embraced in these new and beautiful styles of Dentistry.
Their superiority consists mainly in their perfect adaptation to the mouth—their perfect cleanliness, being
without crack or crevice for food to find todgment, and
made of a material on which the juices of the mouth
cannot act they are free from all metallic faste, corrosion or tarnish and do not effect the breath, which is a
great desideratum, as all who wear Gold, Silver, Platinium or other Metallic Plate, can testify.
They also combine great strength with lightness, comfort and elegance—this with their close resemblance to
natural teeth render them the most desirable substitutes for those organs ever offered. An examination
will fully confirm all that has been said in their praise.

Is there a hundrand, father, or brother in the United States, who will permit the drudgery of hand sewing in this family, when a Grover 4 Baker Machine will do it tester, more expeditiously, and cheaper than can possibly be done by hand.

The first place in public estimation is now justly accorded to the Grover 4 Baker Machine, for family sewing, for the following reasons:—Ist it is more simple and easily kept in order than any other Machine. 2d.

It makes a seam which will not rip or ravel though every third sitch is cut. 3d. It sews from two ordinary spools, and thus all trouble of winding thread is avoided, while the same machine can be adapted at pleasure, by a mere change of spools, to all varieties of work. 4th. The same machine runs silk, linen thread, common spool cotton, with equal facility. 5th. The seam is as elastic as the most elastic fabric, so that it is free from all liability to break in washing, ironing, or otherwise. 6th. The sitch made by this machine is more beautiful than any other, made either by hand or machine.
