Dr Guysott's Extract of Yellow Dock and Sarsaparilla.

PUT up in the largest sized bottles, contains more of the pure Honduras Sarsaparilla than other preparations, and is carefully combined with the Extract of Yellow Dock, the Extract of Wild Cherry, and the Extract of Pip, thus making the remedy most thoroughly concentrated and powerful. Price only one dollar per bottle. At the same time it is perfectly free from all mineral poisons, which cannot be said of any other of the Sarsaparilla compounds. The invalid should beware of poisons. Mercury, Iron, Arsenic, Potash, Iodine, Sulphur, Antimony, and many other mineral and metallic poisons enter into and form the active basis of most of the Sarsaparilla and Panacea of the day. Guysott's concentrated Extract of Yellow Dock and Sarsaparilla does not contain a particle of these dangerous poisons, and can easily ascertain by applying the necessary tests.
The patients may occasionally remove disease, but they do not the blood, and so completely impregnate the whole system with their baneful effects that the first cold, or the least attack of disease, prostrates the patient's strength, and subjects him or her to the most excruciating torture, and renders another cure almost impossible and hopeless. Let no Sarsaparilla preparation alone, and use Guysott's Improved Extract of Yellow Dock and Sarsaparilla, which is thoroughly efficacious, perfectly harmless, and purely vegetable. All kinds of disease yields to its genial influence.

CURES:
Scrofula, Cancerous Tumors, Cutaneous Eruptions, Erysipelas, Boils, Pustules, or Pimples on the Face, Chronic Sore Eyes, Tetter, Scald Head, Rheumatism, Enlargement or Pains in the Bones or Joints, and all Diseases arising from an Impure State of the Blood, Scalding of the Glands, Blotches, Syphilitic Symptoms, Lumbago, Dropsy, Dyspepsia, Jaundice, Consumers, Salt Rheum, Ulcerations, and all long-standing diseases arising from an injudicious use of Mercury, Mercurial Sore Throat, Weakness of the Chest, Fluttering or Palpitation from all other causes tending towards Consumption, Liver Complaint, Female Irregularities, and Complaints, Sore and Weak Stomach, Headache, General Debility, Low Spirits, Loss of Appetite, Night Sweats, Pains in the Side and Bladder, Pain or Impediment in Labor, Chronic Diarrhœa and Disorders, and as a Spring and Fall Purifier in the School, and General Tonic for the Constitution.

A case of Chronic Liver Complaint of fifteen years standing.
The following is an extract of a letter dated March 27, 1850, and is one of many highly respectable physicians, testimonials, which
John Parker, aged 58, have under my care a case of chronic liver complaint of fifteen years, has been suffering from Chronic Liver Complaint, and whose case has been pronounced by the most eminent physicians. I took for him my family, and have found Guysott's Yellow Dock and Sarsaparilla trophy, and am confident that the Yellow Dock and Sarsaparilla will effect a perfect cure. She is better in general health than she has ever been before, and walks or two without fatigue or pain. A year ago she used crutches. I will report the case in due time.
Very respectfully, E. B. PERKINS.
SCROFULA.

It has been remarked, by eminent men, that in the various causes of diseases to which man is liable, there is scarce one of such importance, and of such interest to discover, written on the human system, as scrofula. The various symptoms, the number and variety of organs that it attacks, or its remarkable insensibility and cunning, are all

Scrofula has baffled the skill of the most eminent physicians in this country and in Europe. But there is no case of scrofula that cannot be cured by the use of Yellow Dock and Sarsaparilla," which is proving itself a perfect antidote to the most severe cases of scrofula.

An extraordinary case of scrofula cured by the sole use of Guysott's Yellow Dock and Sarsaparilla. It will be seen by the testimonial that the case was considered incurable, and of a most malignant character for the past eight years, without deriving any benefit, and has been effectually cured by the use of a few bottles of Dr. Guysott's Yellow Dock and Sarsaparilla.
New York, June 7, 1850.

