EXHIBITION AT PHILO HALL. Mr. Stephens exhibits at present, in a series ctures, the minute objects of nature and art magnified with the oxy-hydrogen microscope.— We understand his instrument to be one of the to a million of times in area. He has shown many specimens of insects from various parts of the world, besides those he preserved himself, from our own neighborhood. The structure of the interior own neighborhood. The structure of the constitution of plants, invisible to the asked eye is most instructive, and his own selection of minute ferns and mosses, shows that a part of the world generally neglected by our senses, has beauties which compare with the most magnificent specimens of the tropic zone. Mr. Stephens' explanations added, to the largely magnified cryptogamous plants, and the schibition of double interest, giving as musement and instruction. The living world contained in liquids is shown by the higher power of the tained in liquids is shown by the higher power of the instrument—it developes an organic creation of the case, should be understood, and the ments of the case, should be understood, an of plants, invisible to the maked eye is most insenses, and would very likely have escaped all vation, but for the high cultivation of the This is one of the many cases where animals into a number incomprehens ble, without taking the millions of the same kind We have seen vinegar containing a cheese mites, although small animals, we have no composition of water, is most beautiful—we see ubbles escaping from the poles of the gal vanic battery, magnified to an enormous size, raeing over the fourtsen feet screen. The fine arts ored in the magnificent paintings, shown

he chromatrope highly interesting. of these exhibitions, for we never had an opportu nity of seeing the elegancies and instructions of science better displayed than in these illustrations

The great feat performed by the telegraphic lines under the superintendence of Mr. O'Reilly, in transmitting the President's message, with such autonishing correctness, for such an immense disdiciting the commendations of the press The gentlemen who wrote out the measage at Baltimore, we learn from the American, were Messrs Reddish & Hough, or Philadelphia, connected with Mr. O'Reilly's line. To give our readers some idea of the hercules. labor performed in this great feat, we may mention that the paper on which the telegraphic signs were made, in the Pittsburgh office, measur seven thousand two hundred feet in length!

We take this opportunity of expressing our ad displayed by Mr. Rano, in the Pittsburgh office in which he is ably assisted by numerous young genilemen, necessary to discharge all the duties of sit night and day, in perpetual session. he extensive establishment. So delightfully does every thing work, that there is nothing wanting in this mode of transmitting intelligence. Would that we could say as much for the mails.

Speech from the President Elect. GEN. TAYLOR AND THE VETERANS OF 1814-15.— Agreeably to previous arrangement, says the New gallant survivors of 1814-'15, yesterday waited up on Gen. Taylor, at the St. Charles. After being introduced to him, he was addressed on their part, by Judg Bermudez, in a short, but eloquent and apriate speech, to which General Taylor, in reply,

That he was deeply gratified to receive the present had been paid to him by his fellow-citizens, but that he felt especially gratified to receive the present mark of kind attention, from the valiant, and now aged veteran survivors of the glorious battle of the 8th of fanuary, 1515. He said that he had not been a candidate for the Presidency of his own ascord, but he had been placed in that situation by the voice of the people, who, he supposed, had made him a candidate from the belief that it might be in his power to bring back the Government to its original purity.

and purity.

Now that the fact of his election to that exaited station had been definitely settled, he felt himself-not otherwise interested than to perform the executive danes in faithful comformity to that beautiful system of government framed by the wisdom and

not otherwise interested than to perform the executive dates in faithful comformity to that beautiful
system of government framed by the wisdom and
patrictum of our ancestors, and presided over of
eight years by him who stands distinguished and
beloved, before all others living or dead, as the
"Father of his country."

On his own account he had nothing to gratify but
a feeling experienced by every patriotic cittzen, for
the advancement of the prosperity of the nation and
the happiness of the people. All he could promise
was the faithful discharge, to the best of his ability,
of his daty to the constitution and the country, and
if, in the performance of it, the expectations of those
who had elected him should be realized, he would
be more than greatly repaid for all the labor and
anxiety which he should have to encounter.

After again returning thanks for what he called
the "undeserved honors" paid to him, he proceeded
at once to mingle, in the most cordial manner, with
the heary-headed men by whom he was surrounded, and on whose beaming faces there was the
most unmistakeable evidence of the warm gratidication they felt at the manner of their reception
by the glorious hero of Buena Vista.

Gray Taylors, the President Elect, has con-

by the glorious hero of Buena Vista.

Gen. Taylor, the President Elect, has consented to visit the city of Nashville, in Tennessee, during the present winter, when on his way to the seat of government, and expects to reach that place some time between the 1st and 15th of February. This visit to the State of Tennessee has been promised by the General, in reply to an irrestable invitation from a public meeting recent by held at Nashville, and which was presented to Gen. Taylor at New Orleans by a committee of gentlemen deputed from Nashville to proceed thather for that purpose.—Nat. Intel.

House yesterday for California, with an

A New York letter published in the Philadel

WARHINGTON CORRESPONDENCE-We introduce o our readers into morning, a washington correspondent, who will serve up a daily treat of the "sayings and doings" at the National Capitol. "Ju-

For the Patteburgh Gazette.
The contest now raging at Columbus, is one no serely of local, but of general concern. Every citizen of the University of the Columbus and Columbu tizen of the Union is deeply interested in triumph of law and order, in every section of

triumph of law and order, in every section of the country, and we are all bound to understand the grounds of every controversy before we express an opinion on its merits.

The question in Ohio seems to be whether the Legislature has the constitutional right to separate Cincinnate from Hamilton county, in the apportion ment of Representatives.

The constitution says, "the representatives shall be apportioned among the several countries according to the number of white inhabitants in each."

Again it says, "representatives shall be chosen an-

mach."

Again it says, "representatives shall be chosen an unally by the citizens of cach county respectively."

This certainly seems to forbid any election by the citizens of the country respectively. in this State, Philadelphia elects representative

In this State, Philadelphia elects representatives, but there is a provision in the constitution, that "representatives shall be chosen by the citizens of the city of Philadelphia, and of each county respectively."

But it may be thought that the Legislature could create a new county out of Cincinnati and some adjoining townships, and give it representatives. This, however, cannot be done, because the constitution of Ohio provides that no new county shall be created out of an old one, so as to reduce the latter to less than four hundred square mites, nor shall any new county of less than that extent be established.

It does seem to me that the Whigs of Ohio are clearly in the wrong, if I understand the matter, and I throw out these suggestions to elect uncersion.

tities of the State, all law-abiding critices another carry out its requirements. The Whigs of the Ghio Legislature, we think, therefore, are in the right in insisting that the law, as it stands, shall be carried out until it is repealed, or declared a nulli, cheese mites, although small animals, we have no doubt are able to destroy large quantities of that nourishment. The chemical experiment of the law but the one in question, by which Hamilton county can be represented, all others having been county can be represented, all others having been

man in outsiness show in the message, was accomplished by the purchase of United States five per cents at from 95 to 95 per cent in this city. The expediency of this is rather doubtful. Shrewd dismoiers generally redeem loans made at a high rate of interest, with the proceeds of loans made at a cheap rate, and it is left for Mr. Walker to discover the advantage of borrowing at six per cent, to pay loans made at five, due four years hence. Events will show that Mr. Walker has been active in endeavoring to advance government stocks so as to enable the takers of the loans to make a profit.

The divorce case of Fanny Kemble Butler excites no little attention here, not only from the shifting of the counsel engaged, but from the reputation of the lady, who retuses to be divorced from her husband. The lady's now at the Irving from her husband.
