AN IMPORTANT INVENTION.-The Republican has been shown the model of a furnace, (for which a patent has been taken out,) for the purpose of making malleable iron from the ore It seems to us to be an invention of very great impor-tance to iron manufacturers, calculated to produce a saving of \$40 per ton over the present mode. It is the invention of Mr. Lorenzo Seibert, of Shenan-

loab county, an experienced, manufacturer, Rangerion or Wases at Lowell.—We learn from the Boston Republican that notice has been given at Lowell that a reduction of wages will soon take place. It is to commence on the 20th of November, on one corporation, and probably at the same time an the others. The reduction is considerable, 25 to 35 per cent. The speed is to be reduced, and the girls are to be made to tend more looms.

The Richmond Va.) Enquirer has declared that Gen. Taylor might have avoided his last great battle. To be sure he might. He would have avoided it if he had only taken his advice of the administration and the Washington Union and run away. Possibly he might have run away when he naw Santa Anna's twenty thousand veterans bearing down upon his handful of volunteers, but probably the old man was a little absent mipded and never thought of it—Los.
