.Mr. Van Buren is opposed to the principles of the Tariff of '42, which are a system of specific duties; the only system which will afford any real protection. It is the system of ad valorem dutirs, which is the principle of the Tariff of '46, which is the chief objection we make to it, and not to the rate of duties. Under its operations, enormou facturer has little or no protection at all. Under system of ad valorem duties, goods are entered at otion goods at our Custom House, entered at 2d. per yard; but added significantly that he never sole such goods in Manc our that such frauds are committed, and or

But what kind of a Tariff, under the present necessity lard upon him, would Mr. Van Buren give us? He says—"a Recente Tariff"] This is the name of Messra. Polk and Walker's Tariff—the Tariff of '46. Will Mr. Van Buren give us a better? Is it not highly probable he would give us a better? Is it not highly probable he would give us a Protective and become, if it would yield more revenue. Revenue is all he looks to, not the protection of American labor. He would not give us a Protective Tariff of specific duties, such as that of '42, for he tells us he is opposed to "both its principles and details." He would give us a Tariff discriminating for Revenue and not Protection, such a one as we have already, which is producing wide-spreading ruin to our manufacturing interests, and which is daily developing its baneful effects.

In the most favorable view of the case, the best Tariff we could hope for from Mr. Van Buren, would be such a Tariff as the present. And what is to become of our mechanical and manufacturing interests under its operations? Already nearly half of the manufacturing establishments of the country are idle. Pennsylvania his ments of the country are idle. Pennsylvania his receipts of canh at the Custom House for the week just closed, have been \$506,000, representing 5,500,000 of imports, a maount very consolidation to make the work of the strength of cash, and more for time week just closed, have been \$506,000, representing of the last six months, to a ruincus extent. Blooms can hardly be sold here. Pig Metal has retrograded for the last six months, to a ruinous extent. Foreign Iron is coming into the country by ahip loads, every; pound of which takes away employment from an American artizan. The Coal business in the eastern parts of the State, is suffering under a frightful depression. These all are the effects of the present Recenue Tariff, such as Mr. Van Buren or Mr. Cass will continue in existence, if they get the reigns of power into their hands.

I will be death to the war—death to all hopes of getting an acre of territory—death to the Administration, and death to the Democratic party. It was not
so intended. It no doubt originated with proper system of ad caforem duties, goods are entered at a
mere nominal price, and thus a compete with American goods without paying scarcely any duty. We see
it stated in the Philadelphia News, that an English
manufacturer observed lately that he had examined
mere party and selfish views for abandoning the cause of Francos. The Proviso, right in principle ignificantly that he never sold and "originating with proper feelings," must be ester at less than 10d! It is sacrificed because it would be "death" to all hope getting more Slavery Territory! Will you, Sons of den may well be proud.