DR. GUYSOTT—Dear Sir,—Being to you a debt which money cannot pay, I am induced to make a public acknowledgment of the benefit I have derived from your invaluable Syrup. I was long afflicted with a terrible Scrofulous disease, hereditary in our family, which commenced on my neck, and, continuing to spread, soon caused my face, ranging into my head and extending all over my face, neck, and lower extremities. I became a disgusting object to look upon. At one time I was a wreck of misery. I was unable to sleep or lie down; and the disease extending into my eyes, threatened me with total loss of sight. Numerous sores, from which a discharge of matter and water kept continually coming out. People avoided me, supposing I had the small pox. Some others infectious disease, and I was completely shunned by my business. I was astonishing I met with such medical advice, and tried different means of relief, but the disease continued to grow worse, until I gave up in despair. I accidentally heard of a package of your Syrup, and, as a last resource, in unwilling for my health, was informed that it would cure at one time in a case a sentence of my own. I got by using two bottles of it was speedily cured. I immediately procured the article, commenced using it, and now, after having used less than six bottles, I am well and able to attend to my business. I cheerfully make this statement for no sort of motive, only to let the afflicted know the efficacy of it, and to make use of the right medicine, and thereby save them much suffering and expense.
Yours, &c. JOHN G. SPALDING.

Cure of an aggravated case of Erysipelas.
The cures performed by Dr. Guysott's Extract of Yellow Dock and Sarsaparilla are lasting. The patients generally health continues to improve after disease is removed. Cures are not chronicled until time has fully tested that there can be no relapse or return of the disease.

NORWAY, (Herkimer Co) Feb. 1850.
R. F. BROTT & Co., Gents, it is with great pleasure that I write you about the very happy effects of your Yellow Dock and Sarsaparilla upon my son, who has long been in suffering under that dreadful, loathsome disease, Erysipelas, with which he was attacked in 1846, and was for several months attended by some of our best physicians, was tried your skill per many months, time and to my astonishment, he commenced improving he had used the third bottle, and encore an hand used a half dozen bottles he could walk out, side used in all twelve bottles, and by October last 49 was perfectly ures cured, every vestige of the disease excepting the scars is removed, and he remains in perfect health up to the present time. His recovery, under the blessing of God, is entirely owing to the use of your Yellow Dock and Sarsaparilla, and I assure you that I feel myself under great obligations to you, and it is with great joy that I inform you of what your Sarsaparilla has done for my son.
Respectfully, JAS. RUSSELL.

☞ None genuine unless put up in large bottles containing a quart, and the name of the Syrup blown in the glass, with the written signature of R. F. Brott, on the outside wrapper. Price $1 per bottle—or 6 bottles for $5.
It is sold by J. D. PARK, North East corner of Fourth and Walnut streets, entrance on Walnut st. Cincinnati, Ohio, to whom all orders must be addressed.

JOHN KYLE'S SPOOL SILK,
Expressly for Sewing.

TO avoid the many inconveniences attending the use of the article usually sold in skeins, the subscriber has been induced to put up the same in spools, and has now on hand a number of assortments, which he will dispose of at a small advance from eastern prices. The superiority of this article over that usually sold in skeins, is so much more valuable, should have been supplied in this form, which so much trouble and loss has arisen.
The difficulty has also arisen between ourselves, in the sewing machine, rendering it quite a convenient form for domestic use.
The only objection offered against this article is the apparent small quantity on each spool. This is easily explained. Each spool is warranted to contain 100 yards, while the ordinary skein, of the same size, has but an uncertain quantity, varying from 16 to 20 yards.
The Spool Silk is ready for use at the time of purchase, and is only ready to convince the most skeptical of its economy in using it in preference to the old form in which it is furnished. It has great advantages over the Skein, as it does not require winding, thus saving the trouble of reeling, and the loss of time in preparing it for use.

Great American Mechanical Work.
D. Appleton & Co. New York, have in course of publication, in parts, price twenty five cents each,
A DICTIONARY
Of Machines, Mechanics' Engines Work and Engineering; designed for Practical Working Men, and those intended for the Engineering Profession.
EDITED BY OLIVER BYRNE.

