HOWE SEWING MACHINE.

Geo. Fairer, at Bellefonte, sells the celebrated Howe Sewing Machine, which has no superior in the market. Go to Fairer's store and see it. It has received prize medals at all fairs. They are the oldest established machines in the world. July 28, 68.

ELZA P. TITZELL,
Mifflin Co., Pa.
MANUFACTURER AND DEALER
IN STOVES, TINWARE, &c.
His stock consists in part of
SPEARS ANTI-DUST COOKING STOVE.
The Celebrated Barley Sheaf Ironsides Cook.
Oriental Cook.
Fulton Range.
Oriental Base Burner Parlor Stove.
Scientific Parlor Stove.
Sears' Orificular.
Also great variety of Gas Burners, Tugs Cannon, and other Stoves and Heaters, suitable for families, hotels, for offices, Churches, School Houses, &c.
A full line of Tinware and Self-Heating Stoves, and all kinds of Tinware, and all kinds of Repairing done. He has always on hand buckets, cups, dippers, dishes, &c., &c.
SILVERPLATING.
For bargains executed in the finest and most durable style. Give him a call. His charges are reasonable. ap10'68, ly.

TINWARE! TINWARE!
J. REIBER,
Respectfully announces to the citizens of Centre Hall, Pa., that he is now prepared to furnish upon shortest notice, and as cheap as elsewhere, every article in the line of Tinware and Tinware Ware. He has always on hand buckets, cups, dippers, dishes, &c., &c.
SILVERPLATING.
For bargains executed in the finest and most durable style. Give him a call. His charges are reasonable. ap10'68, ly.

TERMS.—The CENTRE HALL REPORTER is published weekly, at \$1.50 per year in advance, and \$2.00 when not paid in advance. Reporter, 1 month 15 cents. Advertisements are inserted at \$1.50 per square (10 lines) for 3 weeks. Advertisements for a year, half year, or three months at a less rate.

All Job-work, Cash, and neatly and expeditiously executed, at reasonable charges.

CENTRE HALL REPORTER,
FRIDAY, NOV. 27th, 1868.

VELOCITY OF NERVE FORCE.

The Journal of Mental Science contains an interesting article on the velocity of nerve force, comprising a description of the methods which have been employed to determine it. It says:

"The nerve current which transmits sensations to the brain, and the orders of the will to the extremities of the body, requires a certain time to travel in. Impressions coming from without are not perceived at the instant they are produced, they travel along the nerves at the rate of 20 to 30 meters (21.87 to 32.81) yards in a second, which is the same as that of the carrier pigeon, of a hurricane, or of a locomotive engine at its quickest, but very much less than that of a cannon ball. For instance, we can only be conscious of an injury to one of our feet about one-twentieth of a second after it has actually occurred, and the commands of the will proceed equally slowly from the center to the peripheries of the nervous system. In the human body the time thus occupied is unimportant, but let us take the case of a whale, where the telegraphic network of the nervous system is far more extensive. A boat attacks the whale, and a harpoon is driven into its tail. The impression thus produced has to travel over some forty yards before reaching the headquarters of the will; a second is thus lost. How long a time is then required for reflection? That must depend upon circumstances; but at any rate it is certain that the will has need of some definite amount of time for its decision. The order to capsize the boat is dispatched to the tail, but another second must elapse before the telegram reaches its destination, and in the time thus employed the whaling boat has pulled off and escaped the danger.

"Several methods have been devised by physiologists for measuring the velocity with which nerve force travels. Thus a physician of the middle ages, mentioned by Haller, fancied that this might be calculated by comparing the supposed diameter of the nerve tubes with that of the aorta, as he supposed the velocities of the blood and animal spirits, to be in the inverse ratio of the vessels containing them, from which data he calculated that nervous influence travels 600 times more quickly than light.

"Haller's own mode of procedure was scarcely more rational. He counted the greatest number of letters he could articulate in a given time, which he found to be 1,500 per minute. Now, the letter r requires, according to him, ten successive contractions of this muscle which makes the tongue vibrate, whence he concluded that this muscle can contract and relax 15,000 times, that is, can move 30,000 times in one minute. From the brain to the muscle the distance is one decimeter; if therefore, the nerve force passes over that space 30,000 in a minute, it must travel at the rate of three kilometers per minute, or fifty meters per second. We need not point out that this process is a mere series of mistakes, but it is strange that the result should happen to be so near the truth.

