The Vero.-The velo message of Gove Johnston, returning, with his objections, the A; portionment Hill, passed by the Locoiceo majorit of the Legislature, will be found in our column to day. It presents the most irrefragible argument egainst the bill, which, for its gross inequality, rank figuatice, and tonat A: ice, and total disregard of the direction of mis-legislation. How any man, pretending the least to a character for honor and consistent could have voted for it, passes comprehension. more shameless attempt to gain political powe by a disregard of oaths, honor, justice, and decency was never exhibited, certainly, in this country and ought to cover with lasting disgrace all wh have sided and abetted the nefarious plot. We hope no reader will pass over the un

from the perusal of his message without thanking kim for interposing the veto to prevent so great an outrage, and for the dignified and cogent argu-ments with which he has fortified his own position. There is not now much probability that any Apportionment Bill will be passed, that can receive the specific of the Gasen of the G the majority have shown incommences to be too reckless of honor and justice, and too willing to labor for party ends, instead of for the interests of the Commonwealth, for any one to hope linting thing worthy of acceptation can come from their hands. Let them, then, finish up their business and return home, and leave to their successors who we trust, will be more honest, the task of an send a Locoloco member to Harrisburgh, next wir

er, to misrepresent her interests. BALTIMORE RAILEDAD.—Proposale are adve tised in the Baltimore papers for the letting of that portlon of the Baltimore, Railroad extending from the Bridge on the North Western Turapike, over embracing come 56 sections, and also the eigh sections between the month of Grave Creek and the city of Whatter was the city of the city o

DICHONARY OF MECHANICS, ENGINE-WORK and Ecologies on the mediantes, Events: Work
and Ecologies on the work, which will contain nearly two thousand pages, is intended to be
the most complete one of the kind that has ever
issued from the press in this country. Every important subject relating to the mechanical arts
and to engineering, will be treated of with such a
digree of scientifical and practical information. degree of scientifical and practical information a to enable any one to exercise them to the grantes to enange any one we exercise them to me generally advantage. The subjects will be illustrated by appeared of six thousand engravings, and to remove the sumbers which have already been instead, the publishers have evidently spared no pains or ex pense to render the engravings, clear, distinct, and handsome. Working drawings and description of the most important machines in the Unifer States, together with the results of American in genuity, are very fully presented to this work.

Almost every took relating to the subjects of this dictionary, whether published in England, France make their work as complete and comprehensible as possible. Five number, shave already been issued, and their reception has been so favorable as to leave the rapid issue of the others. It will
