

Hood's Sarsaparilla

Has made itself welcome in the homes of the people the world over, by its wonderful cures of all blood diseases and run-down conditions.

Get it today in usual liquid form or chocolate tablets known as Sarsatabs.

Heads Getting Scarce.

Mummified heads of South American Indians belonging to a tribe living on the slopes of the Andes, near Quito, in Ecuador, once so easily purchased, are becoming extremely scarce. The head is shrunk by some secret process known only to the natives, being thus reduced from life-size—nine or ten inches from tip of chin to top of head—to five inches. The curious thing is that the head can be reduced in this fashion without destroying the features. These heads—some of which are of great antiquity—are now almost impossible to procure. Their sale is forbidden by law, as the large prices they fetched tempted unscrupulous Indians to produce "green" ones.—Wide World Magazine.

A motorboat invented by a Wisconsin man, and found practicable, is mounted, catamaran fashion, in two narrow hulls, which are kept filled with air.

Try Murine Eye Remedy

For Red, Weak, Weary, Watery Eyes and Granulated Eyelids. It Soothes Eye Pain. Murine Eye Remedy Liquid, 25c and 50c. Murine Eye Salve, 25c and \$1.00.

The habit of viewing things cheerfully, and of thinking about life hopefully, may be made to grow up in us like any other habit.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

The Curfew in London.

Although we do not ring the curfew bell to clear the streets of children, its warning sound can still be heard in one place in London. This is at Lincoln's Inn, where its ringing is a relic of medieval times, when barristers and students lived in the Inn and were subject to the despotic rule of the benchers in such matters long after there was a legal necessity for "lights out" at 9. Now Lincoln's Inn is deserted in the evening save by watchmen and the police—and perhaps the ghosts of all the parties in Jarndyce and Jarndyce, who may revisit the scene of their litigation—the old hall which remains as Dickens described it in the wonderful opening chapter of "Bleak House."—London Chronicle.

The Bad Baboon.

Baboons and bears are the most formidable of all foes to the dogs that hunt them—just as leopards are of all wild animals those most apt to prey on dogs. A baboon's teeth and hands are far more formidable weapons than those of any dog, and only a very few wholly exceptional dogs of huge size and great courage and intelligence, can singlehanded contend with an old male.

But we saw a settler whose three big terriers could themselves kill a full-grown warthog boar; an almost unheard of feat. They backed one another up with equal courage and adroitness, their aim being for two to seize the hind legs; then the third, watching his chance, would get one foreleg, when the boar was speedily thrown, and when weakened, killed by bites in his stomach.—Theodore Roosevelt in Scribner's.

Children Especially Like Post Toasties

The sweet, "toastie" flavour of

Crisp, fluffy bits of perfectly ripe white corn—cooked, rolled and then toasted to an appetizing brown.

Served with cream and sometimes fruit, this dainty food pleases the whole family.

Give the home-folks a treat.

"The Memory Lingers"

Packages 10c and 15c.

POSTUM CEREAL COMPANY, Ltd., Battle Creek, Mich.

The Farm

The Cows and Alfalfa.

It is the experience of dairymen that alfalfa is far superior to timothy hay for cows, and that they may be fed all the alfalfa hay they will consume, and that a mixture consisting of 400 pounds of ground corn; 300 pounds of bran or oats supplements the alfalfa very well. Seven or eight pounds of this combination is sufficient to produce one pound of fat when fed with all the good alfalfa hay an animal will consume. If the droppings of the animal seem somewhat dry do not hesitate to recommend the use of one pound of oilmeal per day.—Indiana Farmer.

A Useful Pen.