"No attempt was made until 1830 to study this question in a satisfactory manner, when one of the most distinguished of modern observers, M. Helmholtz, undertook its investigation. He at first employed Pouillet's 'chronoscope' a machine in which a galvanic current of very short duration made a magnetic needle deviate; the duration of the current being measured by the amount of deviation; by this means as short a time as some thousandth of a second can be measured. M. Helmholtz fixes one end of a muscle from the leg of a frog, and attaches the other to a small lever which forms part of a galvanic circuit, so that at the moment of contraction the circuit is broken and the time registered by the chronoscope.

The current is first sent directly through the muscle, and then through a given length of nerve which has been left adherent; the difference in time between the two cases gives the velocity of the nerve force, which, by this process, is found to be 26 meters (85 feet 4 inches) in a second.

"In a second method, also, employed by M. Helmholtz, the lever raised by the contraction of the muscle has a point which traces a line upon a sheet of blackened paper, which is kept moving from the moment of excitation, and the curve produced by the movement of the lever registers all the phenomena of the muscular contraction. This apparatus, is called the 'myograph,' gives the velocity of nerve force as equal to 27 meters (87 feet 7 inches) per second; several modifications of the instrument by different physiologists have given very closely agreeing results, and have also shown that the velocity is diminished by sending an electric current through the nerve, or by a low temperature.

Experiments with the same object have been made upon man in the following manner: An electric current is suddenly applied to the skin, the moment of application being registered by the turning cylinder of a chronoscope, and as soon as the person experimented on perceives the slight prick produced by the current, he touches an electric lever by which a second mark is made upon the cylinder. The interval between the two, which can be thus measured, is made up of the following elements, viz., transmission of the impression to the brain, the mental process there gone through, the transmission of the voluntary impulse to the fingers, and the consequent muscular contraction. But if this experiment be performed in two different parts of the body, as for instance, at the groin and at the great toe, all the other elements of the delay will remain the same except the time occupied by the transmission of the impression upward, and the velocity of nerve in man can be hence calculated. M. Hirsch, the director of the Neufchatel Observatory, was the first person to make these experiments, in 1861, and from them he concluded that nerve force in man passes over 34 meters (111 ft. 6 in.) in a second. Dr. Schelske has repeated the same experiments, and deduces from them a slightly less velocity, 29 meters (95 ft. 9 in.) per second. By similar means it has been shown that the rate of transmission through the spinal cord is the same as through the nerve trunks, and that a reflex action requires from one tenth to one thirtieth of a second more than the mere direct conduction of excitement to the muscles.

"The time required for certain cerebral operations has been measured by Dr. De Jaeger in the following manner: it was preconcerted that the person on whom the experiment was made should touch the lever with his right hand when he received an electric shock on the right side, and with the left hand when he received a shock on that side. The interval between the shock and the signal was found to be 0.20 of a second when the subject of the experiment had been told beforehand on which side the shock would be given, and 0.27 of a second when he had not been told; 0.07 had therefore been employed in reflection.

"M. Hirsch, again, has found that on an average two tenths of a second must elapse before an observer can mark by a signal his perception of a sudden noise or flash of light, and MM Donders and De Jaeger have varied their experiments thus—one of them pronounced a syllable, the other repeated it as soon as heard; when the syllable had been agreed upon beforehand, there was an average delay of two tenths of a second; when it had not been so agreed upon, of three tenths of a second. These are, however, only average results, and subject to individual variations, of which the 'personal equation' of different observers of a transit is an example well known to astronomers.

General Grant has promised to dine with A. T. Stewart, on Wednesday and attended the Everts banquet on Thursday. He desires the people to understand that he will make no appointments until after he is inaugurated, except those of his cabinet.

A natural color—the gray of the evening.

The Burning of Forepaugh's Menagerie—Animals at Large—A Wolf Passes the Night in a Gentleman's Parlor.