THIS WORK is of large 8vo. size, and will contain two thousand pages, and upwards of six thousand illustrations. It will present working drawings and descriptions of the most important machines in the United States. Independent of the results of American ingenuity, it will contain complete practical treatises on Mechanics, Machinery, Engineering, and Engineering in general. It will thus become one thousand dollars worth of folio volumes, magazines, and other books.
The great object of this publication is to place before practical men and students such an amount of correct and available information, in a cheap form, as shall enable them to work to the best advantage, and to avoid those mistakes which they might otherwise commit. The vast number of useful subjects thus brought together is almost beyond precedent in such works. Indeed, there is hardly any subject within the range of Mechanics, Engineering, Architecture and precision, that does not form of the most ordinary capacity cannot fail of understanding it, and that leading from it much which it is impossible to aim to know.
The publishers are, in short, determined, regardless of cost, to make the work as complete as possible; and it is hoped every one desirous to obtain the work will promptly forward his name, and thus encourage the enterprise.
The work will be issued in semi-monthly numbers, conveniently formed in numbers, and thus encourage the enterprise.
The whole work will be published in 40 numbers, at 25 cents per number, and completed within the current year, 1850. A liberal discount will be made to agents.
Any one remitting the publishers $10 in advance, shall receive the work through the post office free of charge.

Opinions of the Press.
"To our readers in the Mechanical Professions, Engineers, and Artisans, it will be a mine of wealth."—Providence, (R. I.) Journal.
"Young men and themselves with its knowledge."—We can with confidence recommend our readers to possess themselves of its numbers as fast as they appear."—Cincinnati Gazette.
"We unhesitatingly commend the work to those engaged in or intending to enter the various departments of mechanical pursuits, as eminently worthy of their examination and use."—Troy, (N. Y.) Budget.
"It is lively, practical, and the publishers deserve the thanks of inventors, mechanics, and manufacturers, and indeed of the public generally."—N. Y. Independent.
"This Dictionary will be highly useful to practical mechanics, and to those who wish to make themselves familiar with the progress of invention in the mechanic arts."—New Bedford Daily Mercury.
"Young mechanics will find it a complete work in the greatest as well as practical knowledge, and the work will show that just how they stand."—Mercury (Mass.) Advertiser.
"We take it to be just the work that scores and hundreds of our mechanics and engineers are anxious to possess. No ample are its descriptions, and so lucid and minute its specifications, that it seems to us that any intelligent mechanic may make a machine by the aid of the engravings and instructions."—N. Y. Commercial Advertiser.
"All concerned in mechanics should avail themselves of its advantages."—Schuylkill, (Penn.) Journal.
"A work of extensive practical utility and great importance and of value to the rapidly increasing interests of the country. It will be the means of greatly accelerating the progress of science and the mechanic arts, and of placing valuable information on the subjects."—Farmer and Mechanic.
"Practical men in all the various walks of mechanical and engineering science are invited to call and find in this work a treasure which it will be to their interest to possess."—Public Ledger.
"We have carefully perused the numbers, and cheerfully bear testimony to the best work for mechanics, inventors, and manufacturers that has ever been published, and for creations information on every branch of the mechanical arts and sciences, expressed in a style so plain and intelligible as to be within the reach of ordinary capacity."—Gloucester, (Mass.) News.
"We are sure we are doing the mechanics of Norwich and other parts of Connecticut a service by bringing the work to their attention."—Norwich, (Conn.) Courier.
"It [this] work is one of the most useful and important publications of the age. No mechanic should be without it."—Newark, (N. J.) Commercial Courier.
"All of the various publications we have seen to reflect the elucidation and advancement of the mechanic arts, are but as mere pigmies to this, which we have seen is full of promise as this."—Buffalo Com. Adv.
"It is the best and cheapest work ever offered to the mechanic and engineer."—Boston Transcript. The plates are beautifully executed."—Washington Globe.
"This great Dictionary is one of the most useful works ever published in any country, and the low price at which it is sold makes it acceptable to all."—Boston (Mass.) Bee.
"We regard it as one of the most comprehensive and valuable, as well as cheapest works ever published."—Baltimore Patriot.
"Useful to be taken by every one desiring to keep pace with the progress of the age in every one of the branches mentioned title."—London Courier.
"It is designed after the principle of Dyer's Encyclopedia of Trades, and will be a work of ability, to all the engineering professions, and above all, a valuable accompaniment for America who has done for science what Watt's steam engine has done for the works of art."—Scientific American.
"We published a specimen sheet, and its price so moderate, looking at what is contained in each number, that no one who has the least interest in such matters, need be deterred from purchasing. We cannot refrain from doing so, will find that he has in a condensed form an amount of instruction which would be obtained, if at all, only by the purchase of many volumes."—New York Courier and Enquirer.
"The engravings and descriptions with which the subjects are treated, the admirable manner in which they are illustrated, conspire to make this one of the most desirable works ever published."—Ibid.
"This work should be in the hands of every mechanic, artisan, and manufacturer, especially those who have the least spirituality to excel in their respective business. We have carefully examined it, with a view of recommending it to the public, and we can in no other way in the strong language of the Bible "it is good."—Baltimore Inventors' Journal.
Notice to the Editors of Newspapers throughout the United States and Canada.
If the foregoing advertisement is inserted five times during the month in any paper and sent to us, a copy of the work will be sent gratis in payment.

