The Latest Scientific Invention, th Calorific. To give some idea of the pecaliarities of the stove in question, me may state that by a highly scientific and patent arrangement the excessive heat on the top of the stove which causes the centre pieces to burn out, The Company announce to the citizens of Potter township, that they are now prepared to furnish upon short notice, and as low as elsewhere, every article in the line of the oven to be just as hot as the top part of the stove; by this arrangement, there fore, all danger of burning out the centre lines (usual to all cooking stoves) is ef-

of the stove; by this arrangement, there fore, all danger of burning out the centre pieces (usual to all cooking stoves) is effectually obviated. What is more, the fire and oven can be easily reculated to any degree of heat, by means of this patent arrangement, thus avoiding the necessity of giving the stove constant attention while baking, in order to prevent it becoming to hot or too cold; another advantage which this stove possesses to persons who use bituminous coal, is, that by the aid of the patent in question, it consumes the latter as readily as anthracite; in short, the operation of this stove, which is as beautiful as it is efficient, leaves nothing to be desired. We would also state that these stoves can be readily supplied with a patent copperback boiler, by which all the het water required in a family, can be heated by the waste heat from the stove. To persons residing in the country, this stove comes as a special blessing, as it affords them all the advantages of a cooking range, with none of the annoyances; a water-back can easily be attached to it at a trifling cost, which will heat water equal to a cooking range without the inconvenience or expense of having a range built in the fire place. We will take the liberty of suggesting that to persons about going to house keeping, too much importance cannot be attached to the necessity of having the best possible cooking facilities. The great feature that it does not require constant attention, that when the oven is once fixed, there is not the slightest risk from carelessness er neglect, and that the temperature of the stove All orders by mail promptly attended t

when the oven is once fixed, there is not the slightest risk from carelessness or neglect, and that the temperature of the stove is absolutely uniform at the top and bottom, are alone sufficient to eclipse all other stoves in use, we would advise all persons who think of purchasing, to call at the ware-rooms of Isaac Happy, near the denot, at Bellefonte, where he keeps all of Spears make of stoves.
