750 MILLS OF THE

Union Pacific RAILROAD

Are now finished and in operation. Although this road is built with great rapidity, the work is thoroughly done, and is pronounced by the United States Commissioners to be first-class in every respect before it is accepted, and before any bonds can be issued upon it.

Whole Line to the Pacific will be Completed in 1869.

The Company have ample means of which the Government grants the right of way, and all necessary timber and other materials found along the line of its operations; also 12,000 acres of land to the mile, taken in alternate sections on each side of its road; also United States Thirty-year Bonds, amounting to from \$16,000 to \$48,000 per mile, according to difficulties to be surmounted on the various sections to be built, for which it takes a second mortgage as security, and it is expected that not only the interest, but the principal amount may be paid in service rendered by the Company in transporting troops, mails, &c.

THE EARNINGS OF THE UNION PACIFIC RAILROAD, from its Way or Local Business only, during the year ending June 30th, 1868, amounted to over Four Million Dollars, which, after paying all expenses was much more than sufficient to pay the interest on its Bonds. These earnings are no indication of the vast through traffic that must follow the opening of the line to the Pacific, but they certainly prove that.

First Mortgage Bonds

Are Entirely Secure.

The Union Pacific Bonds run thirty years for \$1,000 each, and have coupons attached. They bear annual interest, payable on the first days of January and July at the Company's office in the City of New York, at the rate of six per cent in gold. The principal is payable in gold at maturity. The price 102, and at the present rate of gold, they pay a liberal income on their cost.

It is well known that a long bond always commands a much higher price in the market than a short one. It is safe to assume that during the next thirty years, the rate of interest in the United States will decline as it has done in Europe, and we have a right to expect that such six per cent securities as these will be held at high a premium as those of this Government, which, in 1857, were bought in at from 20 to 25 per cent above par. The export demand alone may produce this result, and as the issue of a private corporation they are beyond the reach of political action.

The Company believe that their Bonds, at the present rate, are the cheapest security in the market, and the right to advance the price at any time is reserved. Subscriptions received in

Subscriptions will be received in CENTRE HALL BY FRED. KURTZ, and in New York At the Company's Office, No. 20 Nassau Street, AND BY JOHN J. CISCO & SON, Bankers, No 59 Wall St.,

And by the Company's advertised agents throughout the United States. Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices or at any of the advertised agents. JOHN J. CISCO, Treasurer, New York, June 6th, 1868.
