Mauch Chunk, Pa., Sept. 15.- A body of nearly one thousand excursionists from New York and New Jersev, headed by two brass bands, serenaded Judge Packer this evening. Great regret was felt at the Judge's absence. Hon. J. D. Aggett Hunt, of New York, at the request of the excursionists, madea congratulatory address. He alfuded in a happy man ner to the Judge's pioneer life among the rock-bound mountains, his life as a carpenter, boatman contractor, and projector of the most important railroad in the United States, spoke in most fitting terms of his philanthropy in endowing and building a university for the mental training of the youths of the country and his donation of magnificent church for the benefit of man the glory of God. In the absence of the Judge, Hon, Allen Craig responded in his behalf in a very eloquent address, acknowledging the compliment paid to the Judge, after which the party proceeded to pass through the parlors, library and magnificent grounds, all happy in paying their respects to Pennsylvania's favorite son.

How to Keep Butter Sweet.

It is the easiest thing in the world. Simply put it in clean jars and cover as we know by experience. It is almost equally good fo put in oak casks, headed tight. This is equivalent to canning fruit. The brine in the case of the jar acts as a heading to keep the air out. But butter should be made well; we have never experimented on poor butter. Work out the buttermilk till you have only pure "beads," clear as rain water; but do his feet, not work so much as to break the grain, in which case you have a tough, heavy article in winter, and grease in summer. Such butter we advise no one to try to reserve. - Cor. Rural

This extraordinary pile, \$52,000, was obtained in one day by two men, from the Monumental quartz mine in Sierra Buttes, Sierra county, owned by W A. Farrish and others. William Farrish writes that in two days he would send us as much more. The vein varies from one to two feet, and is filled with decomposed quartz. The gold is obtained by slucing, using quicksilver to eatch the fine particles. The tailings only go through an arastra. The Sierra Butts and the Independence mine are located on the same mountain. It is only some two months since Messrs. Farrish commenced work on this mine, and they have got in but a few feet.