The following incidents connected with the partial destruction, by fire, of Forepaugh Menagerie in Philadelphia on Saturday evening we take from the Ledger of that city:

Mr. Adam Forepaugh, the proprietor of the Circus and Menagerie recently exhibiting in this city, owned a three-story brick building at No. 2108 Ridge avenue, a short distance above the mill. In this building, lions, tigers, monkeys, and other animals were kept in cages or boxes which had been constructed for temporary use. Fortunately Mr. Forepaugh was at his dwelling immediately opposite, when the fire was first discovered, and he at once commenced tumbling the cages or boxes from the building into the street, while those outside removed them from the vicinity of the fire. While thus engaged, a Bengal and a Brazilian tiger made their escape; the former made his way to Mr. Bryan's stables, in the vicinity, the crowd on the street giving way with great promptness, where he was secured; the Brazilian tiger ran along Jefferson street, until he reached the house of Dr. Gebler, near Twenty-second street; here several ladies were standing at the door, but the tiger passed by them and through the hall into the kitchen, where he remained until recaptured by one of Mr. Forepaugh's men. The box containing the lion was so much damaged that it was with great difficulty that the animal could be kept until another box was obtained and the lion secured. The excitement at this time was very great, as a rumor spread through the crowd that the lion had made his escape and was rushing furiously down the street. A large white Florida wolf got out of a box, and made his way through the crowd without attracting much attention, and about nine o'clock in the evening he was met by a gentleman at Ninth and Callowhill streets. The gentleman took the wolf for a dog, and the wolf no-doubt mistook the gentleman for one of those connected with the menagerie, for, as the gentleman opened his front door, the wolf entered the house; but as soon as he came under the gaslight in the hall his character and standing in the animal creation was known. The gentleman, not feeling disposed to use force to remove the intruder, opened the parlor door and the wolf passed in; the door was closed, and the animal was allowed to pass the night upon the soft Brussels. Word was sent to Mr. Forepaugh early yesterday morning and the wolf was taken away. All the other animals were kept secure in their boxes and removed to a building in the rear of Mr. Forepaugh's residence. The travelling cages, wagons, &c., were under shedding in the rear of 2108 and between the saw mills and these eleven cages, fifteen baggage and other wagons, a new buggy, pay wagon, canvass, seats, 122 sets of harness, wardrobe, saddles, banners, &c., were entirely destroyed, involving a loss of \$40,000, upon which there was no insurance. The building in which the animals were was completely gutted.

All's Well that Ends Well.

Not a great while ago an Irishman was employed, in a village where he was well known, to dig a well, *pro bono publico*.—The contract was made that he was to be paid a certain sum per foot, and warrant a free supply of water. At it he went with a will, and his daily progress was intensely watched by interested parties. Early and late he delved away faithfully, deep down in the earth, full of confidence in the speedy completion of his labors.

He had reached the depth of about twenty-five feet, and soon expected to "strike" water. Early in the morning Pat repaired to the scene of his labors, and horrible to tell, it had caved in, and was nearly full.—He gazed with rueful visage upon the wreck, and thought of the additional labor the accident would cause him. After a moment's reflection he looked earnestly around and saw no one stirring, then quickly divesting himself of his hat and coat, he carefully hung them on the windlass, and made tracks for a neighboring eminence which overlooked the village. Here, hid amid the undergrowth, he quietly awaited the progress of events.

As morning wore on, the inhabitants began to arouse and stir about. Several were attracted to the well, thinking that as Pat's hat and coat were there, he was below, of course at work. Soon the alarm had raised that the well had caved in and that Pat was in it. A crowd collected and stood horrified at the fate of poor Pat. After a brief consultation was held, and soon spades and other implements were brought to dig out the remains of the unfortunate man. To work they went with a will; when one set became wearied with the unusual labor, a half dozen ready hands grasped the implements and dug lustily. Pat quietly looked on from his retreat on the eminence while the whole village stood around the well, and watched with breathless suspense the work go bravely on.

As the diggers approached the bottom the excitement of the by-standers grew intense and they collected as near as safety would admit, gazing fearfully down into the well. With great care and precaution the dirt was taken away and when the bottom was at length reached, no Pat was to be found. The crowd before so anxious, gradually relaxed into a broad grin, which broke forth in uproarious merriment, when the venerable Pat walked up with a smiling countenance and addressed the crest-fallen diggers who now stood weary and soiled with their labors.

"Bejabers, gentlemen, and its Patrick Fagan sure that is much obliged to ye for doin' of that little job of work."

The effect can be imagined than described, and as the most active of the young men slunk off, several low-breathed mutterings broke forth that sounded very like *sol-diers*. Through the kindly aid of his fellow-citizens Pat soon finished his hole and it remains among the monuments of his genius to this day.

About 163 barrels of ale were run off into the sewers of Buffalo the other day, the watchman of the brewery having been drowned in the vat containing it.

Russia is in a bad way. The incendiary fires are increasing; robberies are frequent; the harvest is poor, and more bad money than gold is in circulation.