Little chicks come as many cockrels as pullets. Few roosters are fit to save, and all the rest are good only to eat, so take them from hens, put them in pens, and turn them into dough by turning dough into them. An old packing box makes a fine pen. Get one without a lid about three or four feet square for six or eight roosters. Knock off one side, and here an inch and a half apart nail laths from one end of the box to the other. This is the floor of the coop. Droppings fall through to the ground after four legs are nailed to the box, one at each corner. Now nail laths three inches apart across the front, only leaving enough space for a small door, so as to reach the hand and arm in and pull them out. A good trough or pan should be fastened outside the coop near enough for the roosters to poke their heads through and eat. If the pan is put inside roosters step on it and turn it over, or get their feet into it and make a mess, and then they don't like to eat the befouled food. Put in a perch.—New York Press.

Hints For Milkers.

Remember that you are dealing with a living machine, and that therefore kind and quiet treatment will produce more milk with less trouble than harsh methods. The machine can only work at its best when properly handled. Every drop of milk should be drawn, for only by this means will the udder be induced to work at full pressure, and give a supply of the richest milk. It should also be borne in mind that the last milk is the richest. Observe cleanliness in all things. Make sure that the milking utensils are above reproach. Cleanse the cow's udder and your own hands before commencing to milk. Draw the milk by pressure, not by the stripping method. Carry out the operation, as quickly as possible, remembering that generally a good milker is a fast one and that the cow is liable to become impatient after a time.

Pay attention to the cow's health. If her teats are sore, if there is any discoloration or unusual feature about the milk, do not mix it with the rest. Take care that the buildings in which milking is carried on are well aired and free from avoidable dust. Fresh air and sunlight should be constantly admitted, and litter or food should not be handled during the milking hour.

Be punctual. The cow knows as well as you when the hour has arrived for milking, and delay will not only cause a diminution of her yield, but also a decrease of fat percentage.

Milk at as nearly even intervals of time as possible. A good deal of attention has been given to this question, and it has been found that milk poor in fat is very largely the result of allowing too long an interval to elapse between milkings. But whatever hours are chosen see that they are very strictly adhered to.

Observance of these rules should lead to the largest amount of milk, with the greatest proportion of butter fat, at a minimum of trouble to the milker.—W. R. Gilbert, in Farm Journal.

The Farm Milk House.

In a recent article in Hoard's Dairyman Professor Farrington, the well-known writer on dairy topics, gives the following good suggestions on farm milk houses. He says that the laws of the State of Wisconsin at the present time do not permit the keeping of a hand separator in the cow stable. It must be placed in a separate building or in a room partitioned off from the cow stable.

Plans for building small milk houses have been given in dairy papers and the catalogues of dairy supply firms. At farms where a hand separator is used and the cream sold, a small milk house will answer every purpose. One large enough to give space for the separator and a water tank, through which the water is pumped directly from the well and then to the stock tank, is all that is needed.

The question has arisen as to the advisability of placing a gasoline en-

gine, when this is used as a farm power, in this milk house. There is little danger of contaminating the cream from the odor of the engine, if this is well taken care of and the exhaust from the engine is tightly connected to a pipe which leads outside the building.

The cooling of the cream as it comes from the separator is absolutely necessary. It should be brought to near fifty degrees as soon as possible after separating, then placed in cans and these allowed to stand in a tank of cold water until the cream is collected by cream haulers.

If the milk house contains in addition to these pieces of apparatus, some sort of a boiler, for furnishing hot water and a wash sink, these can be included in the same building, but it is advisable to place the boiler in a separate room.

It is important that the milk house be built with a cement floor and cemented corners from the floor up the walls for at least one foot. This gives a sanitary surface which can be flushed with water and kept clean, provided the floor pitches well to the gutter and a good drain with a trap in carries off all surplus water spilled on the floor.

After the essential points of a good milk house are well understood, each farmer or dairyman can determine for himself how large a building he wants and locate it in a dry, clean place where it will not be contaminated by the drainage or the odors from the cow stable, pig pens or any refuse material.

Ruby Glass.

