JOURNAL.**

No. 55, Diamond Alley, a
small, dark, quiet place.
DR. W. M. BROWN, having been
regularly educated in the medical
profession, and been for some time
engaged in the practice of medicine,
had attention to the management of
those private and difficult com-
plaints, for which his opportunities
and experience peculiarly qualify
him. His skill and knowledge, the result
of those complaints, fitting him
and more practice, and his cureless pro-
pensity to fall to the lot of any private prac-
titioner, qualified him to offer cures in cases
of all kinds, and all stages of existing disease,
and, as a result, he has
cured almost every case
which he has had of any disease, and
has been able to do so radically and thor-
oughly, by having given his careful attention to
each case, and succeeded in hundreds
of curing persons of "diseases" of the
head, neck, and kidneys, disease which often
causes death, and which others
have given up as hopeless and
despairing. He particularly recommends
and successfully treats by spheres
and magnets, which every practitioner will give
a chance to test in a careful, thorough, and
scientific manner, and which he has
independently tested, which it is impossible to find
any general practice of medicine, to give any
cure, or to remove any disease, if he does not
use them. — Dr. Brown also writes per-
sons who have been unable to get relief
to this disease, and who have been referred
to him; also Piles, Fatty, etc., speedily cured.
Now, — Dr. Brown is
an expert in
the treatment of diseases living at a distance, by
writing, giving advice, and in
conjunction with the practitioner, by
BROWN, M. D., post paid, and enclosing
a sum of \$1.00, —
Diamond Alley, opposite the New Every-
day, —
Boston, —
Dept. 12.

This image shows a vertical strip of severely damaged film. The surface is covered in numerous small white specks and larger, dark, irregular smudges. Two distinct, dark, irregular marks are visible near the bottom right corner. The overall texture is grainy and mottled.
