One advantage we claim for it; is the lever power, by which we gain one hundred per cent over other machines. Another advantage is the hoisting and lowering apparatus, whereby the driver has under his complete control of the machine; in coming to a spot of lodged grain, the driver can change the set of the machine in an instant, without stopping the team, varying the stubble from 1 to 14 inches at the outside of the machine, as well as on the inside. It is constructed of steel class material; and built by first class mechanics. We warrant it second to none.
