The Venesuela Expeditionneed from the steam ship Venezuela, built here America, under the management of Vespasian Ellis, Etq. We are pleased to learn, through th polit eness of our respected townsman, Arrigory Beztan, Esq., whose son, Mr. Fagurgies, A. Beztan, is a member of the expection, that it has been so far highly successful. The steam ship Venezuila makes regular tripa from Puerto Espano, Island of Trinidad, to Augustan, (or Bolicar, as it is now called,) on the Orinoco and sometimes up as ares Nutries, on the Apuro a branch of the Ori nneo. The last letter received by Mr. Boelen. from his son, is of peculiar interest, and he has kindly permitted us to publish the following ex-pract. Our readers will see it is of a late date, and has just been received :

PUZZTO EFFANO, May 10, 1849. Having written to you at great length yesterday, and having but a moment there, before sailing, to devote to you, I have clipped from the Gazette, of this city, an article copied from the Demerara Ganette, of last week, in regarding the newly discovered gold mines, in the province of Guiana. The article is at fault in some respects, which I shall refer to in a moment; but to have who have visited the valley of the Orinodi, logether with that of the lovely Caroni, the discovery of immense gold mines near Upata, has not been a matter of much surprise. I have often heard the Indians on those rivers, and higher up the comparty, telling the tra ditions handed down to the of the existence of the precious metals in man places and what is m re singular still, the places themselves not deeribed generally, but with exceeding accuracy. Boliver that those mines exitted near Upata, but it dicate their precise locality, which he has most admirably done. Dr. Plasserd, with whom I am well acquainted, has given me the particulars of his gold. The former I will give you in my next. The latter are the purest cres chave ever seen. The tegion of country in which the mines lie is, per-haps, unsurpassed in the world for its delightful climate and luxurious vegetition. Though with-in a few miles of the Equator, the constant tem-

in a tew miles of the Equator, the constant tem-perature is that of an American education. The writer in the Demerican Gazette is incor-rect in his placing of the "Frew California." It is not situated near the river Cityonic nor does this rivall and Orinoco rivers, and instead of being five which was prepared for the late telegraphic trial, which was prepared for the Western Law Journal, days, journey from the City of Bolivar, it is only by one of the counsed—authmitted to Judge Monroe, about one. Upata is situated on the very spot of the PEI Dorado of Manoal, so longed for by Sir lows: one. Upata is situated on the vary spot, of all Dorado of Manos, so longed for by Sil lows:

I Dorado of Manos, so longed for by Sil lows:

E Raicigh. You will remiember my long written to you after visiting this section of the America, and from 6 can judge of the all the Hon. The Monroe sitting alone (the Hon. John McKinley being absent.) held in South America, and from h can judge of the air fractions of the place. For my own part, I have nover seen a more lovely country, and, as for the scenery around, why, the denicals of Claude and Salvator might vie with each other to eternity, in Salvator might vie with each other to eternity, in the scenery around, why, the denicals of Claude and Salvator might vie with each other to eternity, in the scenery method i Salvator might vie with each other to eternity, in choosing subjects for their canvass. You will see also an account of a late-extraordinary voyage made by the steamship Verexuels. She is the wonder of the tropics, end those who built her many well be proud of their clibra. And here, let me allude to Mr. Nelson, who with her engine. It is not often you have heard of high pressure engines being used on the Ocean, fet the Venexuela crossed the gulf of Maxico, and Carribean-Sea, in the most stormy month of the prior, and though it is now nearly twelve months since she left the United States, yet so well and shrefully were the bollers and machinery finigged, that not a "single screw has been found loose" any where since, and I think, I can safely (in the thame of the Orinoco Steam Navigation Co.) recommend him to the world.

The Royal British Mail Steamer closes her mails to day, and he and bliged the conclude. I will sail from Trinidad this afternooth for the Spahish Main.

to day, and I am obliged to conclude. I will sail from Trinidad this afternoon for the Spahish Main. Below we give the extricts referred to in the above letter. The discovery of gold Mines in the delightful region of Guiant; thust act as a powerful diversion, to the tremendors; stream of emigration now setting in to California. Venezuela, and the whole region of the Orinoto, is easily accessible from the United States and from Europe, and can be visited with but little risk or fatigue.

The extract with regard to the extraordinary speed of the Steamship Verexuela, and the remarks in the letter, in reference to Mr. Nelson, of our city, who built her engined, must be exceedingly gratifying to that gentlemis, is well as 'to every citizen who feels a natural said commendable pride in the success of our manufactures. We are gratified to learn, that the Company with which Mr. citizen who leets a natural said commendable pride
in the success of our mantifactures. We are grahified to learn, that the Company with which Mr.
Nelson is now associated care at present a contract forzuplying engined for two ocean steamers,
which was no doubt awarded from the fact of the
engines of the Venezuels glying so great satisfaction. These steamers are not intended for the
Orinoco trade, but for some other, and the hulls are
also constructing in this ricinity. A smell stern
wheel steamer is, however, to be sent out to the
Orinoco, to be used in low water, and on the small
atreams. We are promised by Mr. Beelen further
information, from time to sime, of the interesting
country watered by the Osinoco. The following
are the extracts.

We have seen a letter sidenessed by His Excellency, the Governor of Otemoque, a province of
the neighboring republic of Yenevella, to agentle
man in this colony, contining the important for
lidigence of the discovery of ratuable and productive gold mines in the mission or district of Upais,
near the river Uruars, inthe province of Grains,
and at a distance of only five days' journey from
the city of Solivar, consequently, in the immediate
vicinity of this colony. Thei individual to whom
Venezuela is indebted for Statistacovery, if indeed
it can be deemed a subject of congratulation, is a
French Physiciau, Dr. Loviz Plassard.