Brazil keeps a standing offer of \$8000 in gold to any one who will invent a mode of preserving beef so that it will be suitable for exportation, and though four hundred processes have been put in competition for this prize, none have yet received it.

A Boston paper mentions an individual there who "claps his hands so fervently in prayer that he can't get them open when the contribution box comes around."

An invalid disturbed all the inmates of his boarding house up town recently, by imitating a dog. When asked why he did so, he said he had been ordered by his physician to take port wine and bark.

The Language of the Handkerchief.

"The handkerchief, the handkerchief!" ejaculated the jealous Moor, and killed his loving Desdemona because she failed to respond. Fans and flowers have each their language, and why not handkerchiefs? No reason having been discovered, it has transpired that handkerchief flirtations are rapidly coming into fashion. As yet, the "code of signals" is confined to a select few, but we do not intend that they shall enjoy the monopoly any longer, and accordingly publish the key. Our informant says it may be used at the opera, theatre, balls and such places, but never in church; and we hope that this restriction will be observed, and are quite sure that it will.

Drawing across the lips—Desirous of an acquaintance.
Drawing across the eyes—I am sorry.
Taking it by the centre—You are too willing.
Dropping—We will be friends.
Twirling in both hands—Indifference.
Drawing across the cheek—I love you.
Drawing through the hands—I hate you.
Letting it rest on the right cheek—Yes!
Letting it rest on the left cheek—No!
Twirling it in the left hand—I wish to be rid of you.
Twirling in the right hand—I love another.
Folding it—I wish to speak with you.
Over the shoulder—Follow me.
Opposite corners in both hands—Wait for me.

Drawing across the forehead—We are watched.
Placing it on the right ear—You have changed.
Letting it remain on both eyes—You are cruel.
Winding it around the forefinger—I am engaged.
Winding it around the third finger—I am married.
Putting it in the pocket—No more at present.

A jury recently rendered a verdict against the town of Walpole, N. H., in favor of Miss Ella A. Gates for \$5,168, to compensate her for injuries sustained in consequence of driving against a post which the authorities had permitted to remain in the road.

A gentleman, while at breakfast at a certain hotel in Atlanta, was asked by a Federal officer whether the representatives from his county had arrived. "Wait," replied the gentleman, "until I get through my breakfast, and I will go to the kitchen and see."

A woman in Raymond, N. H., who was mindful of the old adage, that "it takes a bushel of corn to fatten a hog's tail," actually cut off the tail of her hog as a matter of economy. She was somewhat surprised on going to the sty in a couple of hours to find "hoggie" dead from bleeding, after the loss of his narrative.

An Omaha dispatch, says the Frontier Index, reports the hanging of three rascals near Bear River City, on the 12th instant. They were taken from jail by a vigilance committee. Other desperadoes were informed that they must leave the neighborhood within ten hours.

The Havana insurgents hold all the country from Puerto Principe to Santiago de Cuba, except Nuevas Jibara Baracos, as well as the railroad rolling stock, but all communication from those ports is cut off. The government troops have met with several reverses in the interior, and in consequence they keep in the towns and dare not sally out.

Switzerland, Austria and Norway have recognized the Spanish Government, under the conviction that it will receive the sanction of Cortes.

It is said that Mr. Cameron is working against Messrs. Moorhead and Scofield for the United States Senatorship in Pennsylvania. The "Chiefstain" wants Kenble elected.

The round of domestic life—a hoop skirt.

A scamp recently slipped a real bullet into the conjuring pistol of a performer at Brussels, and there came near being a dead magician.

A county paper says there is a man in that neighborhood so mean that he sits on the church door steps to save his pew cushion.

The czar has issued an ukase in virtue of which nine-tenths of the drinking saloons now existing in the Russian Empire are to be suppressed.

A man to whom every age is an iron—A blacksmith.
A popular work of art—Drawing room play.

Will asked old "ten per cent." what he wanted to accumulate so much money for. Says he: "You can't take it with you when you die, and if you could it would melt."

The New York Observer. Is now publishing a New Serial Story, to run through a large part of the next volume, entitled

"MR. BROWNING'S PARISH." All new subscribers will get the Story Complete. We send Grover & Baker's \$50 Sewing Machine for 15 New Subscribers. In order to introduce the Observer to new readers and new circles of influence; we make the following liberal offers for NEW SUBSCRIBERS:

We will send the Observer for one year, to 2 subscribers, one or both being new, for \$3 3/4. Or, to any person sending us five or more new subscribers, we will allow one dollar commission on each. Send by check, draft, or Post-office order. Sample Copies and Circulars sent free. Terms, \$5.00 a year, in advance. SISKYTT & NORRIS, PUBLISHERS, 31 Park Row, New York.

