The geographical position of our State, situated upon the Ohlo river, and lying as it were at the door of the Southern plantations, makes it a suitable point for the collection of foguitre and manimized negro slaves; the consequence of which has been a very rapid increase of our negro population, in increase which has much exceeded that of any other free State in the Union.

In the year 1899 there were but 500 negroes in the States of Ohio, Induna, and Illinois, but in the year 1843 they were estimated at 30,000 in the State of Ohio alone. This shows that our colored population has been doubling itself once in every wight years, a ratio of increase which, if continued for fifty years longer, will give us a colored population of over two millions of negroes and mixed bloods.

Those facts alone, we think, present matter of much moment for your consideration, and call for some prompt and decided action.
In the opinion of your pertitioners, one of three hings only is possible. Editor the white people must remove from the State and great in 1910 the negroes: the two mees must ambigamate, we the negroes must be semored.
