Milroy, Pa. COMPLETION OF THE PACIFIC be readily supplied with a patent copperback boiler, by which all the hot water required in a family, can be heated by the waste heat from the stove. To persons residing in the country, this stove comes as a special blessing, as it affords them all the advantages of a cooking range, with none of the annoyances; a water-back can easily be attached to it at a trifling cost, which will heat water equal to a cooking range without the inconvenience or expense of having a range built in the fire place. We will take the liberty of suggesting that to persons about going to house keeping, too much importance cannot be attached to the necessity of having the best possible cooking facilities. The great feature that it does not require constant attention, that when the oven is once fixed, there is not the slightest risk from carelessness or neglect, and that the temperature of the stove the slightest risk from carelessness or neglect, and that the temperature of the stove is absolutely uniform at the top and bottom, are alone sufficient to celipse all other stoves in use, we would advise all persons who think of purchasing, to call at the ware-rooms of ISAAC HAUPT, near the depot, at Bellefonte, where he keeps all of Spears' make of stoves. All of the above patents can be applied to the celebrated anti-cust Cookstove heretofore sold by him. Prices, 10 per ct. less than market value, for cash.