NOTICE—TO THE HEIRS and Legal Representatives of Daniel Beeshore, deceased: Take Notice that, by virtue of a Will of Partition, issued out of the Orphans' Court of Centre county, and to be directed, an inquest will be held at Aspersburg, in the township of Helms, and County of Centre, on Tuesday the 17th day of November, A. D. 1868, at 10 o'clock, a. m. of said day, for the purpose of making partition of the real estate of said deceased to and among his heirs and legal representatives, if the same can be done without prejudice to the rights of the parties; otherwise to divide and appraise the same according to law, at which time and place you may be present, if you think proper, and special notification hereof, is hereby given unto Elizabeth Beeshore, and the children of Catherine Kressner, formerly Catherine Beeshore. D. Z. KLINE, Sheriff. Sheriff's Office, Bellefonte, Pa., Oct. 2, '68.

CONFECTIONERY AND FRUIT STORE. AT CENTRE HALL PA. A. D. SWARTZ. Having opened a new and first-class Confectionery, he is prepared to serve the public with good fresh.

PIES, CAKES, CONFECTIONS, FRENCH AND PLAIN CANDIES, FRUITS, NUTS, TOYS, &c. FANCY ARTICLES, WHOLESALE AND RETAIL, and everything in his line, at all times.

FRESH OYSTERS. Always on hand and served in every style. HIS ICE CREAM SALOON. Will be open during the Summer, and will be kept attractive by the very excellent Cream of all popular flavors, constantly on hand. No Nuts, private parties, &c. can be supplied with a kind of confections, Ice cream, Cakes, and fruit at very short notice. oct. 28th '68.

HORSE COLLARS, if you don't want your horse's shoulders galled and made sore, get good horse collars at BURNSIDE & THOMAS'. CANNED FRUITS, peaches, tomatoes, pine apples, and peas in great variety, at BURNSIDE & THOMAS'. BASKETS in all their varieties, children's carriages, willow ware, guns, pistols, powder, shot, caps, cartridges, &c., at BURNSIDE & THOMAS'. BURNSIDE & THOMAS'. HARNESSES, collars, cart whips, carriage whips, in great varieties, government gears, saddles, bridles, martingale check lines, cart gears, tug harness, buggy harness, hames, &c. Everything in the saddle line, at BURNSIDE & THOMAS'. BURNSIDE & THOMAS'. Offer to the Public one of the largest and best selected stocks of merchandise, in Centre county. Call, examine and see for yourself.

THE Largest and Best Stock of warranted Boots and Shoes, warranted to give satisfaction, at reduced prices, only to be found at BURNSIDE & THOMAS'. SPICES of all varieties, ground to order and warranted to be of the best quality. It is the only place you can find unadulterated spices. Try them for your own satisfaction. You can only find them at BURNSIDE & THOMAS'. HANDSAWS, knives, spoons, coffee mills, shovels, spades, rakes, hoes, lamps, forks, chains, &c., at BURNSIDE & THOMAS'. NOTIONS of all kinds, Sterling gloves, Handkerchiefs, combs, pocket books, in all their variety, and very cheap, at BURNSIDE & THOMAS'. FISHING TACKLES, rods, lines, hooks, flies, son hair, buckles, &c. Big you out to catch trout at BURNSIDE & THOMAS'. FINE GROCERIES, mocha coffee, old gun, java, best quality Rio coffee, best quality black tea, green tea, loving syrup, golden syrup, Dr. Price's article baking molasses, rice, and everything in the grocery line at the lowest cash price in the market BURNSIDE & THOMAS' is the place.

Respectfully announces to the citizens of Centre Hall, Pa., that he is now prepared to furnish upon shortest notice, and as cheap as elsewhere, every article in the line of Tinware and Tinware Ware. He has always on hand buckets, cups, dippers, dishes, &c., &c.

BUGGIES! BUGGIES! J. D. MURRAY, Centre Hall, Pa., Manufacturer of all kinds of Buggies, would respectfully inform the citizens of Centre county, that he has on hand NEW BUGGIES, with and without top, and which will be sold at reduced prices for cash, and a reasonable credit given.
