Dailn Post.

WEDNESDAY MORNING, MARCH 6. We find in yesterday's Dispatch the fol-

The iron men of this city and vicinity are just now alive with expectancy, anticipating that Pittsburgh will have a share in the building of he six iron war steamers ordered by Congress Preparatory to their construction, a rolling less than \$150,000, expressly for the anufacture of the iron. Our Representatives are expected to be "wide awake" to their home ate, and will be thought negligent of their trust unless they secure to their constituents at least some of this government pap. In the opinion of men who know, no more avail. this locality than Pittsburgh could be chose for the construction of the aforesaid steamers.

the United States for building war vessels, or making anything in which iron is the chief material, Pittsburgh presents more facilities than can be found elsewhere. In Four market every description of iron can be had cheap, and our rolling mills are of the largest class, and capable of manufacturing any amount of iron for any required purpose. We have the material, the capital and the skill to build as many ships of iron as the government may want. In this branch of mechanical skill our pioneers have already been tested. Iron ships have already been built here by the government which have given good satisfaction. The Allegheny, revenue cutter, and the Michigan, steamer on Lake Erie, were built at Pittsburgh. We build iron ships, iron houses, and war cannon of seventy thousand pounds weight-manufacture iron into every conceivable shape required by commerce, and do the work cheaper and better than can be done elsewhere, on account of our great abundance and cheapness of fuel. Our position is central, and we can send what we make to any market which may be desired, with the greatest facility. It is no misnomer that Pittsburgh is called the "Iron City."

In regard to building one or more of these proposed steamers, it is our decided opinion that the new administration should award to the "banner county of the banner State" a fair share of this "government pap," as the Dispatch is pleased to designate it. We Gulf of Mexico, furnishes a great high way sels when built may be taken to the waters of the Atlantic. But most unfortunately Union, so far as possible the people everywhere the South-a region of country with which the present administration is in antagonism, and some States of which have formed a taken to the seaboard over the Pennsylvania Railroad in sections, or else they must be floated down the Ohio and Mississippi at high water. The government will scarcely think of building vessels of iron and then railroading them across the Alleghenv mountains, and these vessels if built here, and cry on a recent occasion when certain Columbiads and large guns which the gov-

ernment had contracted for in Pittsburgh were ordered to be shipped hence. to sieze guns in transitu, much more will they be disposed to seize iron ships-an article which they will need and which they Korth of the Ohio to the Gulf.

Before it builds ships, it seems to us, i restore confidence to the country. If Mr. Lincoln will favor no compromise, nor acknowledge a government de facto in the South and attempt a peaceable settlement of matters, his party must, if they build iron ships at Pittsburgh, insure their safe delivery beyond the confines of the South. We hope our Representatives, Messrs. Moorhead and McKnight, Cameron and

Cowan, will be "wide-awake" and get the contract, and see that government pays the the vessels-is the logic of the Republicans? Have they not effectually closed the gate against this city for trade, and destroyed all future operations in the South? This is

A CONVENTION OF THE PEOPLE. Mr. Lincoln, in his inaugural address, seems to favor a Convention of the people, to decide upon the manner of adjustment of our present national difficulties. If the question of amendments to the Constitution, cannot be put to a direct vote of the people as proposed by Senator Bigler, which divide the country, a National Convention, may, perhaps, be an effectual means of settling the disputes which have arisen under the Constitution, or rather under the conflicting interpretations of it. We would prefer a direct reference of all matters at guards of the Constitution. issue to the people themselves, but if that is impossible to be had, a National Convention is, doubtless, the next best have force, as the result of the counsel the judgment of this great tribunal, the Ame and wisdom of the wise and conservative ican people. men of a large number of the States, had no power to render its action binding. If a | declared, in his inaugural or any other meswork of the people of all the States. Its our political difficulties; and if it should and of another part as "yours." fail, there is still left the direct appeal to Finally, Mr. Lincoln implores the peovide means for resisting the attack, which, is the people themselves as a last resort.

THE TONNAGE BILL. in Philadelphia, that Gov. Curtin had signed the bill repealing the tonnage tax, and was so published in the Philadelphia papers, it appears that the bill has not yet the chief office in the nation. been signed. The Inquirer states that it is expected that the bill will receive the exe of Mr. Lincoln's, and to think that so THE old Eagle gold mine in Virginia, lately

xpected, by many confiding people, has, since the recent cave in of Republican lead-

find no comfort in it. Mr. Lincoln quotes the Chicago platform to show that neither his party nor himself propose to interfere with slavery in the States where it exists. For this grandiloquent assurance nobody will thank themthey might as well say that they do not propose to meddle with slavery in Brazil or in Cuba. They are mad, we know—but they are not mad enough for an enterprise like members of the Confederate States will, There is no question, that of all points in this. But Mr. Lincoln takes care to keep from and after the 22d ult., be regarded as

that because the Slave States choose to the time when they were purchased. adhere to a policy of their own, they shall, herefore, lose, or have lost, their title to heir common property in the Territories made the discovery.

apostles should have free circulation in the Southern States. The idea that the Union, formed under the author of the address himself. the articles of association of 1777, and the articles of confederation of 1778 was con-

tinued under the constitution of 1787, and is older than the last, is new, but not striking, and cannot have much cohesive power in the present difficulty. This extract we take to be the kernel of the whole message; yet, we cannot but look upon it as beautifully obscure:

"The power confided to me will be used to hold, occupy and possess the property and places be-longing to the Government, and to collect duties and imposts, but beyond what may be necessary for these objects, there will be no invasion, no using of force against or among the people anywhere where hostility to the United States, can make the ships and make them well, in any interior locality, shall be so great, and one little drawback just now for which we citizens from holding federal offices; there they refused to fraternize with the traitors, hope our Republican friends will at once among the people for that object; while the strict afford a remedy. We are located at the legal right may exist in the government, head of a noble river which, flowing to the to enforce the exercise of these offices, the attempt to do so would be so irritating, and Union. so nearly unleasible with all, that I deem to the seabord, by means of which these ves | it better to forego for a time the use of
