Of these three great leading staple production

of 481,469 bales as compared with last year. The total exports during the same period are 1,201,997 bales, of which 654,693 bales were shipped to Great Britain. 140,985 to France, 151,807 to the North and South of Europe, Mexico, &c., and 2,202,039 to United States porta, including 1500 bales to Western States. The increase, as compared with last year, is 268,715 bales to Great Britain, 40,245 to France, 70,887 to the North and South of Europe, &c., and 92,538 to United States porta. The total receipts at all the Atlantic and Gulf ports, up to the latest discreceived—as shown by our General Cotton Table—are 2,325,150 bales, against 1,707,461 bales to same dates last year; shown an increase of 557,647 bales. This amount, however, it should be understood, does not represent the total crop of the United States, as the grand result cannot be attained until full returns up to the fast September are concentrated at one point. The duty of making up the total crop has broad be understood, does not represent the total crop of the United States, as the grand result cannot be attained until full returns up to the fast September are concentrated at one point. Sugar—With respect to the growing erop, it seems to be generally conceded that the prospects for a large yield are by no menus as finitering as they were at this period last year. The Stubble, or Rattoon Cane, is represented in many sections to be almost an entire failure, and the Plant Cane generally is said to be less nearer to maturity by some weeks; thus rendering the liability to damage by frost more imminent. It is true there has been a considerable increase of cultivation, particularly on Red river, some of the Upland Parishes and in Attakapas, but it is supposed that other adversa

In regard to a market for the coming crop, we are under the impression that the prospects are in favor of a higher average than was realized last year, even with a very full yield, as the requirements of our own country are constantly increasing, while the product of several of the West India islands, which has heretofore been brought into competition with our own staple, is likely to be reduced to a comparatively unimportant amount by the voluntary abolition of slavery on the part of the home governments, and by servile insurrection. The same causes will reduce the supply for the European markets, and a stable arrangement
