eat of romantic fictions into the shade. Love, abundance, and revenge were the inciting causes to the fearful tragedy.

The history of this bloody affair is, in brief, as follows.—Not many years since, Captain John Howard married the daughter of a physician residing is Montreal, Canada. They lived together in apparent happiness and admestic comfort for some time in this city; but difficulties occurred, not necessary here to name, and the parties separated—the wife taking the two children, a boy and a girl. Not long after the separation, Capt. H. obtained the two children by violent means—having no recourse in the law—and placed them in charge of a friend in Kentucky, at the same time an application for a divorce was peading in a court in that a friend in Kentucky, at the same time an application for a divorce was peading in a court in that

In pursuance with hasty verbal notice, the citizens of Loudonville and vicinity convened at the Baptist Church, on Thursday, the 25th day of January, 1894, for the jurpose of deciding upon the course of policy they should pursue; relative to the course of policy they should pursue; relative to the course of the Chic and Papenguivenia Rail

course of policy they should pursue; relative to the construction of the Ohio and Pennsylvania Rail Road.

On motion, Hon. GEORGE H. STEWART was appointed chairman, and Dr. C. Sarr, Secretary. By resolution, N. Haskell, Eaq. E. B. Feller and Samuel Loyd, were appointed a commissive to draft and present resolutions for the action of the meeting.

During the absence of the committee, the meeting was addressed by John M'Cormick, Eaq. in his meal happy manner, giving a detail of the disadvantages consequent upon the want of said railroad, and the many advantages that must consequently result from the construction of a general thoroughs fare from east to west, through the counties of Columbiana, Stark, Wayne, Ashland and Richland, and thereby securing to the citizens of the West and thereby securing to the citizens of the West and searer route by which the trade of the West can reach a choice of three markets at any season of the year.

After the address, the committee reported the following resolutions, which were read and adopted unanimously.

Resolved, That in the opinion of this meeting, the future agricultural and commercial prospers by of this region of the state will be vestly and equitably increased, by the construction of the Ohio Railroad through the contines named in the charter.

Resolved, That it is the duty of every farmer, merchant, and mechanic and manufacturer to become stockholders according to their means, and thereby aid in the construction of said road, upon the route most available.

Resolved, That the stripus trade that yearly accommisses by means of industry, should urge the dilizens of this portion of the State to bring into speedy operation a thoroughiare running from east to west, by which inducements may be held out to the merchants of the citizens of Ashland county, in the critizens of Holmes

phia and Baltimore, as well as New York, to bid for our trade.

Resolved, That the citizens of Ashland county, in Resolved, That the citizens of Ashland county, in and Knox as may deem it to their interest to cooperate, will raire by subscription stock sufficient to grade the Railroad through the counties of Ashland and Holmes, provided the present surveyed route, by the way of Londonville be adopted.

Resolved, That the thanks of this insecting, and of the public generally, are due to John M'Cormick, Eaq, for his indestingable exertions in obtaining stock for the construction of the Pennsylvunia and Ohio Railroad.

Ohio Railroad.

Resolved, That the proceedings of this meeting be published in the papers at Mansfield, Millersburg, Wooster, Massillon, Salem, and the Pittsburgh Pazette.
On motion the meeting adjourned.

Jonoral Taylor—His retireme The following orders, says the New Orleans Pic syune, of January 27th, announce the final with wai of General Taylor from the military service of the country. Though called to higher and mo duties, we can readily conceive the pain it has cost him to sunder his connection with he army. It is more than forty years since he received his commission from President Jefferson as lieutenant of the 7th Infantry. Never was a milrtary career more perfect in its proportions. In each grade of the service he won honorable dis. n, and the crowning glory of his military lif as not achieved until after he had strained by brilliant deeds the highest military rank known t our laws. Then the people took him up, and they have placed him in a position to develope the great apacities of his nature on the grandest theatre action. The qualities of his mind are of the heroic sort, which adapt men for momentous issues. No shade of distrust disturbs our anticipations that the

These roads are therefore, direct and straight, only excepting the deflection into the South Pass; the distances, roughly estimated, being 1850 miles to San Francisco, and 1,950 to Astoria.

I have stated 120 days as the length of the journey, but parties of young men, having packs and good enimals and guides, may easily reach the Sacramento in forty dive or fifty days; nor need such confine themselves to the wagon road, but may take the route of the Arkansa, or by Santa Fe.

may take the route of the Arkansas, or by Santa Fe.

Independence has been the point selected by the State and National Governments, for the departure of the military and exploring expeditions to Oregon, Mexico, and Califarnia, both before and during the war, and of their return and discharge. Other points higher up the Missouri, as Weston, St. Joseph, and the Mormon settlements near Council Bluffs, have occasionally been selected by emigrating parties. These places have all the disadvantages of being on the eastern bank of the Missouri, and, as yet, far behind independence in the abundance, adaptation, and cheapness of supplies. Allow me to repeat some facts stated to me on my return from the Pacific, in 1844.

The maritime country on the Pacific extends along the ocean from San Diego to Vancouver's Island, and is confined between the anony ridge of the Sierra Nevada and the beach. Its average width exceeds 150 miles—its length 1,200. This Sierra Nevada is the prolongation of the Andes of Chili, Peru Columbis, Central America, and Mexico-preserving all its characteristics unattered, of

Sterra Nevada is the prolongation of the Andes of Chill, Peru Columbis, Central America, and Mexico-preserving all its characteristics unathered, of great height, volcance, volcante rock, and hava—it is grander here than in South America, because, recoding from the coast, it is accompanied by this manutum region, which gives room for a series of fine rivers—the Bonaventurn, San Joachim, Sacramento, Shansy river, the Plameth, Umpqua, Wallamette, Columbia, Puget's Sound.

This whole region, therefore, abounds with the same mineral productions as Spanish America, what it has its own grand excellencies for commerce, agriculture both arable and pasteral induite fisheries, forests, internal mavigation and position between the valley of the Missistippi and China—a delicious and tranquil climate and subhims scenery, make this incontestibly tee finest new country of which the human race has yet any where posacessed itself.

Attention of Parry, Scott & Co., restorday to look at a machine invented by Mr. Pairy for washing gold. The machine is extremely simple in its construction, and without the frames which can be made in a few moments, will not weigh more than twenty pounds. The inventor asserts that three men by the aid of one of these machines can wash out more gold than twenty men can in the ordinary way. From some experiments that have been made with it, we do not doubt the truth of his assertions. On Saturday a couple of pounds of brass fillings, were washed from a cart load of sand, with which it had been mixed in an incredibly short. space of time. See advertisement.
