Philadelphia Store. - In another column the Peansvalley trade will find the adv. of this noted place for cheap goods. Now-adays, it is quite a relief to find a store which makes it a rule to offer bargains, and Mrs. Keller & Musser, so well known on this side, have supplied this want, and by giving them a call you will find them just as represented.

THE RAIL ROAD BRUSHVALLEY THE SHORTEST ROUTE.

Mr. Kurtz: Allow me short space in your paper upon the rail-road question. Although Brushvalley has not made as big a fuss over this matter as some ther localities, yet I predict, that when the road is built, that our valley will get it. Railroad companies always take the shortest and cheapest route when they locate a road. This is natural, and as the Brushvalley route is some 15 miles shorter than the Pennscreek route, with no deep cuts, no bridging, and no tunneling, it will cost up-wards of half a million dollars less than any other route. These are my grounds for making this prediction, and the force of my reasoning is easily seen.

THOSE who desi e brilliancy of Com plexion must purify and enrich the blood, which Helmbold's Concentrated Extract of Sarsaparilla invariably does. Ask for Helmbold's. Take no other.

MOUNTAIN FIRES. The mountains on the north side of thi place, were set on fire, on last Saturday. The fire was first kindled in Green's valley and by noon on Sunday had reached this side, filling our valley with clouds of smoke. The high winds caused it to spread with great rapidity, and in the evening a chain of fire, several miles in length, stretched along the lofty top of Nittany sight from Centre Hall, about this time, was magnificent, but alarming to the owners of mountain tracts. Much valuable wood was damaged or destroyed by this fire, Dr Smith's tract receiving he greatest damage. We noticed that the mountains in other portions of our valley were

on fire at different times, recently. These mountain fires are a common thing every summer, and are caused by mischiewous persons, to the ruin of thousands of acres of valuab'e timber lands, making wood and lumber scarcer every year, and higher in price. Po valley, which

was beautiful and green with the finest hemlock and most majestic pines, is now, to a great extent a forest of black and charred trees, presenting a lonesome, dismal, horrid appearance, shunned by the birds of the ; ir, and where the burnt portions of it border the laughing ripples of Po creek, even the little trout of that beautiful stream seem to shun it. We do not know when we were more herrified, than about two summers ago, when on a fishing trip, we suddenly struck upon this burnt

district on Po creek. These mountain fires, during a dry spell, spread with amasing rapidity. A flame started in the morning, no larger than a hand, at night often has grown to a chain of fire, miles in length, endangering fences and buildings near the foot of the mountain. When under good headway, these fires are difficult to extinguish, the usual mode of which is to start a fire beyond and to burn in an opposite direction.

We do not know of any arrests ever having been made of persons who start these fires, and we think it high time that an example be made of such-the law is severe and its heaviest penalties should be inflicted upon such offenders.

On Monday the fire on Nittany mountain above Centre Hall, presented a sight magnificent almost beyond discription, far exceeding the beautiful sight of the evening revious. Occasionally, during Monday, the roaring of the spreading conflagration as it fed upon dead trees and brush, was like that of a great waterfall, and was distinctly heard in our village.

FIRE .- About 9 o'clock, on last Friday evening, the outbuildings belonging to Dr. Smiths premises, in this place, were discovered to be on fire, and the flames had already made considerable headway, but dried Apples ib. 08...... The Latest Scientific Invention, the Calorific.

To give some idea of the peculiarities of the stove in question, me may state that by a highly scientific and patent arrangement the excessive heat on the top of the stove which causes the centre pieces to burn out, is carried acound the oven, equalizing the heat of the stove, and causing the bottom of the oven to be just as hot as the top part of the stove; by this arrangement, there-fore, all danger of burning out the centre-pieces (usua to all cooking stoves) is ef-lectually obviated. What is more, the fire and oven can be easily regulated to any degree of heat, by means of this patent arrangement, thus avoiding the necessity of giving the stove consent attention while aking, in order to prevent it becoming too hot or too coid; another advantage which this stoye possesses to persons who use bi-luminous coal, is, that by the aid of the patent in question, it consumes the latter as readily as anthracite; in short, the operation of this stove, which is as beautiful as t is efficient, leaves nothing to be desired. We would also state that these stoves can be readily supplied with a patent copper-back boiler, by which all the hot water required in a family, can be heated by the waste heat from the stove. To persons residing in the country, this stove comes as a best selections, for which his store is noted, and what you get there never has anything bogus about it.