HALLISTER'S OINTMENT,
Containing no Mercury, nor other Mineral.
THE following testimonial is given by the celebrated Wool Dresser of Boston, the author of the great medical work entitled the American Practice of Medicine and Family Physician."
"Having been made acquainted with the ingredients which compose Hallister's Ointment, I approve it, and having prescribed and tested it in several cases in my private practice, I have no hesitation in saying of everything that it does not possess the least particle of poisonous matter, but is a most valuable remedy, including no mineral substance whatever, that its ingredients combined are such as to render it safe and sure to cure, regard for the truly honest, conscientious, humane pharmacist, I feel it my duty to say that the merits and the value of his discovery, oblige me to say thus much regarding it. W. BEACH, D. D. M."
New York, April 24d, 1846.

CURES.—It is one of the best things in the world for Burns.
PILES.—Thousands are yearly cured by this Ointment. It is a certain cure for Piles.
For Tumors, Ulcers, and all kinds of Sores, it has no equal.
If Mothers and Nurses knew its value in cases of Scalds or Sore Breast, they would always apply it in such cases, if used according to directions, it gives relief in a very few hours.
Around the box are directions for using Mc Allister's Ointment for the following complaints, viz: Sore Throat, Chilblain, Scald Head, Sore Eyes, Quinsy, Sore Throat, Bronchitis, Nervous Affections, Pains, Sore Nipples, Piles, Salt Rheum, Ring Worm, Barbers, Tetter, Fever Sores, Burns, Corns, all Diseases of the Skin, Sore Lips, Pimples, Scalds, Whitlow, Chapped Hands, Broken Breasts, Piles, Cold Feet, Croup, Swelled or Broken Breast, Tooth Ache, Agne in the Face, &c.

From the Reading Eagle
There is no reason, perhaps, why Medicine brought before the public, that is of such real merit as to earn a reputation as McAllister's All-Heaing or World Salve. Almost every person that has made trial of it speaks warmly in its praise. One has been cured by it of the most painful rheumatism, another of the piles, a third of a troublesome pain in the side, a fourth of a swelling in the limbs, &c. If it does not give immediate relief, in every case, it can do no injury, being applied outwardly.
As another evidence of the wonderful healing power possessed by this salve, we submit the following certificate, from a respectable citizen of Meadencreek township, in this county:
Meadencreek, Berks co., March 20, 1847
Messrs. Ritter & Co—Learn to inform you that I was entirely cured of a severe pain in the back, by the use of McAllister's All-Healing Salve, which I purchased from you. I suffered with it for about 20 years, and at night was unable to sleep. During that time I tried various remedies, which were prescribed for me by physicians and other persons, without receiving any relief and at last made trial of this Salve, with a result unfavorable beyond expectation. I am now entirely free from the pain, and enjoy at night a peaceful and sweet sleep. I have also used the Salve once for tooth ache and other complaints, with similar happy success. Your friend, JOHN HOLDOWAY
JAMES McALLISTER,
Sole Proprietor of this wonderful healing powder.
Principal Office, No 23 North Third street, Philadelphia.

