great scarcity of vessels and consequent high treights will have the inevitable effects to fill up our ports with all sorts of English and Canadian craft. Indeed, some of these latter have already inside their appearance at the wharves, and others are announced as coming?

At Boston, several wealthy gentlemen, in the south part of the city, are about employing thirty young men to go to the guld region. The capital invested in this enterprise is made up of subscriptions from the proprietors, of some varying from 1,000 to \$5,000 each. The persons employed are to receive for their labor and time a certain portion of the profits at the expiration of a term of years. The ship Montreal cleared at Boston on Thursday for California and the Sandwich Islands. The ship Pharnalia, for San Francisco. The latter with one hundred and fifty passengers, and her manifest is seven feet long.

In Maine, the bark Subote was to sail from Belfast, on Thursday, with a large number of passensers for the gold region, and will go through the Straits of Magellan.

The New Bedford Mercury ass—The ship

a company of about sixty, will leave that place on the lat of February, for San Francisco. The gold manua prevaile extensively in Texas and several persons have left for California.

Later from the Sandwich Islands. California Trade.—Mutiny and Horrible Massacre at Sea. The New Orleans Picayune, of the 21 st. inst., has

by the way of Mexico, a copy of the Friend, pub-tished at Honolulu, of November 1st—two months later than former advices.

The California fever continued mightily, and a total of 20 vessels is given that had already sailed for the gold regions, well freighted, and with about 300 passengers, exclusive of natives. Twenty seven more were up. At the latest dates received at Honolulu, it was supposed that 6,000 people were at work digging for gold in California.

Whale ships have been uncommonly successful the past senson, and 41 were lately in the harbor at one time. Several of them have taken over 3,000 harvies. later than former advices.

Many officers and seamen are leaving for Callifornia.

A lump of Callifornia gold was recently brought to the Islands worth \$73.

The News gives a long account of a horrible mutiny and murder at sea, October 3d, on board the British sohr. Amelia. Three Spanish American sailors were the perpetrators, and their victims—first, the second mate, Kitano, then the Spanish Captam, Alva, and a passenger named Cook. The English master, McNally, being well armed, and refusing to surrender, they agreed (after getting possession of the veasel and frightening the remainder of the unarmed crew into submission,) to put him adrift in the gig, with Mrs. Cook and her servent, Mary Hudson; but the moment he came on deck they treacherously threw him overboard. The following night, however, a Hollander, a Norwegian. a Portuguese, a Freachman and a Spaniard, concerted to recapture the vessel, and were successful. The Hollander, whose name is John Smith, killed, the three mutuneers, and took command of the vessel. The vessel was then navigated to Sandwich Islands by an English apprentice boy, sixteen years old. The two females on board, arrived sale, &c.

There was 136 bags of silver on board the Amerlia, and two bags of Doubloons.