All along our beaches one finds bits of plain glass that have taken on a delicate ruby color from exposure to the sun's rays; some pieces very faintly ruby; others, usually small glass bottles, almost turned the color of the most delicate amethyst jewel. The new artificial pure rubies and sapphires may be similarly colored by radium, or by electrical decomposition of dichromate of potash. It is possible that Philadelphia's old window glass, that becomes rufescent from years of sunshine, had traces of dichromate of potash in its composition, and that the desired ruddy radio-active color would be most quickly gotten by the action of the sun and sea water. Ruby-tinted glass is old and manufacturers mold or grind it into lenses by the barrel. No doubt Philadelphia ophthalmologists cannot be taken in, and can tell the genuine Boston and Philadelphia ruby window glass from the red-tinted ones sold in the Bowery, if not by the big opticians in Philadelphia.—New York Press.

Singularities.

According to a Turkish newspaper of 1876, William E. Gladstone was born in 1796. For father he had a Bulgarian. His gluttony for gold made him yellow. He was of medium height, his whiskers were cropped close to his face, and "as a sign of his Satanic spirit his forehead and upper forehead were bare. His evil temper has made his hair fall off, so that from a distance he might be taken for quite bald."

In a turbine steamer the rhythmic thumping of the pistons disappears and instead the engines give out a thin soprano song that rises or falls in key with the speed, sometimes suggesting a continuous squeal from the struggling giants of steam striving to escape from their close confinement inside the big iron jackets.

Detroit people have organized a Jean Valjean club to furnish assistance to paroled prisoners.—Chicago News.

An Old Racing Town.

Lincoln, where the "saddling bell" which is not a saddling bell "rings" to-day on "the Carholme," which is not Lincoln, for what is not "the opening of the racing season," has had a long connection with the turf.

King James I held "a great horse race on Lincoln Heath" in 1617, and probably paid the jockeys with long speeches delivered half in Latin and half in Caledonian. Pessimists who assert that our present day "sprints" tend to equine decadence will be surprised to learn that the course on that occasion was only "a quarter of a mile long."—London Chronicle.

Mores Versus Manners.

The late nonagerian Duke of Rutland, whose family name was Manners, met the poet Tom Moore shortly after the publication of the latter's "Lalla Rookh" and his own elevation to the dukedom. Deeming that the poet had been unduly puffed up by the success of his work, the Duke told him that he verified the old proverb:

"Honores mutant mores."

"No, my lord," Moore instantly retorted, "the pun will do much better in English:

"Honors change manners."—New York Times.

Remedies are Needed

Were we perfect, which we are not, medicines would not often be needed. But since our systems have become weakened, impaired and broken down through indiscretions which have gone on from the early ages, through countless generations, remedies are needed to aid Nature in correcting our inherited and otherwise acquired weaknesses. To reach the seat of stomach weakness and consequent digestive troubles, there is nothing so good as Dr. Pierce's Golden Medical Discovery, a glyceric compound, extracted from native medicinal roots—sold for over forty years with great satisfaction to all users. For Weak Stomach, Biliousness, Liver Complaint, Pain in the Stomach after eating, Heartburn, Bad Breath, Belching of food, Chronic Diarrhea and other Intestinal Derangements, the "Discovery" is a time-proven and most efficient remedy.

The genuine has on its outside wrapper the Signature

Dr. J. C. Remond

You can't afford to accept a secret nostrum as a substitute for this non-alcoholic, medicine of known composition, not even though the urgent dealer may thereby make a little bigger profit. Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules, easy to take as candy.

Great Man, Halley.

Edmund Halley was a very great man. He was not only the first to predict correctly the return of a comet, that which is now known by his name, but also—before Newton had announced his results to anyone—arrived at the conclusion that the attraction of gravitation probably varied inversely as the square of the distance. While these and other important achievements of his are well known, it seems to have been forgotten that Halley devised a method of determining the age of the ocean from chemical denudation.—Science.

Her Scalp Itched Intolerably.