PRICE 25 CENTS PER BOX.

TEAS! TEAS!! TEAS!!!
WE enter not into the list of puffers, we say nothing about Hundreds of Chests, Importers, Large Capital, Bought for Cash, &c. In fact, we will not haveing in any manner, or form, we simply invite the public to compare our Teas with what they purchase elsewhere; this is the best method we know to ascertain who sells the best and cheapest Teas in Pittsburgh.
We are now selling
Good and strong Tea at 40 and 50 cents per lb.
A prime article, 75 do do
The best Tea imported into the U. States, $1
Low priced, damaged, or inferior Teas we do not keep
MORRIS & HAWORTH
Proprietors of the Tea Market,
last side of Diamond.

Great American Mechanical Work.
D. Appleton & Co. New York, have in course of publication, in parts, price twenty five cents each,
A DICTIONARY
Of Machines, Mechanics' Engines Work and Engineering; designed for Practical Working Men, and those intended for the Engineering Profession.
EDITED BY OLIVER BYRNE.

THIS WORK is of large 8vo. size, and will contain two thousand pages, and upwards of six thousand illustrations. It will present working drawings and descriptions of the most important machines in the United States. Independent of the results of American ingenuity, it will contain complete practical treatises on Mechanics, Machinery, Engineering, and Engineering in general. It will thus become one thousand dollars worth of folio volumes, magazines, and other books.
The great object of this publication is to place before practical men and students such an amount of correct and available information, in a cheap form, as shall enable them to work to the best advantage, and to avoid those mistakes which they might otherwise commit. The vast number of useful subjects thus brought together is almost beyond precedent in such works. Indeed, there is hardly any subject within the range of Mechanics, Engineering, Architecture and precision, that does not form of the most ordinary capacity cannot fail of understanding it, and that leading from it much which it is impossible to aim to know.
The publishers are, in short, determined, regardless of cost, to make the work as complete as possible; and it is hoped every one desirous to obtain the work will promptly forward his name, and thus encourage the enterprise.
The work will be issued in semi-monthly numbers, conveniently formed in numbers, and thus encourage the enterprise.
The whole work will be published in 40 numbers, at 25 cents per number, and completed within the current year, 1850. A liberal discount will be made to agents.
Any one remitting the publishers $10 in advance, shall receive the work through the post office free of charge.

Opinions of the Press.
"To our readers in the Mechanical Professions, Engineers, and Artisans, it will be a mine of wealth."—Providence, (R. I.) Journal.
"Young men and themselves with its knowledge."—We can with confidence recommend our readers to possess themselves of its numbers as fast as they appear."—Cincinnati Gazette.
"We unhesitatingly commend the work to those engaged in or intending to enter the various departments of mechanical pursuits, as eminently worthy of their examination and use."—Troy, (N. Y.) Budget.
"It is lively, practical, and the publishers deserve the thanks of inventors, mechanics, and manufacturers, and indeed of the public generally."—N. Y. Independent.
"This Dictionary will be highly useful to practical mechanics, and to those who wish to make themselves familiar with the progress of invention in the mechanic arts."—New Bedford Daily Mercury.
"Young mechanics will find it a complete work in the greatest as well as practical knowledge, and the work will show that just how they stand."—Mercury (Mass.) Advertiser.
"We take it to be just the work that scores and hundreds of our mechanics and engineers are anxious to possess. No ample are its descriptions, and so lucid and minute its specifications, that it seems to us that any intelligent mechanic may make a machine by the aid of the engravings and instructions."—N. Y. Commercial Advertiser.
"All concerned in mechanics should avail themselves of its advantages."—Schuylkill, (Penn.) Journal.
"A work of extensive practical utility and great importance and of value to the rapidly increasing interests of the country. It will be the means of greatly accelerating the progress of science and the mechanic arts, and of placing valuable information on the subjects."—Farmer and Mechanic.
"Practical men in all the various walks of mechanical and engineering science are invited to call and find in this work a treasure which it will be to
