TRIESE DIES having been adopted and highly approved in all the principal shops in New York and Philadelphia, are now offered to manufacturers, machinists, ship similar, c.c., with the utmost conjudence, as the most perfect article in use or cutting screws.

Their superiority over any other Dies heretofore used, consists in their sutting a PREFECT SCREW, whicher Vor square thread, by oscer passing over the iron to be cut, which require no readging or previous preparation, as the dies cut the thread out of the solid iron, without raising it in the feast; in their greater durability, rapidity, and perfection of work; and in their simplicity and little liability to get out of order.
