Repeal! Retrenchment! and Reform! THE CAMPAIGN. PATRIOT.-The reat battle with the enemies of Constitutional Freedom, the new crusade against the corrupt cabal that aims at the destruction of popular liberty, whilst it robs the treasury of the Commonwealth, is about to open in carnest. The Repeal of the fraudulent ratification of the 15th Amendment, Retrenchment in the expenditure of the State Government, and Reform in the State Legislature and the Executive Department are inscribed on the Democratic banner. Under that glorious ensign the PATRICE will continue to do battle. In order that every intelligent man in the Commonwealth may enlist with us, we make the following

New Customers,

The Latest Scientific Invention, th

pieces (usual to all cooking stoves) is ef-fectually obviated. What is nore, the fire and oven can be easily regulated to any degree of heat, by means of this patent aringement, thus avoiding the necessity of giving the stove constant attention while baking, in order to prevent it becoming too hot or too cold; another advantage which this stove possesses to persons who use bi-tuminous coal, is, that by the aid of the patent in question, it consumes the latter as readily as anthracite; in short, the ope-ration of this stove, which is as beautiful as it is efficient, leaves nothing to be desired. We would also state that these stoves can be readily supplied with a patent copper-back boiler, by which all the hot water re-quired in a family, can be heated by the waste heat from the store. To persons residing in the country, this stove remes as a special blessing, as it affords them all the advantages of a cooking range, with none of the annovances; a water-back ran castly be attached to it at a trifling cost, which will heat water equal to a cooking range will heat water equal to a cooking range without the inconvenience or expense of having a range built in the fire place. We will take the liberty of suggesting that to persons about going to house keeping, too much importance cannot be attached to the necessity of having the best possible cooking facilities. The great feature that it does not require constant attention, that when the oven is once fixed, there is not the slightest risk from carelessness or neglect, and that the temperature of the store is absolutely uniform at the top and bottom, are alone sufficient to colipse all other stoves in use, we would advise all persons who think of purchasing, to call at the ware-rooms of isaac Harpt, near the depot, at Bellefonte, where he keeps all of Spears make of stoves. All of the above patents can be applied to the celebrated unti-cust. Cookstave heretofore sold by him. Prices, 10 per ct. loss than market

Calorific.

To give some idea of the peculiarities of the stove in question, me may state that by a highly scientific and patent arrangement the excessive heat on the top of the stove which causes the centre pieces to burn out, is carried around the oven, equalizing the heat of the stove, and causing the bottom of the oven to be just as hot as the top part of the stove; by this arrangement, therefore, all danger of burning out the centre pieces (usual to all cooking stoves) is ef-
