REPORTED & TELEGRAPHED FOR THE PITTSBURGH DAILY GAZETTE

GEORGIA ELECTION.

PHILADELPHIA, Oct. 4.

The returns which have been received from 93 counties, indicate that Towns, the Democratic Governor, has been elected by a majority of a thousand. The Democrats will have a majority on the joint ballot, in the Legislature.

NEW ORLEANS, Oct. 2.

The men who were assembled at Round Island are rapidly dispersing, their object being either defeated or postponed.

HAVANNA, Sept. 27.

The Spanish squadron had sailed to guard the the southern coast of Cuba. The news of the American and French difficulty created some sensation.

NEW ORLEANS, Oct 4.

One hundred and thirty bales of middling Cotton, new crop, were sold at 10¼.

NEW YORK MARKET

NOON REPORT.

NEW YORK, Oct. 8.

Cottap—Prices have advanced to a little over 1d per lb., on freight to Liverpool—there is not much shipping inquiry for any thing.

Flour—There is a decided improvement in the market to day. Good western and straight brands $5,06; Ohio and similar brands $5,25@5,37½.

Grain—Wheat is heavy and dull. Corn—The market is better.

Provisions—Lard is firm. Sales of prime pork were made at $9,37½; mess, $10,12½.

There is no particular change to notice in any article generally quoted. The weather is very pleasant.

DISPERSION OF THE CUBAN INVADERS.

NEW ORLEANS, Oct. 2.

The men lately assembled at Round Island are rapidly dispersing. Many of them have returned to this city, the purpose for which they assembled having been defeated or postponed.

The Spanish squadron sailed from Havana the middle of last month to guard the Southern coast of Cuba. The standing army is to be increased by 6,000 troops from Spain, which are daily expected.

MARYLAND ELECTION—THE LEGISLATURE.—There was no election for the Senate this year; in that body the Whigs have two to one. The House of Delegates consists of eighty two members, and, as far as heard from, the parties there are divided as follows:

1849.		1847.	
Whig	Dem.	Whig	Dem.
38	31	47	25

This shows a Democratic gain of nine members. The last House of Delegates consisted of fifty seven Whigs and twenty five Democrats. The three counties to be heard from are, St. Mary's, Charles, and Somerset—electing ten delegates, who were all Whigs in 1847. In St. Mary's and Charles there is no regular opposition to the Whig candidates, and it is but reasonable to suppose that four Whigs are elected from Somerset. If so, the Whigs will have a majority of fourteen in the House, and at least seven in the Senate.

The Result of the Maryland Election.

The election is over in Maryland; the result being the choice of fifty-three Whig and three Democratic Representatives in Congress, of a large majority of Whigs to the House of Delegates, and the consequent certainty of electing a Whig to the Senate of the United States to fill the vacancy now existing from that State.

This is doing as well in Maryland as we expected in regard to the representation in Congress, and better than we hoped for, as to the State Legislature. Our expectations, as our readers must have perceived from the tone of our article of Saturday last, were by no means sanguine. We then threw out some hints of the difficulties which will ever attend any Administration coming into power by the overthrow of a preceding one of opposite politics, through the influence of natural causes; first among which are the inevitable consequences of the discharge of the thankless duty of conforming in some degree to the distribution of public offices to the minority of the party expressed in their choice of chief magistrate of the nation; and, second, and perhaps equally operative, is the absence of opportunity for any President, for the first nine months of his term, (unless in case of an extra session of Congress) to do any acts to propitiate the good will of those whose favor is to be won, rather than by the excitement and glare of new doctrines and measures, than by the honest and faithful execution, by the Executive, of existing laws.—The *last* Administration understood all this perfectly well, when, by way of getting up an exalted good will of those whose favor is to be won, rather than by the excitement and glare of new doctrines and measures, than by the honest and faithful execution by the Executive, of existing laws.—The *last* Administration understood all this perfectly well, when, by way of getting up an exalted merit, it put forth its claim of "the whole of Oregon or none," and before it had been four months in office, had projected the war with Mexico. It was not the fault of the late President, that he could not after all, get up a *war fever* in the country. The common sense of the people was too much for him, and would not sustain his measures.

With due allowance for the disadvantages to which we have alluded, and for others of a local character, the Whigs of Maryland have done well on this occasion.

The Union finds matter of exultation, however, in the result of this election, and, complacently attributing it to the idle and very culpable war of sheer and malignant scorn which the Opposition press has waged against the honored citizen now at the head of the Government, tenders its thanks to the Locofocos for the gain of a single Member of Congress in Maryland. It is true that the Whigs had from this State four members in the last House of Representatives, but how many have they therefore had?

In the Congress before the last the Democrats had four out of the six Members; and if they have gained one Member at this election, they have only half recovered (and that by accident) the ground which they had before occupied. As to the Legislative election, they have lost every thing, and are yet ready to thank God and "the Democrats of Maryland" that any body is left in the State Government to tell the story of their discomfiture.

We now venture a prediction: that, when the positive practical benefits of a Whig administration have had time to be felt—that is to say, at the next Congressional election in the same States—the Whigs of Maryland will give to their adversaries a defeat so decisive that they will hardly be able to tell what hurt them.—*Nat. Intel.*
