Up to the time when this french Demagues arrived in Charles-ton, our constry was nearly free from that pari-ean spirit which has since couruled it to its cen-tre. The people uniallounced by the clamors of upprincipled demagogues and levellers; had, as was just, the most unbounded confidence in the administration. Into a country penceful and happy and whete peace alone should ever reign, the spirit of party was infused by few aspirants for place, who formed themselves into societies, to reaches the republic, which they falsely said was endanger-ed by 'the pride of weath and arrogance.' of power thus charging the Administration of Wash-ington, with designs and inclustions inimical to the welfare of this country, which, the services of Washington and his estimate, in a great degree had nebused and secourd. Soon store Citizen Genet's arrival, demoratic societies which ao foully itbeled the immortal foun-ders of the Republic, began to increase repidly, and to make bead among the people. In Philadelphia, they were out of water, and it was surfar model. They started by saying that a constant circula-tion of useful information, and a likeral communi-cation of republican seatiments, were the best ac-tichers to any political poison with which the vital principles of civil likerity might be attacked. The first organization of democracy was made in oppo-sition to Generaly Washington, and it has been continuud against his principles to the present day. The "republican" seatiments (faightood) then discentiated have been repeated by "Post" and "Unions", unil, by repetition, they, have ac-quired a hold upon the country, that continually works to the disadvantage of the Republic. If the people of this country prefer anarchy to civil likerty, guarantied by law, they will spurn all French example, and endeavor to bring the coun-try back to the principles of Washington.