The particular spot where the miles are stimted is at the foot of a range of extensive mountains not far from the river Lyanuis, a wire which
we need scarcely informivity local renders, intersects a portion of British Saians, and flows into
the steril ord for which we also as president resident, and over which ways the British for some content of the mention of the steamers of the steamers of the steamers of

OUR BOOK TABLE. "The Postical Works of Martin Fatquhar Tupper, including a Thousand Lines, Hartemus, Ger-aldine, and other poems: New York, published by John Wiley."

This nest volume contains the poetical of Tupper complete, in a near, compact form.— The admirers of this sweet poet will be gratified at this acquisition, as the author righty deserves a niche in the tample of fame credited by the rare poets of England. Sold by J. D. Lockwood, 63

Wood Street.
"The world as it Moves." This is a Weekly Magazine, containing 40 large royal octavo pages, of original and selected matter. Its articles are of an excellent class, combining information with anusement, and keeping up the reader with the musement, and resping up the reader with the great world of literature, science, art, and general progress. Its price is \$5 per annum, making four volumes of 520 pages each. It is published in N. York by Lockwood & Co., and edited by William Wallace. J. D. Lockwood, 63 Wood st., is agent

or Pittaburgh.

Goder's Lady's Book, for July, commences a new volume, with rare and great attractions, both in its unique illustrations, and its pleasant and enhis successful efforts to excal in the Magazine line of its class. This is an excellent time to subscribe, and we arppose the proprietor will have no objection to add a few more to his formidable list — Phose who wish to see a specimen of the work, should call upon M. R. Morse, 4th st. who is agent, and through whom it can be received free of ostage.

been permitted to copy the statement of the points decided by the Court, in the late telegraphic trial,

We publish the following letter at the request of one of our townsmen who has some relations in the expedition. The California Company, whose overland journey is described sailed from Philasette of the company of the delphia, on the 1st of February in the brig Thomas Walter for Tampico, thence to take the overland oute for California. Intelligence of the safe arrithe journey will be found in the following inter sting letter from Mr Luther Dock, a menmber ave seen of the successful accomplishment of the overland journey, by any of the recent California companies. It describes, many incidents and scenes f a novel and striking character-

We have at last arrived at the city of Maraiar atter a journey of 53 days across Maxico—a journey which I think I shall never forget. After a the hardships we have gone through, the company with one or two exceptions, are in good health an

horses snor, a day were detained thus it two or three of us. We were detained thus it many towns and villages, exchanging our horses having them re-shod, so that we lost in all about

ten days.
On the 25th of March we left San Louis, and arrived on the 2d of April in Guadalajara, distant about 300 miles, over barren plains, rocky mountains and valkes. This city we left on the 4th Inine and values. This city we left on the 4th of April, and were several days crossing the Mexican Cordilleras. At midnight on the 7th several of us started express for Tepic, where we arrived on the morning of Sunday the 8th, the rest of the party striving in the evening. The distance of Tepic from Gundalajars is about 300 miles, and it is about thirty lengues from San Blas, a scaport town of the Pacific. Here about ten of the whole Camergo Company left for San Blas, where they took passage for San Francisco in a small schooner and a brig.

On the 10th April I left Tepic with the rest of the company We travelled together till the night

the company We travelled together till the night of the 12th, when Capt. Grant, Bingham, and my-self started for the city of Mazatlan. On the 13th of the 12th, when Capt. Grant, Bingham, and myself sintred for the city of Maxatlan. On the 13th B's horse gave out. I then gave Capt. Grant my coit, and he and the guide left us at Equencipa, where we remained till the party arrived. You will think we have done tall riding when I tell you we have travelled one hundred miles a day without changing horses. Grant arrived in El Puerto Maratlan on the morning of the 14th, making on that day 145 miles. That is express travelling for the 16th. I can accreely express to you my delight on first beholding the Facific Ocean. The waves dash on the beach in true Long Branch atyle, and the bathing in the surf is equal to what you find at that pleasant resort.

We have taken passage for San Francisco in the Peruvan harque Fanny, of 500 tons, De Brot, master. She is a fine, large vessel, similar to an American, and De Brat is a fight, you captain, and very obliging. She carries 150 passengers, and will leave on the 22d or 23d. I hope that by the time this reaches you, we will be la San Francisco. We expect to make the passanger in from 25th 30 days, but it may take us 60.

The passengers that left us at San Blas in the schooner arrived here this afternoon is a miserable-condition. Their vessel is very small, and the passengers had not room even to lie down on her deck. Her owners evidently washed to cheat the passengers as she was represented to us at Tepic as bring very different from what she really is.—

The most eager of the company took passage in her before they arrived at San Blas, and were forced to go in ner or lose their passage money. In morny to say that friend W, is cose of those that

with orders for Grant and his guide to attend the General in person. I wanted to accompany him, but he would not allow it, and went himself, returning in four bours from the mountains, and very much pleased with the General and his men.

The next day, when three leagues from Rio Yerde, we met aften of layero's men drawn up in order of battle on the road, armed with iances, &cc. We were eager for a fight, for we could have put them to flight in five miontea. When, however, Grant showed them their General pass, they hade us adien and thondered up the mountain.

Grant, Conster, Blugham, Watson, and Williams all wish to be remembered to you and their friends. I forgot to mention that the accounts from the gold mines are very flattering. Several persons have arrived here with fortunes, and they say the people do not know the value of the metal. It can be obtained by hard work, I am in for it.

I have seen a slab weighing a pound and twenty ounces as pure as possible.

Yours truly,

LUTRIER DOK.

THER POLITICIAN'S LABIENT.
