From the Lowell Journal.

From the Lowell Journal. Wages of Manufacturing Labor in Eng-Ma.Ebiros: During the sutumn of 1647, I visited Europe; and while is great Britain, spent several weeks in the manufacturing districts. I was admit-rel with the internation of the Line for the several set in force on the several several several several set in force on the several several several several several set in force on the several several several several several set in force on the several severa weeks in the manufacturing district. I was admit-ted with entire freedom to the Linen factories at Belfast, ireisal; to the Machine Shops and Cotton Factories at Greenock and Giaggow, in Scotland; to a large Woolen Factory at Leeds; to several of the Machine Shops and Cotton Mills at Manufa-ter; to a Large Woolen Factory at Leeds; to several of the Machine Shops and Cotton Mills at Manufa-ter; to a Large value of the Shops at Sheffield and Birmingham. All the processes in the several manufactures were abown to me, ghd all on yinguries were answered without reserve, and to my entire satisfaction. The rate of wages paid to the operatives, and the could not overlook! I was uniformly attended by the proprietor or man-ager of the factory; and the information received was immediately noted in my memorandum-book, from which I take the following parjectuars regardfrom which I take the following particulars regard

In the vages paid. In the Linea Mill at Belfast, wages from 11d, to 13d. per day; average 6s. a week, equal to \$1, . In the Cotton Mills which I visited at Greenock

In the Cotton Mills which I visited at Greenock and Giasgow, in Scotland, wages ranged from 4. to 82 6d. stering a week; average not over 75. 6d. In the large Woolen Mills at Leeds, wages range of from 9a to 10s. sterling a week; average not over 9s. equal to \$2 16. In the two best Cotton Factories T visited at Man chester, one of them spining fine Lees Thread from 0s. 200 to 5.400, and the other spining No. Mule Twist, the average wages paid to men, wo-men and children, as given me by the proprietors; the proprietors informed me, that their rate of was reso mills much the best clothed and the to fixer two mills much the best clothed and the to fixer Britala. As another test of the cost of labor, I ascertainged As another test of the cost of labor, I ascertainged the set of operalives I saw in any factories in Great Britala.

As another test of the cost of labor, I ascertain As another test to the coil of habor, a meerianice from the proprietors themselves, who, in some in-stances, submitted to my inspection their private weekly minutes of cost, that No. 40 Mule Twist was produced and parked for market; at a cost of 24 per pound on labor. And this embraced me-chanics and all other labor employed about the es tablishment all other some the source of the source

tablishments. Skilled labor is also much cheaper in Manches-ter than in Lowell. In one mill, much larger than the new mill of the Merrimack Company, I was the new mill of the Merrimack Company, I was informed that the bead overlooker, having a general experimizendence of the whole mill, received B15 a week, equal to \$240 a day, and the oversetre of particular rooms from 27s to 30s a week, equal to \$106 and \$120 per day. My general conclusion was, that labor in Cotion manufacture in Manchester, was at least 33 per cent and in the Woolens at Leeds at least 30 per cent, and in the Woolens at Leeds at least 50 per cent, and in the Woolens at Leeds at least 50 per cent, and in the Woolens at Leeds at least 50 per cent, and the service of the service of the service at Lowell. Shoulders 22 to 25s; Canvassed by the previous showing of high prices must have have 3d to 42s: Mass Reef 40 to 45s: Prime 18 to been well remunerated. The same writer on that subject says:

subject says: -The quality of the best brands of American beef are much approved of. The desirable points being to have the color a bright pink, the pickle clear, with a good capping of Turks Island or oth-er coarse estit; the coarse pieces, necks, shanks, dec, as acaree, and the meat as fat as possible. In addition to all these, "the weight (marked on the cask) correctly put into every lierce." The evil effects of careless or fatse economy in this schemistic of careling of applied They refer to the glass and even this city generally respecting the quality W & M MITCHFLTREE, 160 liberty st

novi The evil effects of careless or false commy in this selection of quality and mode of packing, is strikingly made apparent in the heavy stock of pork now on hand at Liverpool, chiefly of an in-ferior grade, and is thus represented— "The high prices made in 1867 for prime mess strikingly made apparent in the heavy stock of pork now on hand at Liverpool, chiefly of an inferior grade, and is thus represented.—
 "The bigh prices made in 1817 for prime mess pork meeting a surplus production of bulk bacon: at the chief packing points, seem to have induced many packers simulaneously to commence making prime mess pork out of bulk bacon; the result has been, that there is now in this market a 5000 ba rrels called 'prime mess pork', but which is unall cable as such, and must be taken of slow-ity for ir eland to compete with 'coarse meat' or 'offal'. A really good article of 'prime mess pork' cut into four pound pieces from hogs not exceeding is 180 Bits to 200 Ba, cured only in pickle, to be of a bright pink' course, packed with clean eller pickle, and with a good capping of coarse sall, will always find a ready sale, and such an article will often touch 65s to 70s; at present the latter price could be readily had.
