The distance from San Francisco to New York is 2,120 miles, the measurement east from Chicago being by the Pittsburgh, Fort Wayne and Chicago and Pennsylvania routes. On so long a line the sixty one miles long insigificant, yet in the earlier days of railroading a line sixty one miles long used to be considered an institution not to be overlooked.

**Miners at Work.**

Seranton, May 18.—The Delaware, Lackawanna and Western company's miners at Pittston and the Hudson miners at Oliphant—numbering altogether more than five thousand—are and have been steadily at work.

**Horse and Buggy Stolen.**

Quarold friend, Gideon Biehl, of East Buffalo, has found himself short of a valuable team-out. On Tuesday night of this week, one of those most contemptible of all criminals, a horse thief, broke into his stable, and helped himself to a fine black mare, with white hind feet, star on the forehead, aged eight years, and weighs about eleven hundred. A good light open buggy, two buffalo robes, two whips and a blanket were also taken. Mr. B. offers a reward of \$50 for the apprehension of the thief, \$50 for the recovery of the mare, and \$25 for the other property. Singular enough, Mr. B. had not placed his beast under the protection of the Buffalo Valley Horse Association. As thieves come when least expected, all owners should secure stock by some such plan.—(Chronicle.)

On Thursday the Indiana Senate again undertook to ratify the XVth Amendment. The democratic Senators anticipating the intended action of the radicals, sent in their resignations to the Governor. They announced this fact in open Senate, but the radical Lieutenant-Governor, who presides over the Senate, locked the door of the chamber, and whilst the democrats were thus held in darance vile, the Senate proceeded to vote on the amendment! The democrats having resigned, of course there was no quorum, under the constitution of Indiana. But quorum; or no quorum, the radical presiding officer pronounced the Amendment ratified! The House was to act on it yesterday. The democratic members of that branch had also resigned and left the radicals without a quorum. At this writing we are not informed what was done in the House, but we presume the force enacted in the Senate was repeated. Thus, by violence and fraud do the radicals strive to accomplish the ratification of the XVth Amendment. Who can respect laws and constitutions made and established by such means?

Massachusetts, the mother of isms, is moving in favor of woman suffrage, as will be seen by the following resolution proposed in her legislature:

**ARTICLE OF AMENDMENT:** "The word 'male' is hereby stricken from the third article of the Amendment of the Constitution. Hereafter women of this Commonwealth shall have the right of voting at elections and be eligible to office on the same terms, restrictions, and qualifications, and subject to the same restrictions and disabilities as male citizens of this Commonwealth now are, and no other."

The Washington Administration pretends to disfavor Cuban annexation, and pretends to occupy an attitude of strict neutrality in relation to the insurrection pending in that country. In the face of this pretense, arms, a munition and men, to all the insurgents, are openly shipped from New York, and with the knowledge of the authorities at Washington. This is very nearly, if not quite, the same kind of neutrality concerning Mr. Grant, with Mr. Charles Sumner's oratorical assistance, is now pompously threatening to fight all creation. Is Mr. Grant trying to bring America in debt to Spain, as Great Britain was brought in debt to America?

The radicals have managed our finances in such a blameworthy manner, that the whole country, save the bondholder, is suffering; we think all should prepare for a fearful crash ahead; the honied words of radicals have turned to bitterness, and I of old days knows that it is store for the country under radical misrule, mismanagement and corruption. It is not impossible that another bubble, in another quarter is ready to burst, as we see by a list published by the *Commercial and Financial Chronicle*, of twenty eight great railroads whose aggregate stock in 1887 was \$247,933,000, which in two years have watered their stock to the extent of \$113,613,000, their present aggregate valuation being \$361,546,000. But this is not all. The inflated rate on the 1st of July, in 1885 a total capital stock of \$83,309,000 they have now, to represent substantially the same property, or with proportionately the small additions, a capital stock of \$238,633,000. The increase is \$125,324,000, or one hundred and thirty per cent; and consists almost wholly of water.

But this is not the whole of the inflation. Not merely has the bonded debt been in many instances seriously increased, so that the property left to be represented by the stock is actually less than it was then, but the market price of the stock itself has in most cases advanced enormously.

In this comparison it would not be just to take the prices of stocks before the war, nor even the panic prices made upon the conclusion of peace, when dealers were expecting a speedy return to specie payment, and the consequent explosion of the enormous speculative bubble. But in the winter and spring of 1884, it will be remembered, the prices of railroad stock were rapidly advanced by active speculation; thousands of people from all parts of the country bought them, regardless of cost; the community discussed their fluctuations as the chief topic of the day; an excitement like the traditional fever of the Mississippi bubble in London pervaded Wall street and a great part of the city; and while many cool and long heads with low from business in stocks, through dread of the reaction, the multitude went on growing rich by selling to one another at enormous advances, until a sudden demand for money struck them with panic, and the prices of some stock fell fifty dollars a share before the owners could hear of the alarm.

The Chronicle continues with figures showing that railroad stocks generally have been enormously inflated, and adds that whether the scheme be the building of new roads or the purchase of old, it is certain that it is dangerous and that the speculative fever now raging in railroad property, exceeding by far everything hitherto known in the markets of this country, has reached

a height at which prudent men will wish not to meet its hazards. When the revulsion does come, the ruin of it will be the wicer and the more lasting for every citizen who engages in it now.
