"Nothing can excite greater astonishment than the obliquity of some few men in our very midel, who avow the most lutter opposition to the inautacturing interests. They belong to the same class of agitators whose vocation it has been to stir up the passions and prejudices of the operatives in our factories, workshops, and reliting initis. And they have the insolute to do it in the name of the Democratic party. We deny their commission. If we can help it, the party shall not the held responsible for their prefuguey. What have they accomplished for the pdry in this countly by this Jacobincal system! Let the fearful majority of 3,500 as gainst us answer. It is well known that, at every yereal and exciting election the influence and policy of our opponents always carry along with them

want our readers to lose—us follows—
"There is another incubus of a still more depressing character reating upon the party. All the Agranum, Fourierites, Socialists, and other lary looking dreamers and whenevers it the community about fosted themselves upon us; and the party has been stumbling along under the weight of their odious and fanatient doctrines. By this cause a very large share of the substantial moral worth, induced send intelligence which of right belong to us, have been driven from our ranks, as embracing materials with which they can have no fellowship. It shall be our endeavor, as far as we-can, to rescue the party from the load of all this fifth and rubbish and to bring back those who have been driven by it from the fold."
What a confession. Had a Whig paper made

What a confession ' Had a Whig paper made such a charge, it would have been called a villain ous libel upon modern Democracy. But coming from a Simon pure Jeffersonian Democratic pape we must acknowledge its truths. It is only what th intelligent and conservative of all parties have these "Agranana," these "lazy loading dreamers and schemere," this "load of fifth and rubbish!" They can find no place, of course, with the "substant moral worth, influence and intelligence," which the Mereury acknowledges is to be found in the Whig Where will they go! We fear they are Locotoco past remedy, and that if all this "fifth and rubbish," and another large class which the Mer cury has not named, which finds its level in the same social category, were thrown off, the Demo cratic party would have dwindled into a sorry in significance. We hope, however, the editor of the Mercury will have brilliant success in clean ing the Augean stable he has so eloquently and thfully depicted; but he has a task so herculear before him, that it might appal even the stoutes heart; and if he does not perish in the attempt, or become so bedaubed with the filth and succui in despair to its influences, and thus become part and parcel of Locofocoism, he will deserve monument more durable than brass.

We have been requested to publish the rejoinder of Mr. Fire; to the report of the committee of the Board of Trade, but as we did not publish the report, it would not be fair to give the reply. The only item we noticed in the report, was the conclusion which the committee came to, that the accident resulted from over-tasking the boiler. This item is not alluded to in the article of Mr. Fife.

We have received Mr. Stevens' reply to Mr. Elliott, in relation to the best plan of education, &c. and expect to give a part of it to morrow. We were unable to supply the demand for Mr. Elliott's review, and we hope if there are any extra copies wanted of Mr. Stevens' reply, they will be ordered

an ourlier day. the basin is an old coal pit-although the wor "chosen" is not applicable in the connection-for the persons having the control of the Water Works had no choice in the matter of the site, the ground ago, and space enough not being on it for the ha sin, without extending over a part of the coal pits.

The second point is the injudiciousness of the course pursued in the work of forming the basin. Here some of the particulars are not correctly sta-

within a few inches of the coal, is laid aix feet above the top of the coal; but the material lying over some of the larger rooms, in the lapse of time, has fallen in to such an extent as to show the tractures in the bottom of the basin. Whether this had been so or not, it was anticipated that all that part of the basin lying over the mined out portion of the bill, would have to be turned over, in order to have all the excavations filled up. When this Mr Mason the moved an amendment, author.

It is well known that, at every great used exciting election the influence and policy of our opponents always carry along with their cation with it, whether at side or bottom—otherwise the great mass of that very description of voterants to whom our aguators address tears were that the whole of the cation with the prosperity of our manufactures, and vote against those who strack them. Such aguators might as well spare their labor—for all they effect is, to bring opprobrium of the party whose name they prostitiste, and to swell the majority against us at each Presidential election."

The names of these agitators will suggest them solves to the mind of every reader who has paid any attention to the passing events of the iast icw years.

The extract which follows is a cruel one—a stab under the fifth rib to some of the most prominent members of the Locofico party:
