### LETTER FROM ILLINOIS.

F. KURTZ-Dear Sir:-I will endeavor to write some items from this place, that will perhaps be read with i terest by a portion of your readers, but I presume there are those of your subscribers, who are as well, and perhaps better, acquainted with the western country, than your humble correspondent; but, the west of three, four, or six years ago, is not the west of to-day. I often heard the remark made in the east, why do people wish to go out west, among the half civilized, away from schools, churches, and all the advantages of civilization, but it is all a grand mistake; I grant the east has advantages over the west, in many respects, and will mention but one, namly, in the east, the rich man has the poor laboring man completely in his power; here it is not so; in this country, if a man is poor, if he is only honest, he will do well, and any man of small means can easily secure a competency for himself and family if there be the least spark of perseverance and energy in him. We have in this town, excellent public schools, good churches, plenty of business places, a planing mill, foundry and steam grist mill. This town is situated on the L. C. R. Road. A large public school is now under way. A great many new buildings already commenced, in fact, the town is improving rapidly; lots that could have been bought 2 or 3 years ago for \$75 to \$100, now bring from \$200 to \$400. Forty new lots were laid out in the west end of town last week, and I presume they will soon be sold. We have had rather cold weather this

r spring, so far, but still there is nothing to complain of. I was agreeably surprised on my arrival here, to find Mr. B. Clapp, formerly of Centre county, located here; a good many Pennsylvanians are settled around here; if some of the farmers who are toiling and laboring among the grubs and stones in "old Centre," were here, they would verily believe themselves in paradise; six or eight years ago, there were large tracts of prairie land unoccupied, now the scene has changed, everywhere as far the eye can see, you behold farm houses; fust think of it, you, who give the best part of your daily toil to enrich your landlords, toiling through the long summer day, your plough striking against a rock or stump, nearly taking your breath, think, I say, what would your feelings be, after ploughing (not just one day) a week without striking a stone or stump; why you would become lazy, and perhaps the first thing you would do, would be to send east for a carload of stoner to scatter ever your fields in load of stones, to scatter over your fields in order to have them remind you of former

The fruit trees give promise, so far, of an abundant crop. This year, winter grain looks well; the farmers have been very bu-

ture time to give you some news that will prove to be of more benefit to your readers.

I left many friends in Centre who I know would be pleased to hear from the west oc-

you posted in regard to what transpires around here. A word to you farmers in the neighbor hood of my former home—if you are tired of toiling among the rocks, tired of climbing hills and mountains in order to reach market, come out and take a look at this country, and my word for it, in nine cases out of ten, you will buy yourselves a home before you leave. Good farming land adjoining this place is held at about \$100 per acre, but from six to ten and twelve miles acre, but from six to ten and twelve miles from here you can buy splendidly improved farms at from \$35 to \$45 per acre, and a man with a large family of boys, could do well, as he would be at no expense for aired help. No danger for a man coming here from Penn'a if he is a laboring man, but what he will find something to do. Mechanics get good wages: fam heads complete the state of the state chanics get good wages; farm hands command from \$20 to \$35 per month; some come west with the expectation of getting rich without labor, such generally go away disappointed and then say the west is a poor miserable place; indeed it is a miserable place for idlers. More anon.

O. P. Morron.

The Latest Scientific Invention, the

Calorifie. To give some idea of the peculiarities of the stove in question, me may state that by a highly scientific and patent arrangement the excessive heat on the top of the stove which causes the centre pieces to burn out, is carried around the oven, equalizing the heat of the stove, and causing the bottom of the even to be just as hot as the top part of the stove; by this arrangement, thereore, all danger of burning out the centre pieces (usual to all cooking stoves) is effectually obviated. What is more, the fire and oven can be easily regulated to any degree of heat, by means of this patent arand times that no communications are rangement, thus avoiding the necessity of giving one stove constant attention while baking, in order to prevent it becoming too hot or too cold; another advantage which this stove possesses to persons who use bi-At East Saginaw, Mich., a German luminous coal, is, that by the aid of the won an died recently, who had residen patent in question, it consumes the latter J H Sands as readily as anthracite; in short, the operation of this stove, which is as beautiful as it is efficient, leaves nothing to be desired We would also state that these stoves can be readily supplied with a patent copper back boiler, by which all the hot water re special blessing, as it affords them all the might as well be at work on her coffin in the meantime."
