How To Spoil A Husband.

BY HENRY WARD BEECHER.

A LATE number of the Manufac turer and Builder, an excellent magazine published in this city, serves up the following spicy lecture by the Brooklyn Heights divine :7

It is an old proverb that "a man what his wife will let him be." Like all proverbs, it is true often enough to be talking to the popular mind. A man's conduct, his morals, his general thrift are determined by a variety of circumstances. But none among his wife. A man may be good presence of a direct and excellent wosuch a result. A woman's influence is pervasive and continuous Rising put on again her wedding suit radicals love to have him do battle for have to gain access to him. She has a their cause, so holdly and valiently he near place and the first chance always; talks; but it is questionable whether the first in the morning and the list not only spoil them, but drive the they will extract a great degree of at night. She touches all the springs into untimely graves. Give them pleasure from the things said in the of life, through her children, through subjoined paragraph. But they can- her domestic arrangements, through all men to 'see themselves as others not complain of the workmanship, so her personal attractions. She reaches faithfully is it drawn, though they may his pride, his ambition, his temper, his | nales and to sombuon and water, dislike to see the picture. As . this is love, and his passions, as no other one by a native artist, and true to nature may. The strongest natures can only it will afford an excellent opportunity | partially main tain an independance, of comparing our second Washington, and common natures not at all. In with the first Washington, after whom this statement I shall look only on the his friends delight to call him. The dark side of the picture, and sketch a following is the picture drawn by few of the ways in which a wife can then upon that. He says Grant is- dispet the marriage illusion that she "A jockey and a seaside lounger; a was good, amiable, and angelic. restless boy, needing constantly to be ter a few days, let her maifest selfishamused, and so impatient of business ness; study her own comfort and negthat he cannot stay at his post more leet his meet his advances with reoffice, he has not yet given us an Admin-istration. But posting a copying clerk she cares for him only, when she has here and there, to keep the machine in some plan to carry; that he is of valmotion, he harries off to idle a week at | ue to her plans, but is used like a watering place, act Dummy at a mon- printer's type, to be set up or distribstrous show, or Helpless at a steam- uted just to suit her capice. The Late Eclipse.

A correspondent of a Philadelphia paper thus writes of a prolonged "to-

"Few people trouble themselves to think what the effect would be if the length of time, and the sun were blotted from the heavens. Philosophy that the apprehensions of great danger of darkness cover the earth, but the moisture of the air would be precipitated in vast showers to the earth, and of cold nothing less than 230 degrees ng water. In three days after the almost burnt up. cooling process began, nothing created would be alive but the monsters that wallow in the deep ocean, and the eyeless reptiles that make their haunts in caves which penetrate far underground."

The value of Southern exports last year was over two hundred and forty millions, while that of the North was a little less than two hundred millions. The domestic trade of the South is also of incalculable advantage to the North for it supplies our manufacturers with the raw material they need, and takes back Northern manufactures in return. What sense is there in a policy are distributed in the following manthe productions and wealth of such a section? And yet the radical party is

The lava which has flowed from volcanoes is such a poor conductor of heat that the interior of the stream may remair red bot for years after the exterito cultivation. The lava of Jorullo was hot enough to light a cigar twenty one years after its issue; and sixty six years later it was perceptibly heated enough to give rise, to the escape of steam. One of the lava flows of Ætna, that of 1857, spread over a mass of snow, which, in 1830 still remained under it unmelted, while the overlying mass of rock was quite hot. The snow was preserved from melting by a layer of ashes, through which the plorations in the sacred city. More beat was conducted with extreme slow-