"Just about two years ago, some form of humor appeared on my scalp. The beginning was a slight itching, but it grew steadily worse until, when I combed my hair the scalp became raw and the ends of the comb-teeth would be wet with blood. Most of the time there was an intolerable itching, in a painful, burning way, very much as a bad, raw burn, if deep, will itch and smart when first beginning to heal. Combing my hair was positive torture. My hair was long and tangled terribly because of the blood and scabs. This continued growing worse and over half my hair fell out. I was in despair, really afraid of becoming totally bald.

"Sometimes the pain was so great that, when partially awake, I would scratch the worst places so that my finger-tips would be bloody. I could not sleep well and, after being asleep a short time, that awful stinging pain would commence and then I would wake up nearly wild with the torture. A neighbor said it must be salt rheum. Having used Cuticura Soap merely as a toilet soap before, I now decided to order a set of the Cuticura Remedies—Cuticura Soap, Ointment and Pills. I used them according to directions for perhaps six weeks, then left off, as the disease seemed to be eradicated, but toward spring eighteen months ago, there was a slight return of the scalp humor. I commenced the Cuticura treatment at once, so had very little trouble. On my scalp I used about one-half a cake of Cuticura Soap and half a box of Cuticura Ointment in all. The first time I took six or seven bottles of Cuticura Pills and the last time three bottles—neither an expensive or tedious treatment. Since then I have had no scalp trouble of any kind. Standing up, with my hair unbound, it comes to my knees, and had it not been for Cuticura I should doubtless be wholly bald.

"This is a voluntary, unsolicited testimonial, and I take pleasure in writing it, hoping my experience may help someone else. Miss Lillian Brown, R. F. D. 1, Liberty, Me., Oct. 29, 1909."

Lee and Virginia.

The state placed Lee beside Washington because the state today believes that Lee was the greatest Virginian after Washington. Some of our people go even further and think that Lee excelled Washington in generalship and in those noble personal traits which make a man truly great. Virginia believes that Lee should stand above Jefferson, Madison, Monroe, Marshall and a host of other men far better than most of those who grace or disgrace the hall of fame, and Virginia believes this not so much for what Lee did, in comparison with the other illustrious sons of this state, but for what he was. Lee, the man, is greater than Jefferson, the man, and Lee the man is greater as a man than Jefferson the statesman was great as a statesman.—Richmond Time-Dispatch.

Watercress is an excellent blood purifier.

Parsnips possess the same virtues as sarsaparilla.

Trial Bottle Free By Mail

FITS

If you suffer from Epilepsy, Fits, Falling Sickness, Spasms, or have children that do so, my New Discovery will relieve them, and all you are asked to do is to send for a Free Trial \$2 Bottle of Dr. May's

Epileptoid Cure

It has cured thousands where everything else failed. Guaranteed by May Medical Laboratory Under Pure Food and Drugs Act, June 30th, 1906. Guaranty No. 18971. Please write for Special Free \$2 Bottle and give AGE and complete address. DR. W. H. MAY, 548 Pearl Street, New York.

Dr. J. C. Remond

You can't afford to accept a secret nostrum as a substitute for this non-alcoholic, medicine of known composition, not even though the urgent dealer may thereby make a little bigger profit. The March to Universal Peace.

The beautiful and majestic temple of peace, joint product of the 21 American republics and of Andrew Carnegie, was dedicated in Washington recently in the presence of a distinguished company, including the President of the United States and a stately group of foreign ministers. And in Paris the French parliamentary group for international arbitration formally greeted Theodore Roosevelt and felicitated with him over the growing prospects for universal peace. And so the mighty movement goes on. The tranquil head of all peoples is with it. The beleaguered pockets of all taxpayers are behind it, and every right thinking soul in all countries is praying it God speed.—New York American.

It's Just What You Want

TELLS YOU ALL ABOUT THE VACATION LAND

Helps you decide where to go, where to stay, what it will cost, and you surely SETTLE THE VACATION QUESTION when you send for this valuable guide book.

"NEW ENGLAND VACATION RESORTS"
