Among the speeches, was one by Mr. Mooney, who said he had attended many meetings in behalf of Ireland, and this was the greatest of them all-(Cheers.) The press of Britain tries to make little of the patriot force, says but eight or ten Counties are engaged in it, but the press of England keeps back the fact that each County in Ireland holds as many people as some of the States in America.

Ms Mooney then read the following statement of the population of the proclaimed Counties:

Total. 3.380,000
Suppose half of these are males, 1,690,000; half of the males are between the ages of 16 and 45 945,000. Allow England for place-holders and agents, 145,000, there will remain 700,000 fighting men in Ireland, [Tremendous cheers.] Mr. Mooney-then ridiculed the English press for magnifying the moremum of a few companies of soldiers. ey then ridiculed the Engunu process of soldiers—the movements of a few companies of soldiers—from one post to another, and said—he had proposed to a few of his countrymen in this ever clouded city, to form an Emigration Company for Casada. To the Editors of the Pittsburgh Gazetis:

As if it were not enough that the Free Trade Tariff, was breaking down all the fighties in the country, poor Penasylvania, it seems, has been doomed to a further blow from her own Legislature. The Polk and Walker law discriminates against the American manufactures 95 to 30 per cent; and the ten bour law adds to this 16; per cent, more against Penasylvania interests abuse, if the manufactures in the Eastern States, where every thing is conducted with the best economy, cannot sustain themselves against foreign competition under Polk and Walker's Tariff, by running their machinery 12 hours, how can those of Penasylvania, with the addition of our States Tariff, stand it?
