United States. Each machine is designed to make Brick from clods clay, and will make 30,000 per day, with proper clay, sufficiently hard to stand up in the kiln; thus avoiding delay and labor of burning the brick to dry, drying and handling the brick after being molded. The simple, strong, not liable to get out of repair, and is constructed so that it can be put in a piece and put together with great facility, thus rendering it portable. We are now building machines, and can furnish them on short notice. For full description we would refer to a machine now in successful operation at Mill creek Furnace, Allegheny, West end of Eighth street, where we shall be happy to explain every thing connected with it to all who may call. We have at present an assortment of Agent. All letters to our address will be promptly attended to
