TALL OATS. Miles township beats Benner for tall oats. On last Monday a stalk of oats was left at our office, measuring 7 feet 2 inches, which grew upon the land of John Ruhl. Who can beat Brushvalley?

Who Can Beat This?

Editor Reportor-Hearing so many "brags" made about prolific yields of potatoes, I beg leave to state through the columns of your paper that Mr. J. W. Mark, of this place, purchased one Early Rose potato which he cut into eleven pieces, and planted into eleven hills in his lot, which have yielded him three and one-half peeks of nice sound potatoes. The potatoes can be seen at any time by calling at Mr. Mark's house. Who among the farmers of Centre county can beat this? mers of Centre county can beat this?

"JAB."

While we have reports from the South and other localities about the prevailing drougth, which is democratic complain to the prevailing drougth, which is address Rev. Edward A. The Latest Scientific Invention, th

Calorific.

To give some idea of the peculiarities of Store Goods for the stove in question, me may state that by a highly scientific and patent arrangement the excessive heat on the top of the stove which causes the centre pieces to burn out, is carried around the oven, equalizing the heat of the stove, and causing the bottom of the oven to be just as hot as the top part of the stove, by this arrangement. this stove possesses to persons who use bituminous coal, is, that by the aid of the patent in question, it consumes the latter as readily as anthracite; in short, the operation of this stove, which is as beautiful as it is efficient, leaves nothing to be desired. We would also state that these stoves can be readily supplied with a patent copperback boiler, by which all the hot water required in a family, can be heated by the waste heat from the stove. To persons residing in the country, this stove comes as a special blessing, as it affords them all the advantages of a cooking range, with none of the annoyances; a water-back can easily be attached to it at a trifling cost, which will heat water equal to a cooking range without the inconvenience or expense of having a range built in the fire place. We will take the liberty of suggesting that to persons about going to house keeping, too much importance cannot be attached to the necessity of having the best possible cooking facilities. The great feature that it does not require constant attention, that when the oven is once fixed, there is not the slightest risk from carelessness or neglect, and that the temperature of the stove is absolutely uniform at the top and bottom, are alone sufficient to eclipse all other stoves in use, we would advise all persons who think of purchasing, to call at the ware-rooms of Isaac Haupt, near the depot, at Bellefonte, where he keeps all of Spears' make of stoves. All of the above patents can be applied to the celebrated anti-dust Cookstore heretofore sold by him. Prices, 10 per ct. less than market value, for cash.
